Boards and Commission Action: Recommended by the Water and Wastewater Commission.

The work includes the construction (relocation) of water lines and facilities within the State's contract to widen FM 734 from .2 mile west of FM 734 to Amherst Drive.

The City improvements consist of replacing and relocating existing Asbestos (AC) pipe with 700 linear feet of 24-inch Ductile Iron (DI) water line, new valves, and other appurtenances and incidentals to construct the lines.

Due to the potential for unknown subsurface conditions and utility conflicts when working in the right of way, a 10% contingency in funding has been included to allow for the expeditious processing of any change orders. All construction dates are dependent upon TxDOT letting and is tentatively scheduled for August 2010.
