

OAK KNOLL FLOOD RISK REDUCTION

PROTECTING LIVES & PROPERTY

This project is located between Woodcrest Drive and Jollyville Road and between Broad Oaks Drive and Columbia Oaks Drive.

To help reduce the risk of flooding, this project will upgrade the storm drain system. It also includes

improvements to a detention pond on Chelsea Moor. The pond will be deepened and connected to the storm drain system. Together these improvements will help reduce the risk of flooding in the area.

TYPICAL STORM DRAIN SYSTEM

INLETS AND CURBS CAPTURE RAIN WATER.

UNDERGROUND PIPES CARRY THE WATER.

RAIN WATER IS RELEASED INTO A CREEK.

Project Timeline

All our projects include preliminary engineering, design, permitting and bidding, and construction phases. As of March 2020, this project is currently in the design phase. Construction is anticipated to begin in 2022.
