

# Homelessness in Austin Current Needs + Gaps

**DRAFT**

Ending Community Homelessness Coalition (ECHO)

May 11, 2017

# About this Report

ECHO created this report on data, trends, and actions to address the needs of persons experiencing homelessness to inform ongoing efforts to prevent and end homelessness in our community.

This visual report describes (1) the characteristics of the homeless population in Austin and Travis County, (2) their current needs, (3) our current community public investments to address homelessness, and (4) gaps in services.

We hope this information is helpful in efforts to improve programs, plan community investments, and shape local policies. We encourage others to borrow and cite this material.

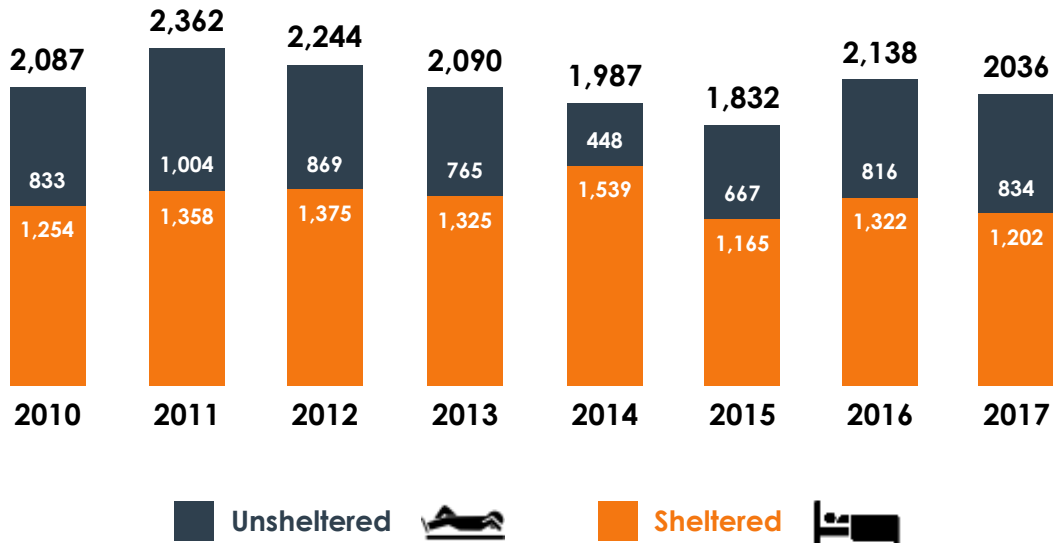

## Data Sources

The primary data and information sources for this document include the following:

- Surveys of over 5,836 households experiencing homelessness conducted since October 2014 (Coordinated Assessment Surveys) assessing their needs.
- Historical data on the number of persons experiencing homelessness on a given day since 2007 (Persons counted during the annual Point in Time Count).
- Data on the number of shelter beds provided by different agencies (data reported to the U.S. Department of Housing and Urban Development as a part of the Housing Inventory Count).
- Population data from the U.S. Census Bureau American Community Survey.
- A public input process that included interviews and meetings with over 70 stakeholders during December 2016 through March 2017.
- Literature review of research and effective practices from other communities around the country.
- Consultation with national industry experts.
- Analysis of existing local homeless programs including investments and system performance measures.

# Literally Homeless Population in Austin/Travis County

Persons counted experiencing homelessness in a given day

Persons known to have experienced homelessness in a given year

Persons identified in need of housing as of Jan. 2017: **4,541** (3,350 households)

- The "sheltered homeless" in a given day includes those in transitional housing per PIT guidelines.
- The number of "newly homeless" or persons who become homeless for the first time is based on the System Performance Measure # 5, a measure from the U.S. Department of Housing and Urban Development.

# A Snapshot of Persons Experiencing Homelessness

Persons experiencing homelessness often have many inter-related health, social and economic challenges that make it difficult to end homelessness on their own.

**67%**

Are unemployed/do not have earned income

**62%**

Report having no planned activities that bring them happiness or fulfillment

**61%**

Report going to the hospital or do not go for care at all when they are not feeling well

**56%**

Report experiencing an emotional, physical, psychological, sexual, or other type of abuse or trauma in their life

**44%**

Report currently experiencing a mental health problem

**42%**

Of the homeless population are African American, despite the fact that African Americans only make up 8% of Travis County's population

**36%**

Report having legal stuff going on that may result in them being locked up or having to pay fines

**29%**

Report having experienced domestic violence in their lifetime

**17%**

Report consuming drugs and/or alcohol almost everyday or everyday for the past month

- 
- Categories not mutually exclusive.

