

Little Zilker Neighborhood Park

Pilot DOLA Options

Option A

~8,225 SF

Pros:

- Farthest from the unfenced playground
- Many trees provide shade

Cons:

- Would have to re-route trail (making it less than a 1/4 mile) which would cost more and likely seem more permanent to neighbors
- Could damage the many trees enclosed within
- Not centrally located

Option B

~6,890 SF

Pros:

- Still relatively far from the unfenced playground
- Encloses only two trees
- Encloses light posts

Cons:

- Closest to residences, no street separation
- Behind backstop, but would still be taking open field space

Option C

~8,505 SF

Pros:

- Centrally located
- No trees to get damaged
- Farthest from residences
- Closest to tennis courts (where we're told many dog owners let their dogs off leash while they play)

Cons:

- Close to the unfenced playground
- Could interrupt flow between spaces

Option D

~7,156 SF

Pros:

- Closest to apartments, home to many dog owners
- Close to tennis courts
- Quite shady

Cons:

- Would interrupt flow into the park from crosswalk and stairs
- Could damage the trees, including a heritage oak, enclosed within
- Not centrally located
