ZONING CHANGE REVIEW SHEET

CASE: C14-2017-0136 (Lake Creek Commercial)  Z.A.P. DATE: December 19, 2017

ADDRESS: 9829 1/2 North Lake Creek Parkway

DISTRICT AREA: 6

OWNER/APPLICANT: 620/183 Limited Partnership (Fred Thomas)

AGENT: McLean & Howard, LLP (Jeffrey Howard)

ZONING FROM: MF-6  TO: GR  AREA: 2.0 acres

SUMMARY STAFF RECOMMENDATION:

The staff’s recommendation is to grant GR, Community Commercial District, zoning.

ZONING AND PLATTING COMMISSION RECOMMENDATION:

12/19/17: Closed the Public Hearing (8-0, D. Breithaupt and S. Lavani-absent); B. Evans-1st, J. Duncan-2nd.

Approved GR-MU zoning (8-0, D. Breithaupt and S. Lavani-absent); B. Evans-1st, J. Duncan-2nd.

DEPARTMENT COMMENTS:

The property in question is part of larger tract of land that is developed with a single-family residence and outlying structures. This parcel is located at the southeast corner of Lakeline Mall Drive and North Lake Creek Parkway. It is undeveloped, sparsely vegetated and relatively flat. To the north, across Lakeline Mall Drive, there is a retail strip center and an apartment complex (Platinum Lakeline Apartment Homes). The lot directly to the east is developed with a hotel/motel use (La Quinta). The subject tract is adjacent to the west of the Leander Rehabilitation PUD and the recently approved Northwest Transit Oriented (TOD). Parcel COR-4 of the Leander Rehabilitation PUD is currently planned for commercial/ office/ residential development. The tracts of land across North Lake Creek Parkway to the east are developed with a retail strip center and a Sam’s Club.

The staff recommends the applicant’s request for GR, Community Commercial District, zoning for this property because it is located at the intersection of two major arterial roadways, North Lake Creek Parkway and Lakeline Mall Drive. The property meets the intent of the GR district as this parcel of land is accessible from major traffic ways and will serve neighborhood and community needs. In addition, this site is approximately a quarter mile to the southeast of the intersection of Lakeline Boulevard and Lyndhurst Drive, where there is a Capital Metro transit station for the commuter rail stop. The staff encourages commercial and high density residential development in proximity to this major intersection, transit link, and TOD area. The site is located within the boundaries of a ‘Regional Center’, as identified on the Imagine Austin’s Growth Concept Map, found in the Image Austin Comprehensive Plan.

The applicant agrees with the staff’s recommendation.

ZONING
Case#: C14-2017-0136

This product is for informational purposes and may not have been prepared for or be suitable for legal, engineering, or surveying purposes. It does not represent an on-the-ground survey and represents only the approximate relative location of property boundaries.

This product has been produced by the Planning and Zoning Department for the sole purpose of geographic reference. No warranty is made by the City of Austin regarding specific accuracy or completeness.

Created: 10/30/2017
STAFF RECOMMENDATION

The staff’s recommendation is to grant GR, Community Commercial District, zoning.

BASIS FOR RECOMMENDATION

1. The proposed zoning should be consistent with the purpose statement of the district sought.

   The Community Commercial (GR) district is the designation for an office or other commercial use that serves neighborhood and community needs and that generally is accessible from major traffic ways.

2. The proposed zoning should promote consistency and orderly planning.

   GR zoning would be compatible and consistent with the surrounding uses because this property is located adjacent to GR/MF-4 zoning to the north, GR/PUD zoning to the east, and CH zoning to the west. In addition, the site is located approximately a quarter mile to the east, southeast of the intersection of Lakeline Boulevard and Lyndhurst Drive, where there is a transit station for the commuter rail stop by Capital Metro. The staff encourages commercial and high density residential development in proximity to this major intersection and transit link.

3. Zoning should promote the policy of locating retail and more intensive zoning near the intersections of arterial roadways or at the intersections of arterials and major collectors.

   The property in question is located at the southeast corner of the intersection of two major arterial roadways, Lakeline Mall Drive and North Lake Creek Parkway. The site is also located within the boundaries of a ‘Regional Center’, as identified on the Imagine Austin’s Growth Concept Map, found in the Image Austin Comprehensive Plan.

EXISTING CONDITIONS

Site Characteristics

The site under consideration is undeveloped and sparsely vegetated. The property is part of larger tract of land that is developed with a single-family residence and outlying structures. To the north, across Lakeline Mall Drive, there is a retail strip center and an apartment complex (Platinum Lakeline Apartment Homes). The lot directly to the east is developed with a hotel/motel use (La Quinta).