# Homeless Subpopulations

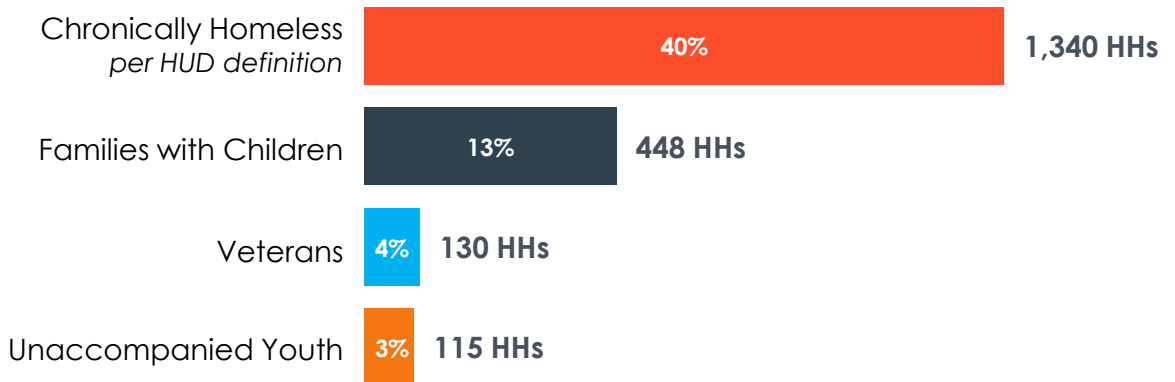

Most persons experiencing homelessness have lived on the streets for two or more years, and many have experienced several episodes of homelessness.

## Total Length of Time Living on the Streets or in Shelters

Households (HHs) identified in need of housing as of January 2017: **3,350**

### Subpopulations

# Factors Contributing to Homelessness

Homelessness is often caused by the breakdown and failure of many inter-related systems and safety nets.

## Family/Support Network

- Unstable environments
- Lack of support systems
- Domestic violence or abuse
- Parental substance abuse
- Rejection by parent or guardian due to sexual orientation, gender identity or pregnancy
- Mental health issues

## Community/Environment

- High barriers to limited affordable housing
- Displacement from housing due to natural disasters
- Limited access to jobs and housing after incarceration
- Lack of jobs with living wages

## Criminal Justice

- Criminal justice system involvement
- Accumulation of court costs (with no address, courts bills are not received, leading to increased fees)
- Systemic racial discrimination

## Supportive Services

- Inadequate welfare benefits
- Difficulty navigating resources and services
- Lack of formal education and support to help youth stay in school
- Exit from foster care with no housing or income support
- Lack of job skills

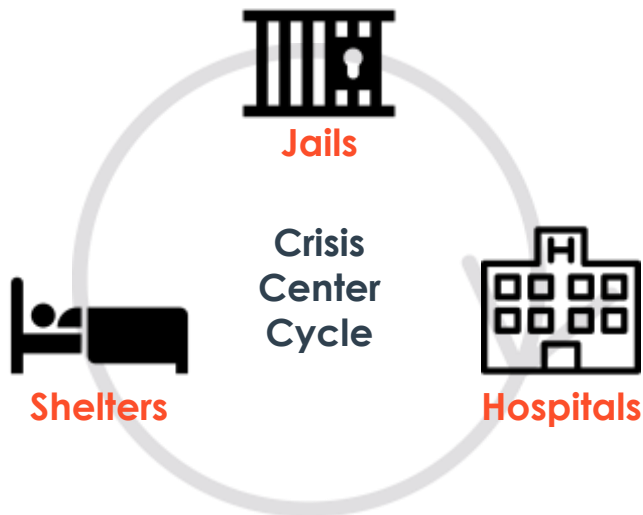

## Economic Factors

- Unstable jobs
- Lack of medical insurance
- Lack of transportation
- Insufficient wages

# The Costly Cycle of Homelessness for Many

A subset of the homeless population experiences complex health and social issues, frequently cycling between shelters, hospitals, and jails, and disproportionately impacting public spending.

## Average Annual Costs for Top 250 High-Cost Homeless Users of Public Crisis Services in Travis County

• Corporation for Supportive Housing. *Social Innovation Fund Pay for Success Feasibility Report: ECHO Austin Travis County*. Rep. N.p., Apr. 2016. Web. Mar. 2017.

