

LOW WATER CROSSING PROJECT ON OLD SAN ANTONIO ROAD

This project will increase the safety of a low water crossing on Old San Antonio Road.

The project has two parts:

1. A new cul-de-sac to allow vehicles to turn around during a flood.
2. Two sets of gates to close the road during floods for public safety.

The road will remain open during normal conditions.

About The Project

- Construction starts in May and may take three to four months to complete, weather permitting.
- Construction work hours are 9 a.m. to 4 p.m. weekdays and 7 a.m. to 7 p.m. Saturdays.
- The road will be reduced to one lane; expect delays and be prepared to stop during construction hours.
- Avoid using the road during severe weather; check **ATXfloods.com** for real-time closures.
- If warning lights are flashing, the road may be flooded.
- Turn Around – Don't Drown.
