ZONING CHANGE REVIEW SHEET

CASE: C14-2016-0039 – Thornton II

P.C. DATE: June 14, 2016
June 28, 2016

ADDRESS: 2413 Thornton Road

DISTRICT AREA: 5

OWNER/APPLICANT: John & Susan Hoberman

AGENT: South Llano Strategies/Glen Coleman

ZONING FROM: Commercial services (CS)
TO: Multifamily residence moderate-high density - conditional overlay (MF-4-CO). The proposed conditional overlay will limit the site to 70 units and 2000 vehicle trips.

AREA: 1.73 acres (75,359 sqft)

SUMMARY STAFF RECOMMENDATION:
Staff recommends multifamily residence low density (MF-2) district zoning.

Should the Planning Commission recommend the applicant’s request of MF-4-CO, staff recommends including the following as a conditional overlay for traffic mitigation per the Neighborhood Traffic Analysis:
- Widening of Thornton Road within 200 ft of West Oltorf Street to allow one inbound lane from West Oltorf and two outbound lanes from Thornton Road.
- Pedestrian Hybrid Beacon on West Oltorf for north/south pedestrian access.
- Sidewalk on the west side of Thornton Road from subject property equivalent to West Oltorf Street.

PLANNING COMMISSION RECOMMENDATION
JUNE 14, 2016: POSTPONED TO JUNE 28, 2016 AT THE REQUEST OF THE SOUTH LAMAR NEIGHBORHOOD ASSOCIATION.
JUNE 28, 2016: APPROVED MF-4-CO. VOTE: 10-1(A. PINERYOS DEHOYOS 1ST, P. SEEGER 2ND, T. NUCKOLS – NO, F. KAZI OFF THE DAIS, J. THOMPSON ABSENT) WITH THE FOLLOWING CONDITIONS:
- Site limited to 70 multifamily residential units.
- Traffic mitigation will include the widening of Thornton Road within 200 ft of West Oltorf Street to allow one inbound lane from West Oltorf and two outbound lanes from Thornton Road.
- Pedestrian Hybrid Beacon on West Oltorf for north/south pedestrian access.
- Sidewalk on the west side of Thornton Road from subject property equivalent to West Oltorf Street.
- Recognize the applicant’s commit to, and strongly encourage their participation in the
SMART Housing program at 10% of units available to residents at 60% median family income (MFI) for 40 years.

DEPARTMENT COMMENTS:
The subject property is a 1.73 acre tract and used as a restaurant supply business located within the South Lamar Neighborhood Planning Area (SLNPA) on Thornton Road south of the intersection with West Oltorf Street. It is part of the Fredericksburg Road Acres Subdivision. The tract was zoned commercial in nineteen hundred sixty seven (1967). The SLNPA does not have an adopted plan at this time so a plan amendment is not required.

Surrounding properties include: business park (CS) and telecommunications (MF-2) to the north, mobile home park (CS) across the railroad tracks to the east, multifamily residences (MF-2) to the south and single and multi-family (SF-3 & MF-2) to the west.

Staff is recommending MF-2 district zoning. This is consistent with the surrounding multifamily densities as well as the Land Development Code’s description of MF-2:

“An MF-2 district designation may be applied to a use in a multifamily residential area located near single family neighborhoods or in an area for which low density multifamily use is desired.”

Staff also supports a lower intensity because of the vehicle capacity of Thornton Road. Recently, Staff supported a change to CS-MU (C14-2015-0047) for the property at 2309 Thornton Road which would have allowed MF-4 density. However, that recommendation was conditioned by significant road improvements to Thornton Road and at the intersection with W. Oltorf Street. This application does not include those improvements to increase vehicle capacity of Thornton Road. The applicant is currently finishing a “Smart Housing” multifamily development on the adjacent property to the south and proposes to combine these two properties and projects.

A Neighborhood Traffic Analysis (NTA) has been performed. The NTA (attached) identified the Thornton Road/W. Oltorf Street intersection as a limiting factor for traffic capacity. The NTA considered the requested change to 70 units and recommends the following improvements: widening of Thornton Road within 200 feet of West Oltorf Street to allow two outbound east and west turn lanes to West Oltorf Street and one in bound lane to Thornton Road and restricting parking along the widened portion of Thornton Road and construct a sidewalk on the west side of Thornton. These improvements will improve the safety and mobility for all users. They are included above as an alternative to the staff recommendation should the Planning Commission recommend MF-4-CO to the City Council.

An Educational Impact Statement by Austin Independent School District was not required.

ISSUES: The South Lamar Neighborhood Association has expressed concerns about the higher density that MF-4 allows and the resulting vehicle traffic. They support the staff
position of MF-2 which is consistent with other multifamily zoning in the immediate area (See attached documents).

