

Airport Boulevard US 183 to North Lamar Boulevard

MOBILITY, SAFETY, AND CONNECTIVITY IMPROVEMENTS

The list below is what is proposed for the Airport Boulevard corridor using 2016 Mobility Bond funds. The City will design and construct improvements that will enhance mobility, safety, and connectivity from North Lamar Boulevard to US 183.

Additionally, design work will begin on multimodal enhancements for the full length of the corridor for potential future construction. This includes elements like full street reconstruction to extend the life of the roadway; bike lanes that are protected from vehicular traffic; intermittent median islands for safety; and streetscape enhancements.

Design and Construction

Up to 21 traffic signal improvements with enhanced technology to promote vehicular and transit efficiency, and pedestrian and bicyclist safety

Intersection improvements with turn lane modifications to enhance vehicular and transit efficiency, and pedestrian and bicyclist safety at:

1. E MLK Jr Blvd
2. Manor Rd
3. E Koenig Ln
4. E 45th St
5. Springdale Rd

Up to 6.5 miles of pavement rehabilitation to repair spot damage, restore surface, and improve rideability

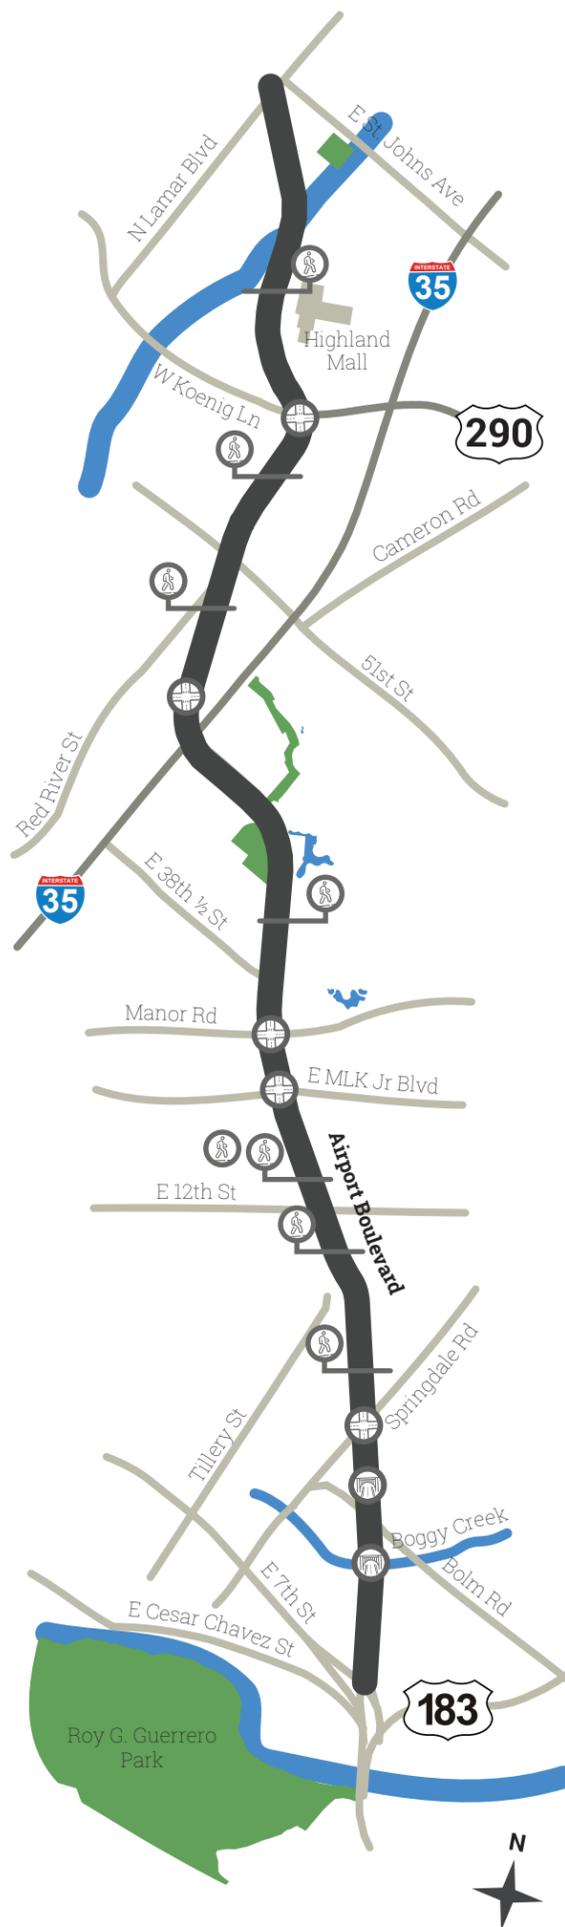

Bridge widenings in both directions to provide safer crossings for drivers, pedestrians, and bicyclists at:

1. Boggy Creek
2. Capital MetroRail line between Springdale Rd and Bolm Rd

Up to 13 miles of new shared-use paths to create continuous ADA-compliant sidewalks and bicycle facilities along length of corridor

Evaluation and possible construction of new midblock pedestrian crosswalk signals (Pedestrian Hybrid Beacons) for cyclists and pedestrians in the vicinity of:

1. Gunter St
2. South of Oak Spring Dr
3. South of Harvey St
4. E 14th 1/2 St
5. E 40th St/Antone St
6. Fernwood Rd/Parkwood Rd
7. E 49th St
8. E 55th St
9. Highland Mall Entrance

A single improvement may benefit multiple transportation modes.

- Vehicular
- Pedestrian
- Bicycle
- Transit
- Corridor Limits

Design and Possible Construction

The City will begin design on the following projects for possible construction with 2016 Mobility Bond funding. Other funding sources and partnerships will be sought.

Up to 6.5 miles of full street reconstruction between US 183 and North Lamar Boulevard:

- Wider sidewalks
