By adopting the plan, the City Council demonstrates the City's commitment to the implementation of the plan. However, approval of the plan does not legally obligate the City to implement any particular action item, nor does adoption of the plan begin the implementation of any item. The implementation of every recommendation will require separate and specific actions by the neighborhood, the City, and by other agencies.

The Neighborhood Plan will be supported and implemented by:

- City Boards, Commissions, and Staff
- City departmental budgets
- Capital Improvement Projects
- Other agencies and organizations
- Direct neighborhood action