**CITY COUNCIL DATE:** August 11, 2016  
**ACTION:**

**ORDINANCE READINGS:** 1st  
**2nd**  
**3rd**

**ORDINANCE NUMBER:**

**CASE MANAGER:** Andrew Moore  
**PHONE:** 512-974-7604  
**EMAIL:** Andrew.moore@austintexas.gov
CS to MF-4-CO

This zoning case is located on the east side Thornton Road on a 1.73 acre property that contains a fenced in junk yard, and is not located within the boundaries of an adopted neighborhood planning area. Surrounding land uses includes a boxing and fitness center to the north, vacant land (which is being developed) to the south, single family housing to the west, and a railroad track to the east. The proposed use is a 70 unit apartment building.

**Connectivity and Mobility:** There is a public sidewalk located along the east side of Thornton Road. A Cap Metro transit stop is also located a third of a mile walking distance on W. Oltorf Street. This site is also located less than a half a mile from a variety shops, and restaurants, and parks.

**Imagine Austin**

Based on the comparative scale of this site relative to other residential uses in this area, as well as the site not being located along an Activity Corridor or within an Activity Center, this case falls below the scope of Imagine Austin, which is broad in scope, and consequently Imagine Austin is neutral on this proposed residential rezoning.

---

1. The site is not located over the Edwards Aquifer Recharge Zone. The site is located in the West Bouldin Creek Watershed of the Colorado River Basin, which is classified as an Urban Watershed by Chapter 25-8 of the City’s Land Development Code. It is in the Desired Development Zone.

2. Zoning district impervious cover limits apply in the Urban Watershed classification.

3. According to floodplain maps there is a floodplain adjacent to the project location. Based upon the location of the floodplain, offsite drainage should be calculated to determine whether a Critical Water Quality Zone exists within the project location.

4. Standard landscaping and tree protection will be required in accordance with LDC 25-2 and 25-8 for all development and/or redevelopment.

5. Trees will likely be impacted with a proposed development associated with this rezoning case. Please be aware that an approved rezoning status does not eliminate a proposed development’s requirements to meet the intent of the tree ordinances. If further explanation or specificity is needed, please contact the City Arborist at...
974-1876. At this time, site specific information is unavailable regarding other vegetation, areas of steep slope, or other environmental features such as bluffs, springs, canyon rimrock, caves, sinkholes, and wetlands.

6. This site is required to provide on-site water quality controls (or payment in lieu of) for all development and/or redevelopment when 8,000 s.f. cumulative is exceeded, and on site control for the two-year storm.

7. At this time, no information has been provided as to whether this property has any preexisting approvals that preempt current water quality or Code requirements.

---

**DSD Transportation Review - Ivan Naranjo - 512-974-7649**

**TR1.** If the requested zoning is recommended for this site, 30 feet of right-of-way should be dedicated from the centerline of Thornton Road in accordance with the Transportation Criteria Manual. LDC, 25-6-55; TCM, Tables 1-7, 1-12.

**TR2.** A traffic impact analysis was waived for this case because the applicant agreed to limit the intensity and uses for this development. If the zoning is granted, development should be limited through a conditional overlay to less than 2,000 vehicle trips per day. [LDC, 25-6-117]

**TR3.** A Neighborhood Traffic Analysis (NTA) is required and will be performed for this project by the Transportation Review staff. The applicant must provide recent traffic counts taken by a qualified transportation consultant for Thornton Road. Based on the NTA, additional right-of-way, participation in roadway improvements, or limitations on development intensity may be recommended. LDC, Sec. 25-6-114. Results of the NTA will be provided in a separate memo.

**TR4.** Thornton Road is not classified in the Austin Bicycle Plan.

**TR5.** Capital Metro bus service is not available along Thornton Road. However, Capital Metro Service is available within 1/3 mile of this site on Oltorf and S. Lamar.

**TR6.** There are existing sidewalks along various sections of Thornton Road.

**TR7.** Existing Street Characteristics:

<table>

</tbody>
</table>
FYI: The landowner intends to serve the site with City of Austin water and wastewater utilities. The landowner, at own expense, will be responsible for providing any water and wastewater utility improvements, offsite main extensions, water or wastewater easements, utility relocations and or abandonments required by the proposed land use. Depending on the development plans submitted, water and or wastewater service extension requests may be required. Water and wastewater utility plans must be reviewed and approved by the Austin Water Utility for compliance with City criteria and suitability for operation and maintenance. All water and wastewater construction must be inspected by the City of Austin. The landowner must pay the City inspection fee with the utility construction. The landowner must pay the tap and impact fee once the landowner makes an application for a City of Austin water and wastewater utility tap permit.

**Storm Water Detention**
Under current watershed regulations, development or redevelopment requires water quality control with increased capture volume and control of the 2 year storm on site. Runoff from the site is required to comply with pollutant load restrictions as specified in Land Development Code.