Comprehensive Planning

MF-6 to GR

This zoning case is located on the southeast corner of N. Lake Creek Pkwy and Lakeline Boulevard, on an undeveloped 2 acre parcel. This property is not located within the boundaries of a neighborhood planning area. Surrounding land uses includes vacant land to the north and south; a small shopping center to the west, and a hotel to the east. The property is also located catty-corner from a large shopping center. The proposed use for this property is an undefined commercial use.
Connectivity
Public sidewalks are located intermittently along both streets and a CapMetro stop is located across the street from the subject property. The Walkscore for this area is 40/100, Car Dependent, meaning most errands require a car.

Imagine Austin
While this property is located within the boundaries of an existing Regional Center as identified on the Growth Concept Map, based on the comparative scale of the site relative to abutting commercial, this case falls below the scope of Imagine Austin, which is broad in scope, and consequently the plan is neutral on the proposed rezoning.

Environmental

The site is located over the North Edwards Aquifer Recharge Zone. The site is in the Lake Creek Watershed, which is classified as a Suburban Watershed by Chapter 25-8 of the City’s Land Development Code. It is in the Desired Development Zone.

Under current watershed regulations, development or redevelopment on this site will be subject to the following impervious cover limits:

According to floodplain maps there is no floodplain within or adjacent to the project location.

Standard landscaping and tree protection will be required in accordance with LDC 25-2 and 25-8 for all development and/or redevelopment.

Please be aware that an approved rezoning status does not eliminate a proposed developments requirements to meet the intent of the tree ordinances. If further explanation or specificity is needed, please contact the City Arborist at 974-2755.

At this time, site specific information is unavailable regarding other vegetation, areas of steep slope, or other environmental features such as bluffs, springs, canyon rimrock, caves, sinkholes, and wetlands.

Under current watershed regulations, development requires water quality control with increased capture volume and control of the 2 year storm on site.

At this time, no information has been provided as to whether this property has any preexisting approvals that preempt current water quality or Code requirements.

Impervious Cover

The maximum impervious cover allowed by the GR zoning district would be 90%. However, if the watershed impervious cover is more restrictive than the zoning district’s allowable impervious cover, the impervious cover is limited by the watershed regulations.

</tbody>
</table>

Note: The most restrictive impervious cover limit applies.

**Site Plan**

Site plans will be required for any new development other than single-family or duplex residential.

Any development which occurs in an SF-6 or less restrictive zoning district which is located 540 feet or less from property in an SF-5 or more restrictive zoning district will be subject to compatibility development regulations.

Any new development is subject to Subchapter E. Design Standards and Mixed Use. Additional comments will be made when the site plan is submitted.

**Stormwater Detention**

At the time a final subdivision plat, subdivision construction plans, or site plan is submitted, the developer must demonstrate that the proposed development will not result in additional identifiable flooding of other property. Any increase in stormwater runoff will be mitigated through on-site stormwater detention ponds, or participation in the City of Austin Regional Stormwater Management Program if available.

**Transportation**

No additional right-of-way is needed at this time.

This site is within the area covered by State legislation (S.B. 1396), which went into effect September 1, 1995. Under this legislation, the City may not "deny, limit, delay, or condition the use of development of land...because of traffic or traffic operations that would result from the proposed use or development of the land." A traffic impact analysis is not required for any development within this area, and traffic issues may not be considered in the approval of the application. Right-of-way dedication, however, may still be required.

Janae Ryan, Urban Trails, Public Works Department and Nathan Wilkes, Bicycle Program, Austin Transportation Department may provide additional comments regarding bicycle and pedestrian connectivity per the Council Resolution No. 20130620-056.

**Water and Wastewater**

FYI: The landowner intends to serve the site with City of Austin water and wastewater utilities. The landowner, at own expense, will be responsible for providing any water and wastewater utility improvements, otsite main extensions, water or wastewater easements, utility relocations and or abandonments required by the proposed land use. Depending on the development plans submitted, water and or wastewater service extension requests may be required. Water and wastewater utility plans must be reviewed and approved by Austin Water for compliance with City criteria and suitability for operation and maintenance. All water and wastewater construction must be inspected by the City of Austin. The landowner must pay the City inspection fee with the utility construction. The landowner must pay the tap and impact fees once the landowner makes an application for Austin Water utility tap permits.
