

**Recommended Land Management
for the
Water Quality Protection Lands
Austin, Texas**

**Submitted by the
Lady Bird Johnson Wildflower Center
to the
Wildland Conservation Division
Austin Water Utility
2010**

**Prepared by
Michelle Bertelsen, Lady Bird Johnson Wildflower Center
Steve Windhager, Lady Bird Johnson Wildflower Center
Mark Simmons, Lady Bird Johnson Wildflower Center**

Table of contents

Section		Page
1	Background and Assumptions	1
1.1	Overview	2
1.1.1	Bull Creek Management Unit	3
1.1.2	Upper Barton Creek Management Unit	3
1.1.3	Lower Barton Creek Management Unit	4
1.1.4	Slaughter Creek Management Unit	4
1.1.5	Bear Creek Management Unit	5
1.1.6	Little Bear Creek Management Unit	5
1.1.7	Onion Creek Management Unit	7
1.2	Assumptions Guiding the Management Plan	8
1.2.1	Goals	8
1.3	Managing Land for Water Quality and Quantity	10
1.4	Species of Concern	14
1.4.1	Faunal Species of Concern	14
1.4.1.1	Karst Invertebrates	14
1.4.1.2	Fisheries	15
1.4.1.3	Salamanders	15
1.4.1.4	Endangered Birds	16
1.4.1.5	Mammal Species of Concern	18
1.4.2	Floral Species of Concern	19
1.4.2.1	Desired Rare Plant Species	19
1.4.2.2	Invasive Plant Species	19
1.5	Public Access	21
1.5.1	Guiding Principles for Public Access	21
1.5.2	Public Stakeholder Process	22
1.5.3	Anticipated Impacts from Suggested Uses	23
1.5.3.1	General	23
1.5.3.2	Soils	24
1.5.3.3	Vegetation	27
1.5.3.4	Fauna	28
1.5.3.5	Interference with Land Management	29
1.5.3.6	Mitigation Measures	29
2	Natural Resource Information	33
2.1	Geology	34
2.2	Soils and Ecological Sites	35
2.3	Golden-cheeked Warbler Surveys	38

2.3.1	Bull Creek Management Unit	38
2.3.2	Upper Barton Creek Management Unit	38
2.3.3	Lower Barton Creek Management Unit	38
2.3.4	Slaughter Creek Management Unit	39
2.3.5	Bear Creek Management Unit	39
2.3.6	Little Bear Creek Management Unit	40
2.3.7	Onion Creek Management Unit	41
2.3.8	Shudde Fath Management Unit	41
2.4	Native and Exotic Deer Surveys and Incidental Counts	41
2.5	Karst Feature Inventory	42
2.5.1	Bear Creek Management Unit	42
2.5.2	Little Bear Creek Management Unit	43
2.6	Other Fauna of Interest	43
2.7	Archeological Sites	43
3	General Discussion of Land Management	44
3.1	Restoring Historic Communities	45
3.1.1	Species Diversity in the Central Texas Grasslands	46
3.1.2	Commercially Available Native Seed	47
3.1.3	Harvesting Seed	51
3.1.4	Sowing Seed	51
3.1.5	Container Grown Stock and Salvaged Material	52
3.2	Routine Historical Disturbance	53
3.2.1	Historical Vegetation	53
3.2.2	Humans and Fire	53
3.2.3	Lightning and Fire	55
3.2.4	Cattle Versus Bison	56
3.3	Management Techniques	58
3.3.1	Prescribed Burning	58
3.3.2	Prescribed Grazing	58
3.3.3	Prescribed Mowing	59
3.3.4	Brush Removal and Invasive Species Control	59
3.3.4.1	Hand Removal	60
3.3.4.2	Prescribed Fire	60
3.3.4.3	Mechanical Removal	61
3.3.4.4	Chemical Removal	62
3.3.4.5	Biological Controls	62
3.3.4.6	Prescribed Goating	62
3.4	Wildlife Population Management	63
3.4.1	White-Tailed Deer and Blackbuck	63

3.4.2	Feral Hogs	63
3.4.3	Other Feral Animals	64
4	Discussion of WQPL Land Management	65
4.1	Goals	66
4.2	Objectives	66
4.2.1	Riparian Areas	66
4.2.2	Upland Areas	66
4.2.3	Endangered Species	66
4.2.4	Invasive Species	66
4.2.5	Animal Overpopulation	67
4.2.6	Oak Wilt	67
4.2.7	Woodland Health	67
5	Management Recommendations	69
5.1	Site-Specific Recommended Management	70
5.1.1	Adaptive Management	70
5.1.2	Brush Management	72
5.1.3	Riparian Areas	73
5.1.4	Endangered Species Habitat	74
5.2	Management Unit Recommendations	78
5.2.1	Bull Creek Management Unit	78
5.2.2	Upper Barton Creek Management Unit	80
5.2.3	Lower Barton Creek Management Unit	84
5.2.4	Slaughter Creek Management Unit	86
5.2.5	Bear Creek Management Unit	88
5.2.6	Little Bear Creek Management Unit	91
5.2.7	Onion Creek Management Unit	94
5.2.8	Shudde Fath Management Unit	97
5.2.9	Brodie Wild Management Unit	97
6	Bibliography	98
7	Figures	Book 2
8	Appendices	Book 3