1. SP1. If rezoning to MF-3, only portions of Subchapter E will be applicable, only those portions which state “applies to ALL ZONING DISTRICTS”. Additional comments will be made when the site plan is submitted.

2. SP 2. For multifamily developments with 10 or more units, 5% of the gross site area will need to be dedicated to private common open space, per Section 2.7

3. SP 3. The site is subject to compatibility standards. Along the west property line, the following standards apply:
   4. No structure may be built within 25 feet of the property line.
   5. No structure in excess of two stories or 30 feet in height may be constructed within 50 feet of the property line.
   6. No structure in excess of three stories or 40 feet in height may be constructed within 100 feet of the property line.
   7. No parking or driveways are allowed within 25 feet of the property line.
   8. In addition, a fence, berm, or dense vegetation must be provided to screen adjoining properties from views of parking, mechanical equipment, storage, and refuse collection.
   9. Additional design regulations will be enforced at the time a site plan is submitted.

DATE: June 22, 2016

SUBJECT: Neighborhood Traffic Analysis for Thornton Road
          Zoning Case C14-2016-0039 (2413 Thornton Road)

The Transportation Section has performed a neighborhood traffic impact analysis (NTA) for the above referenced case and offers the following comments:

The subject 1.725-acre tract is proposed as a residential multifamily development to consist of 70 residential units. The site is located in south Austin along the east side of Thornton Road at approximately 1,550 feet from the intersection with West Oltorf Street. The site is currently zoned CS and the requested change is to MF-4 zoning. The project site is a flag lot developed with land uses that includes scrap and salvage services. The properties surrounding this development include CS, MF-2, MF-3, and SF-3 zoning along with existing land uses that include industrial, general office/warehouse, commercial/retail, multi-family, mobile home park, and single-family residences. Thornton Road borders the west side of this site and the Missouri Pacific railroad creates the eastern border. The proposed development will have vehicular access to Thornton Road.

Roadways

Thornton Road is classified as a residential collector with varying right-of-way and a 30-ft. pavement section. Thornton Road extends for approximately ½ mile starting at West Oltorf Street on the north and ending at Waterloo Trail on the south. Based on traffic counts collected on 6/2/2015 while AISD was still in session, Thornton Road has a traffic volume of approximately 2,630 vehicles per day.

Trip Generation and Traffic Analysis

Based on the Institute of Transportation Engineers (ITE) publication Trip Generation Rates, 9th Edition, the proposed development is estimated to generate approximately 466 vehicle trips per day (vpd). However, the existing land use (ITE land use code 150) generates an estimated 75 vehicle trips per day and thus the net increase in traffic for the proposed development is estimated at approximately 391 vehicle trips per day. Table 1 below summarizes these calculations.
Table 1 - Estimated Net Trip Generation

<table>
<thead>
<tr>
<th>LAND USE</th>

</tbody>
</table>

Section 25-6-116 of the Land Development Code (LDC) specifies the desirable operating levels for streets with various pavement widths. Based on LDC, 25-6-116, a residential collector with a pavement width of 30′ should not exceed 1,800 vehicles per day (vpd) to continue to operate at a desirable level. The existing traffic on Thornton Road exceeds the 1,800 vpd identified in the LDC by 830 vpd. The future traffic along Thornton Road is estimated to exceed the existing traffic by 391 vpd (an increase of 14.8%) due to the proposed development.

Conclusions and Recommendations

1. The neighborhood traffic analysis (NTA) was prepared by the Development Services staff based on the available information and previous analysis from the Austin Transportation Department.

2. Per LDC, 25-6-141(C), the City Council may approve a zoning application that would otherwise be denied under Subsection (B) of this section if the council determines that: (1) the applicant has satisfactorily mitigated adverse traffic effects; or (2) the projected additional traffic from a project has an insignificant effect on a residential street.

3. Based on the results of the NTA, please find the following recommendations to mitigate the traffic that will be generated by the proposed development:

4. This site should be limited through a conditional overlay to 70 residential units. With this limit, the projected traffic along Thornton Road is expected to increase by less than 15%. All improvements should be completed prior to the issuance of certificates of occupancy.

5. Recommend cost participation for the future widening of Thornton Road within 200’ of West Oltorf Street. The recommended cross section for the future widening would allow for one inbound travel lane of fourteen feet in width (14 ft), and two (2) outbound travel lanes, of minimum ten feet in width (10 ft). The recommended road widening would allow for separate right and left turn movements at the intersection of West Oltorf and improve operations. The recommended widening would occur on the west side of Thornton Road and the developer would be responsible for cost participation (subject to “rough proportionality”) for the road widening construction costs.

