Additional Backup Information

The Austin Transportation Department, in response to Ordinance No. 20151217-075, has developed a recommended penalty to address a Transportation Network Company's (TNC) failure to satisfy the benchmark requirements established to obtain driver history and fingerprint background checks. Also, in order to obtain the information necessary to properly calculate each TNC's level of performance, additional reporting information is recommended.

These recommended amendments are responsive to the ordinance:

- Monthly data reporting requirement on the last day of each month
- Procedures for drivers to obtain driver history and finger-print based background checks
- Establish benchmarks to calculate compliance
- Penalties for violations to include revocation of operating authority.
