Additional Backup Information					
<p>Austin Resource Recovery (ARR) is actively pursuing the development of its [re]Manufacturing Hub project. This project is designed to provide a location for recycling manufacturing; this is the processing and manufacturing of products from would-be waste materials. The manufacturing would be done by private tenants on the site. In order to complete remaining design requirements and begin construction, the project must be funded with cash. In addition, proceeds from the land sale described below will assist ARR in funding the future Northeast Service Facility located on Johnny Morris Rd (District 1).</p> <p>Due to the sale of 4711 Winnebago Lane (District 2), and long-term lease of 4712 Bolm Road (District 2), ARR has additional cash funding available to support its facility development and construction efforts. This Council action will recognize the revenue from these two real estate transactions and enable ARR to increase transfers out to its capital budget. The capital appropriations will support the [re]Manufacturing Hub project and any remaining funds will support other future facility needs.</p> <p>This Council action is required at this time in order to maintain compliance with a United States Economic Development Administration grant approved by Council on August 7, 2014, for the [re]Manufacturing Hub project.</p>