6. Recommend installing sidewalks along the west and east sides of Thornton Road, connecting the proposed development with existing pedestrian and transit facilities along W. Oltorf Street.
7. Recommend to restrict parking along Thornton Road within 200' of the intersection with West Oltorf. Further parking restrictions to one side of Thornton Road may be necessary to allow sufficient width for vehicles to travel in both directions when the parking is occupied. Neighborhood support would be required for these parking modifications.

8. Recommend installation of a pedestrian hybrid beacon on West Oltorf Street, to the west of Thornton Road (exact location to be determined at site plan). This recommended improvement is to facilitate safe pedestrian crossing to access the existing Cap Metro bus stop on West Oltorf Street.

If you have any questions or require additional information, please contact me at 512.974.7649.

Austin, Texas 787014

Re: Case C14-2016-0039 2413 Thornton Road

Dear Commissioners:

South Lamar Neighborhood Association (“SLNA”) opposes the applicant request for a zoning change from CS-General Commercial to MF-4-CO in Case C14-2016-0039 for the property located at 2413 Thornton Road. SLNA would support a change consistent with the staff recommendation of a zoning change to MF-2.

South Lamar Neighborhood has worked successfully to implement affordable housing along the Lamar transit corridor including the 107-unit Foundation Communities Bluebonnet Studios project at Lamar and Del Curto. We have similarly worked with the developer on Bannister Road to make a proposed development work in locations, which have reasonable infrastructure.

The history and issues relating to the infrastructure capacity on Thornton Road was brought before the Planning Commission with the recent Case C14-2015-0047 2303-2311 Thornton Road. In this prior case the staff considered a recommendation of MF-4 only in connection with a plan to improve infrastructure and address safety and watershed concerns consistent with the South Lamar Neighborhood Mitigation Plan. This requested change provides no support for infrastructure improvements.

The documentation attached describes the current conditions and zoning history of Thornton Road. Thornton Road has a 55-year history of Planning Commission and City Council voting against intensive zoning because:

- The Neighborhood’s character is predominantly SF3 and MF2,
- Thornton Road has inadequate width and limited connectivity
- Neighborhood is geographically isolated - no access across railroad
- Potential flooding hazards from West Bouldin Creek

Sincerely,

[Signature]

Kim Johnson
President South Lamar Neighborhood Association

Cc: SLNA Zoning and Thornton Road Working Group
1. South Lamar Mitigation Plan

As we presented in prior cases, the South Lamar Neighborhood Mitigation Plan\(^1\), included a requirement to address the effects of infill development on several issues. The October 3 2014 staff memo highlights goals including:

- “address the challenges created by many years of development on a site-by-site basis, lacking water detention and exacerbated by recent infill developments where inadequate infrastructure exists”
- “anticipate the cumulative effects of increasing density on a neighborhood’s natural and manmade infrastructure”
- “incorporate methods to define and protect a neighborhood’s character, infrastructure and safety and provide commensurate mitigation requirements to better manage density and its associated costs."

While the South Lamar Mitigation Plan has provided additional measures such as the additional water retention requirements and initial tools to anticipate the cumulative effects of density, the actual watershed and transportation infrastructure of the neighborhood and Thornton Road has not changed despite a 43% increase in dwelling units from 2004 to 2015 and another 80% jump in 2016. Recommended improvements in area drainage are not funded, the goals have not been met.

Using the initial analysis tools, the Transportation Department analysis suggested infrastructure improvements in the prior case C14-2015-0047 2303-2311 Thornton Road to partially address the inadequacy of the existing infrastructure. The staff efforts in this case demonstrated the extreme challenge of improving capacity and safety on Thornton Road. The existing overcapacity shown in the traffic analysis plus volume from Thornton Road developments and other area projects such as the “Enchanted Forest” case C14-2015-0146 on Oltorf and the parking overflow from existing Oltorf businesses require significant investment to provide even minimal relief. None of the past analysis adequately analyzes the potential safety impacts from increased density and traffic on the alternate exits (Cinnamon Path etc.) for Thornton Road traffic.

This project proposal requests the same density as C14-2015-0047 with no contribution to or recommendation for traffic improvements or affordability components.

Figures 1, 2 and Table 1 provide an overview of Thornton Road area. Thornton Road has a total overall length of 2700’ or .51 miles. The road dead ends at Oltorf on the north and provides limited access to other Local Roads via Bridgeway and Waterloo Trail on the south. 2413 Thornton is 0.4 miles from the intersection of Oltorf and Thornton according to Google Maps. The property is 0.32 miles from the nearest bus stop for the 338 bus route, and 0.52 miles to the 3/803, which connects to downtown and 0.7 miles to the 5 bus stops\(^2\).