# Racial + Ethnic Disparities Across Systems in Austin/Travis County

African Americans are incarcerated and experience poverty at significantly higher rates compared to their makeup in the general Travis County population and are disproportionately represented in the homeless population.

### Black/African American

### Non-Hispanic White

### Hispanic or Latino

# Current Needs of 3,350 Households (HHs) Experiencing Homelessness

Since the majority of the persons who experience homelessness are single-person households, the greatest housing need is for studios or one bedroom units. The types of services required by persons experiencing homelessness varies according to their vulnerability.

## Affordable + Low Barrier Housing Units Needed

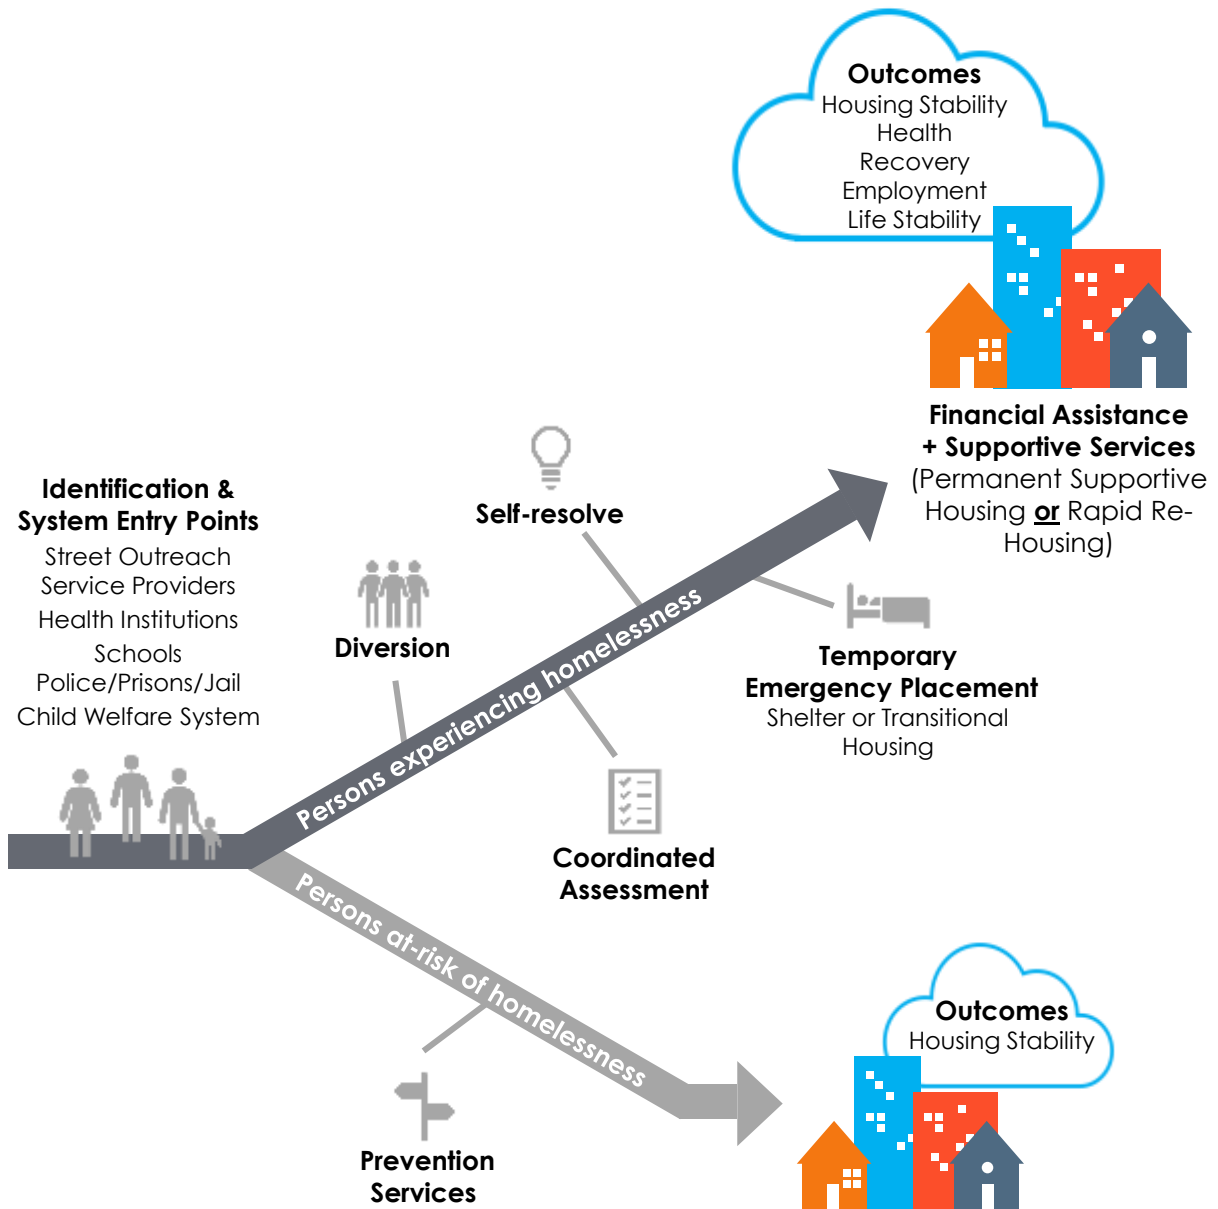

## Types of Services Needed According to Vulnerability Level

• Ending Community Homelessness Coalition (ECHO). Coordinated Assessment Surveys of 5,836 Households. 5 Dec. 2016. Homeless Management Information System (HMIS), Austin.

# Our System to Prevent + End Homelessness

Our ultimate goals are to prevent homelessness whenever possible and quickly help people get back into housing, minimizing the length of their homelessness. This flow chart provides a broad overview of different paths to permanent housing.

