Additional Backup Information:

Chapter 26 of the Texas Parks and Wildlife Code provides that the use of parkland for non-park purposes may be approved upon a finding that there is no feasible and prudent alternative to the use of this land.

The Austin Water Utility Department is proposing to upgrade the existing 18 inch waste water line to a proposed 30 inch waste water line to handle growth in the area. This line will need to be relocated across Bauerle Ranch at Slaughter Creek Greenbelt which will require approximately 49,184 sq. ft. for a permanent wastewater line use and the approximately 22,024 square feet for staging area.

Approval of the use of parkland is made on the condition that all restoration is completed in accordance with the Standard Specifications and Construction Standards of the City of Austin and the Parks and Recreation Department's "Construction in Parks Specifications". The Austin Water Utility Department is required to pay all costs associated with the restoration and tree mitigation as part of the site restoration process.

There is no feasible and prudent alternative to the use of the dedicated parkland which includes all reasonable planning to minimize harm to such lands. The dates of public notification in the Austin American-Statesman are February 25, March 4, and 11, 2018.