Thornton Road is a local street acting as a collector. Despite numerous recommendations since 1961 that Thornton Road be widened, Thornton Road is 30’ with a 50’ ROW. In addition to access via Oltorf, Thornton Road crosses 3 streets\(^3\), none of which provides direct connectivity to an exit point. Bridgeway Drive extends 735’ between Kinney Court Circle and the RR tracks; Summer Creek is 534’ ending at a cul-de-sac to the west and the RR tracks to the east; Waterloo Trail extends 1350’ ending at a cul-de-sac to the west, the RR tracks to the east and crossing Cinnamon Path, which connects, to Del Curto.

---

\(^1\) Memorandum to Mayor and Council From Gregory I Guernsey October 3, 2014

\(^2\) All distances calculated from CapMetro Trip Planner June 5, 2016

\(^3\) See also Figure 18
Thornton Road is currently home to 136 residences located in 79 properties with a predominant zoning of SF-3. The estimated size of the properties bordering Thornton Road is 29.8 acres. Current projects under construction will add 104 units increasing the residential units by 76%. The following Table 1 shows the present characteristics.

Table 1

The characteristics above are graphically presented in Figure 2. The current 6 CS properties are located 1000 feet into the core of the neighborhood and surrounded by residential properties. Historically these properties were listed as Residential A per Austin City Code or the equivalent of SF-3. Section 2 provides a brief history of Thornton Road zoning cases.
2 Thornton Road History

Thornton Road has a 55-year history of Planning Commission and City Council voting against intensive zoning because:

- Neighborhood is residential in character
- Thornton Road has inadequate width and limited connectivity
- Subject tracts are long distance from the thoroughfare (Oltorf)
- Neighborhood is geographically isolated - no access across railroad
- Potential flooding hazards from West Bouldin Creek

“I cannot figure any street system which would not work severe hardship on any of the residences in the area.” - Planning Commission Minutes Feb 14, 1961

This history was recently updated to show the City Council rejection of a proposed project with similar density at 2303-11 Thornton by a vote of 10-1. The case history is summarized graphically below and in narrative form in Appendix A.
Figure 3 Thornton Road 1937

- Thornton road North annexed 1937
- Zoned residential

Figure 4 Thornton Road 1945

1945
- Roy F. Beal Purchased #2401
- Located outside of City Limits
- Operated Furniture Mfg and Sheet Metal Warehouse
1952
- City annexed south Thornton
- Annexed property was zoned Residential “A”
- Beal tract #2401 became non-conforming

1961
- Mr. Beal applied for Commercial C zoning – WAS DENIED because: *Thornton is RESIDENTIAL and INADEQUATE for commercial use.*
- Thornton 30’ wide with 50’ ROW

Figure 5 Thornton Road 1952

Figure 6 Thornton Road 1961
1967

- Mr. Beal applied 2nd time for Commercial C zoning but this time with residential at street
- Was granted C(CS) on railroad side, Residential “BB”(MF-2) on street side
- Granted due to non-conforming use and Mr. Beal’s hardship.

1968

- Residential BB(MF-2) granted at #2214
- Granted using Beal tract as precedent
Figure 9 Thornton Road 1969a

1969
• C(CS) granted at #2301-2311
• Granted using Beal tract as precedent
• PC: recommended Thornton ROW widened to 60’, with Residential BB(MF-2) at street as a buffer, the same as Beal tract

Figure 10 Thornton Road 1969b

1969
• C(CS) DENIED at #2316
• PC recommended C be denied, instead grant Residential BB(MF-2).
• Applicant did not accept.
1971

- B (MF-3) granted at #2514 with condition of MAX 15 units
- Granted due to proposed 20ac development to the south including extension of Thornton Road to Lightsey Road which never happened
- PC recommended B(MF-3) be denied: "Because of the limited access to this interior area from Oltorf, and not wishing to set a precedent for more intensive zoning, the staff would-prefer BB(MF-2)"

1973

- C(CS) denied at #2502-2504
1974

- C(CS) granted at #2313-2315
- PC recommended C be denied:
  "Most appropriate use of land along Thornton Road is residential BB (MF-2)"

1986

- MF-2 granted at #2505
- PC: limit density to 18 units/ac & Thornton be widened
3. Traffic Analysis and Limitation of Proposed Solutions Revised

Thornton Road is currently over capacity. This project proposes no offset or accommodation for the added density. The Traffic Study for the prior case\(^4\) suggests that the volume of traffic on the road is currently equal to that of a Collector Street according to the City of Austin. The Traffic Study continues with the following statement on page 1 (Item C17 page 4 of 30); “However, the existing roadway width (approximately 28’ to 30’) and right-of-way width (varies 50’ to 60’) is closer to that of a Local Street….Vehicles park along both sides of Thornton Road essentially narrowing the street to one travel lane.” The study further indicates that current daily volume over threshold of 1800 vpd for a street of this capacity is 830 vpd or 146% of capacity leading to a service level of F. 2017 volume with units under construction will bring the traffic volume to 192% above threshold. Development at MF-2 for this property and neighboring properties will lead to a projected volume of nearly 4000 vpd or 288% over threshold.