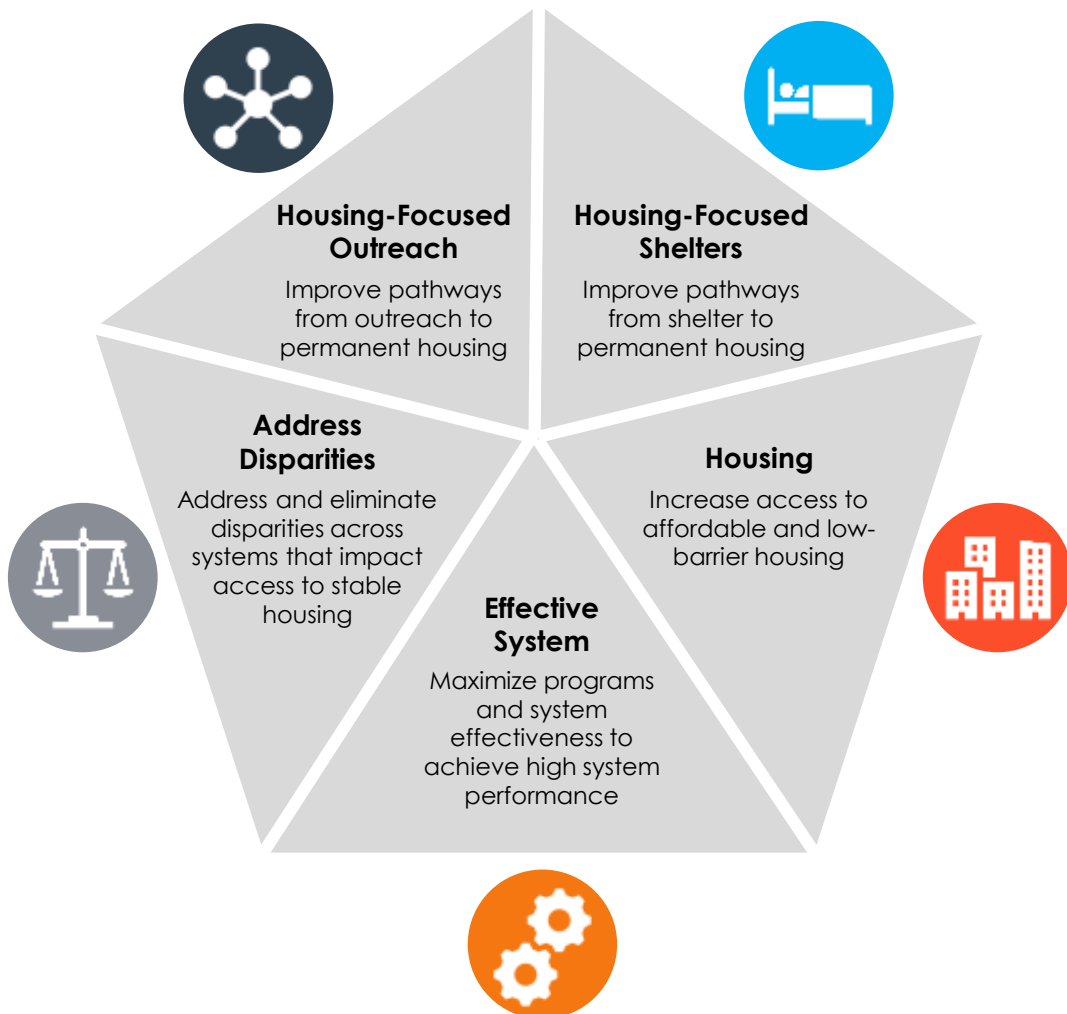

- Refer to the Glossary section of the document for explanations of different terms.

# System Vision for Ending Homelessness in Austin/Travis County

Our vision is that all community homeless services and their system elements are focused on connecting people to permanent housing. We envision a system in which (1) there are enough resources so that every person experiencing homelessness can be reached and offered a path to permanent housing, (2) all shelters are linked to a path to permanent housing, all housing barriers are addressed, (3) all programs and agencies work together to maximize the number of people who are stably housed in a cost-effective manner and offer support services, and (4) programs are designed intentionally to address racial and other disparities affecting the homeless population.

## System Elements

# Addressing Homelessness Downtown

Austin's homelessness population is most visibly concentrated downtown; on a given night, 472 persons sleep at the ARCH and the Salvation Army while 178 persons sleep in the surrounding streets, a total of 650.

## Reasons for Downtown Concentration

Not enough housing and service resources to assist the 7,000+ persons who experience homelessness every year

Many homeless services are clustered downtown

There is activity in the area day and night

## Problems of Downtown Concentration

Cheap street drugs like K2 readily available to homeless population without enough access to treatment

Downtown hotels and businesses are exposed to trespassing, panhandling, and alcohol and drug use, impacting customers

Homelessness is criminalized in the forms of trespassing and possession of substances, creating more housing barriers

