DESIGN TOOLS

Garage Placement for Single-Family, Duplex, and Two-Family Residential Use LDC 25-2-1604

Attached or detached garages and/or carports with entrances that face a front yard that abuts public ROW must be located flush with or behind the front façade of a house. The width of a parking structure located less than twenty feet (20') behind the front façade of a house may not exceed fifty percent (50%) of the width of the façade of the house. For example, if the front façade of a house—not including the garage—is thirty feet (30') wide, then the garage may be no wider than fifteen feet (15').

There is no garage width limitation for side entry garages or for attached or detached garages and/or carports located twenty feet (20') or more behind the front façade of a house.