The photos below show the state of the road Saturday January 16, 2016.

---

\(^4\) The Traffic Study references the Thornton Traffic Study dated November 25, 2015 was included with Case C14-2015-0047

www.southlamar.org  Austin, TX  78704  Page 11 of 17
Figure 16 shows the same street on the same day. The present volume on Thornton Road is exacerbated by overflow parking from Austin Beer Garden Brewing Company (ABGB). The pictures below are from a video from a recent Saturday promotion. The overflow parking stretched from Thornton to and past the subject property. Throughout this area, the traffic was essentially limited to one lane except for the no parking zone at the curve.

Even given this congestion at north end of Thornton and Oltorf, The Traffic Study does not address the impact of increased traffic on alternative routes that are in use shown in red. Residents and businesses on

www.southlamar.org Austin, TX  78704  Page 12 of 17
the subject property normally avoid the Thornton Oltorf intersection. The increased density of the proposed development would increase the demand on alternative exit points, which create additional safety problems. The traffic analysis and development at a higher density should address the traffic considerations for these developments and future developments on other streets that are not Collectors.

In C14-2015-0047 the staff recommendation included a plan for widening the road to include a left turn lane for northbound traffic on Oltorf with a pedestrian signal near the 331 bus stop. The road-widening plan with pedestrian signal would produce no net benefit to users other than accelerating right turn traffic according to the traffic study. The service level for the intersection would remain the same grade F as it is today in 2017. In addition, the pedestrian signal would encourage additional parking for the “Enchanted Forest” entertainment complex planned on the north side of Oltorf. No engineering has been attempted to analyze the potential path of the road widening and easements, or utility relocation that would be required to accomplish the road widening at Oltorf.

Additional information on traffic is found on the following YouTube links

5. Watershed Impacts

The Thornton Road area faces significant impacts from flooding as described in the South Lamar Mitigation Plan and the plan for the Del Curto Storm Drain Improvements –Phase 1B plan. The overall development of the area always presents concerns on flooding especially when existing infrastructure problems are not addressed. Any proposed development on Thornton needs to be carefully evaluated for the full impact on the West Bouldin Creek watershed. The cumulative development on the southern part of Thornton presents potential issues for Bridgeway if not done properly as shown by the Austin FloodPro map.
The following picture shows the impact of flooding on Bridgeway on October 30, 2015, South of the subject property.

![Image of flooding impact on Bridgeway]

Figure 20

The following picture shows the impact of flooding on Oltorf at the railroad track north of the subject property on October 30 2015.

Appendix A Formerly Section 8 - Thornton Road History Notes

There are currently six commercial properties on Thornton which were zoned commercial in 3 separate zoning cases:
1  July 21, 1967: 2401-2413 Thornton
2  Nov 6, 1969: 2301-2311 Thornton
3  Mar 7, 1974: 2313-2315 Thornton

Note that in the final CS zoning, the planning commissioner recommended that “this tract should be more restrictive in its use”, and Thornton should be widened to 60’.

The first commercial uses on Thornton Road were around 1955 at #2401 which was then just outside the city limits. City limits extended only through #2315 at that time.

Around 1960, the city annexed the remaining southern section of Thornton Road.

Here is the history with some highlighted quotes from the meeting minutes discussing the problems of Thornton Road. There are pertinent quotes in the planning commission minutes for which links are provided.

Apr 6, 1961
First zoning request for Commercial in interior of Thornton which was not granted
City Council heard the application for zoning from "A" residential to "C" commercial at 2317-2409 Thornton (Roy F. Beal, E.F.Evans Company) and 2519-2707 Thornton (H.G. Linscomb) which was NOT RECOMMENDED by the Planning Commission with the following notes:
The Planning Commission had studied these cases at length, and the problem of the zoning was a street problem. Mr. Beal's operations (E.F. Evans - sheet metal company) are under a non-conforming use, and are of an industrial of commercial type that is permitted under "C". Mr Linscomb (property at the south dead end of Thornton) has 6-1/2 acres and wants to put a contractor's office and equipment yard with some warehouses that will store only durable goods. He explained that about 25 acres would be earmarked for commercial uses. Discussion of former zoning, and dedication for right-of-way boulevard was held. Mr. Linscomb state he would give whatever they wanted as a reasonable amount. The Director of Planning stated the Railroad Company had indicated it would dedicate a right-of-way provided someone else developed it; and he pointed out certain problems concerning the dedicated thoroughfare stating it would be necessary to rechannel the creek; concerning the development of Lightsey Lane in connection with the residential subdivision of South Terrace in which houses are under construction; concerning Thornton Road which is not opened on the ground on the Lindsey Tract; and concerning the early development of the entire area as residential with houses selling on three sides and the commercial area in the middle, away from the thoroughfare. He stated ultimately there would be a public responsibility to develop the streets in a large commercial area; in the meantime the residential developers are required to develop the street, put in the utilities and handle the drainage. Councilman Bechtol discussed the traffic flow, and state it would be up to the applicants to work that out and that the I&GN Railroad to join in it, and asked Mr. O'Quinn to contact the railroad and work this out. Mayor Pro-tem Palmer stated the Council would make a personal inspection of the area.