## Strategies that *Together* will Reduce Homelessness Downtown + Beyond

### STRATEGIES

### RESULTS

**Outreach.** Expanding outreach resources to connect to all unsheltered persons.

**Shelters + Navigation Centers.** Increasing temporary shelter beds & creating multiple "housing navigation centers" or resource hubs throughout the city, alleviating the pressure at the ARCH and other downtown service providers

**Housing + Services.** Increasing rental assistance and subsidies to serve all persons needing assistance, accessing more affordable and low-barrier rental units, and increasing access to other services (e.g. case management, employment + substance use).

**Addressing Disparities.** Addressing housing barriers and designing programs to address racial and other disparities.

**Effective System.** Ensuring all strategies connect persons to housing, ending their homelessness. Aligning stakeholders' vision, streamlining coordination and collaboration and tracking community progress.

- Reduced homelessness, more persons housed, off the streets
- Decreased public nuisances
- Persons get connected to permanent housing, jobs, + healthcare
- Increased housing stability
- Increased appropriate healthcare usage
- Increased positive community connections

# Success: Ending Veteran Homelessness + Housing More Youth

Focusing on subpopulations in Austin/Travis County led to a dramatic reduction in the numbers of veterans and youth experiencing homelessness.

## Veteran Successes, 2015 - 2017

Veteran Housing Rate Improved

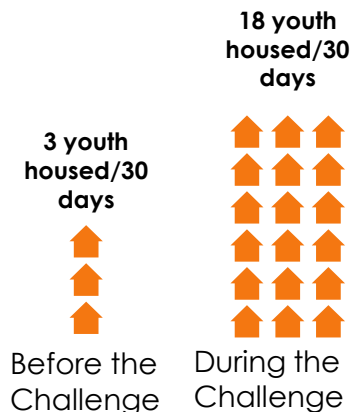

Veterans Experiencing Homelessness in a Given Day Decreased

Days to Housing for Veterans Decreased

## Youth Successes, 2016 - 2017

During the 100 Day Challenge, Austin housed 62 youth, surpassing its goal of 50

44% of youth who moved into housing during 100 Day Challenge had a history of foster care. Studies show youth with a history of foster care are disproportionately represented in homelessness

**\$5.2 M**

Awarded to Austin in Jan. 2017 to become a demonstration site to end youth homelessness
