

Williamson Creek Tributary No. 2 Stream Restoration and Water quality Improvements

Project Location

Along Williamson Creek Tributary No. 2, from Nuckols Crossing Rd to East Stassney Lane

Project Description

This project addressed bank erosion along an un-named tributary to Williamson Creek behind homes on Lark Creek Drive and Spring Meadow Road. The erosion threatened homes, fences and utility lines. The project stabilized and revegetated 3000 feet of channel and included construction of a water quality pond and treatment of a stormwater outfall.