Discussion at Planning Commission 2/14/61:
http://www.ci.austin.tx.us/edims/document.cfm?id=215317
AND ON 3/14/61 where they voted to DENY:
http://www.ci.austin.tx.us/edims/document.cfm?id=215318
This case stayed pending for years, finally denied after no response from applicant:
http://www.ci.austin.tx.us/edims/document.cfm?id=38206

July 27, 1967
1st successful zoning on Thornton #2401
2401-2411 Thornton from "A" residence to "BB" residence (street side) and 4 acres 2401-2413
Thornton (adjacent to railroad tracks) from “A” to “C”

www.southlamar.org Austin, TX  78704  Page 16 of 17
Nov 6, 1969  
Council approves 2nd CS zoning in interior of Thornton  
Planning Commission minutes:  
http://www.ci.austin.tx.us/edims/document.cfm?id=215219

Apr 9, 1970  
Council heard 2316-2318 Thornton from "A" to "C", NOT recommended by Planning Commission, which recommended "BB" instead.  
http://www.ci.austin.tx.us/edims/document.cfm?id=24632

Jan 7, 1970  
Council approved 2512-2514 from "A" to "B" w/ restrictive covenant to limit of 15 units. Planning Commission did not recommend change to "B" but instead recommended "BB" which was less intensive - "because of the limited access to this interior area from Oltorf Street and not wishing to set a precedent for more intensive zoning". Restrictive covenant of 15 units and subject to 5' right-of-way  
http://www.ci.austin.tx.us/edims/document.cfm?id=24553

Mar 8, 1973  
Council DENIED 2502-2504 Thornton from "A" to "C" but APPROVED "A" to "BB" which is what Planning Commission recommended "BB", explaining: "Thornton Road is a dead-end street extending southerly off of Oltorf. It is an area developed prior to annexation and many of the uses there now are still single family. Recentzonings cover very deep lots, fronting on Thornton Road; and there is a warehouse fronting on the railroad track. Three zoning requests had been zoned "BB" residence and "B" residence and the fourth request was recommended for denial of the "C" Commercial zoning, but recommended for (low density-hence "BB") apartment zoning."

Mar 7, 1974  
3rd successful commercial zoning case  
Council approved 2313-2315 Thornton from "A" to "C"  
Planning Commission recommended the change subject to 1/2 the r-o-w (5') to increase Thornton Road to 60'. Planning commission comments: "this was an older area in South Austin on a very long dead-end street and was predominantly residential. The previous requests for "C" Commercial, which had been granted, had either been dismissed because of incompletion of requirements or their not being used for "C" purposes. He added that is was the opinion of the staff that rather than continue to zone "C", this tract should be more restrictive in its use."

PUBLIC HEARING INFORMATION

This zoning/rezoning request will be reviewed and acted upon at two public hearings: before the Land Use Commission and the City Council. Although applicants and/or their agent(s) are expected to attend a public hearing, you are not required to attend. However, if you do attend, you have the opportunity to speak FOR or AGAINST the proposed development or change. You may also contact a neighborhood or environmental organization that has expressed an interest in an application affecting your neighborhood.

During its public hearing, the board or commission may postpone or continue an application’s hearing to a later date, or may evaluate the City staff’s recommendation and public input forwarding its own recommendation to the City Council. If the board or commission announces a specific date and time for a postponement or continuation that is not later than 60 days from the announcement, no further notice is required.

During its public hearing, the City Council may grant or deny a zoning request, or rezone the land to a less intensive zoning than requested but in no case will it grant a more intensive zoning.

However, in order to allow for mixed use development, the Council may add the MIXED USE (MU) COMBINING DISTRICT to certain commercial districts. The MU Combining District simply allows residential uses in addition to those uses already allowed in the seven commercial zoning districts. As a result, the MU Combining District allows the combination of office, retail, commercial, and residential uses within a single development.

For additional information on the City of Austin’s land development process, visit our website: www.austintexas.gov/planning.

Written comments must be submitted to the board or commission (or the contact person listed on the notice) before or at a public hearing. Your comments should include the board or commission’s name, the scheduled date of the public hearing, and the Case Number and the contact person listed on the notice.

Comments: Thornton Rd is an overburdened shitshow of a street already. MF-4 is a horrible precedent. We believe that CS is a good use because of traffic and it can introduce the possibility of neighborhood services into the interior of the hood. PSW’s consultant’s argument that CS has higher traffic count than MF-4 is complete BS. We are tired of being sexually harassed by PSW. At least this architectural abomination will be hidden from street view, unlike their others.

Comments:

I guess no one on the board ever comes down Thornton Rd. We already have too much traffic on the road, and the 100 unit property next to this is not finished! The city allows development without proper infrastructure, and that is negligent. No sidewalks.

Comments: No. No No No No

There is already FAR too much development on Thornton. It is supposed to be a quiet residential street between AB60 and the new apartments. It is almost impossible to walk the dog or ride a bike on the street. No more development on Thornton except houses.

Hi Andrew -

My name is Loraine Brown, and my address is 1612 Bridgeway Drive, 78704. I write to you today to strenuously OBJECT to the rezoning of 2413 Thornton Road to MF-4-CO as requested in C14-2016-0039.

The zoning for this lot should either remain CS, or be rezoned to MF-2. The primary issue I have with the rezoning is the traffic that would be generated by this development on Thornton, which is already a congested and dangerous road for automobiles, cyclists and pedestrians to navigate. Adding 70 additional residential units (and the traffic such units would generate) to this already-crowded and perilous street would be a disaster.

Thank you for your time and attention regarding this matter.

All the best,
Loraine M. Brown

Comments: Thornton Rd. is already a safety concern due to the high traffic volume. There are routinely cars parked on both sides of the road leaving only enough room for one car to use the road at a time. Any increase in zoning density would have to include an overhaul of Thornton Rd. itself. There are also no continuous side walks on Thornton so cars are sharing an already narrow road with pedestrians as well. Vote No on Re-Zoning Thornton!

Within a single development combination of office, retail, commercial, and residential uses commercial, retail, commercial, and residential uses are allowed in the seven commercial district zones. As a result, the MW Combining District allows the City to have one zoning district that accommodates the mixed use (MW) combining. Council may add or remove the mixed use (MW) combining. For mixed use development, however, in order to allow for mixed use development, the zoning will be requested but in no case will it result in a more intensive zoning request or reduce the land by a less intensive zoning During this public hearing, the City Council may grant or deny a decision to make or change the zoning.

A decision to make or change the zoning is required. From the announcement no further notice is required. A public hearing is required for an application to change or extend an application.

Dear Mr. Moore,

I frequently cannot receive deliveries to my business on Thornton Rd because of the parking problem. Evenings and weekends are exceptionally bad because of the overflow parking problem from the Austin Beer Garden and Brewery (ABGB). When the train crossing arms are down, traffic backs up onto South Lamar completely blocking access to Thornton Rd. On a busy Friday night you would not be able to get an ambulance or fire truck down Thornton Rd. The neighborhood behind us uses Thornton Rd as a shortcut to avoid the traffic on South Lamar. The volume of cars, pedestrians without a sidewalk, and parking problem needs to be addressed. Thornton Rd can not handle the amount of traffic or parking it has currently. Adding density on an already over crowded street is like throwing gas on a fire. The 104 units PSW built at 2505 Thornton Rd should have never been approved. Please address our current problem before adding more density.

Video example of problems on Thornton Rd.
www.youtube.com/watch?v=xS01T2tLIXw

Sincerely,

Tim Dove
Within the City of Austin, development is regulated by the Mixed Use (MU) and Combined Districts. These districts allow for mixed-use development, including retail, residential, and office uses. The MU District is designed to attract mixed-use development that includes retail, office, and residential spaces.

The City Council may amend these districts to allow for more intensive zoning. In the case of the 2933 Planning Commission application, the City Council may grant a variance to allow a more intensive zoning. A variance request must be submitted to the City Council and is subject to public hearing.

A public hearing on the variance request is scheduled for April 20, 2016. The public is encouraged to attend and provide input.

If you are interested in attending the public hearing or providing input, please contact the City of Austin Planning and Development Department at 512-974-7604. Written comments must be submitted to the City of Austin Planning and Development Department at 900 P.O. Box 1088, Austin, TX 78767-8810.
Within a single development, combinations of office, retail, commercial, and residential uses are allowed in the Mixed Use District. The Mixed Use District is designed to allow the development of a mixed-use project that includes residential, commercial, and office space. The Mixed Use District allows for a variety of development types, including mixed-use buildings and commercial and retail spaces.

During public hearings, the City Council may grant or deny a zoning variance or rezoning request. In the event of a public hearing, the City Council will consider the application and make a decision on the basis of the evidence presented. The public is encouraged to attend these hearings and provide comments on the proposed development.