- Protected bicycle lanes
- Enhanced streetscapes with elements like banners, aesthetic treatments, hardscaping, landscaping, trees, etc.
- Street lighting
- On-corridor stormwater drainage upgrades

NOTE: All recommendations are approximate, proposed, and subject to change. The exact locations of improvements will be determined in the Project Design Phase and the City will work with the community prior to project construction.

For more information and a complete list of proposed enhancements, visit AustinTexas.gov/CorridorMobility

Airport Boulevard

US 183 to North Lamar Boulevard

Program Phases

City staff anticipates bringing the Proposed Corridor Construction Program to City Council for consideration and approval in spring 2018. Once a Corridor Construction Program is approved, work will begin on the Project Design Phase. If modifications to the approved Corridor Construction Program become necessary, those changes will be communicated to City Council and the community.

DEVELOPMENT OF CORRIDOR MOBILITY PLANS

- Data collection and analysis, including crashes, traffic counts, and anticipated future transportation demand
- Development of mobility recommendations, like continuous sidewalks, bike lanes, and intersection improvements
- Public input through meetings and online
- Conceptual level design
- Corridor Mobility Plans are finalized

CORRIDOR CONSTRUCTION PROGRAM DEVELOPMENT PHASE

- Develop model to prioritize Corridor Mobility Plan recommendations as per the Contract With Voters
- Update Corridor Mobility Plan data to reflect current corridor conditions, plans, and policies
- Coordinate with various City of Austin departments and local agencies
- Conduct public outreach to inform community about existing Corridor Mobility Plans and prioritization process (pop-in meetings, online information, briefings to City Boards and Commissions, and civic groups)
- Conduct cost risk assessment and develop mitigation strategies
- Begin analyzing realities of implementation, like utility impacts, agency coordination, and geographic dispersion
- Prepare Proposed Corridor Construction Program

We are here: February 2018

CITY COUNCIL CONSIDERS PROPOSED CORRIDOR CONSTRUCTION PROGRAM

PROJECT DESIGN PHASE

- Conduct surveys to gather information about utilities, property lines, geotechnical analysis, etc.
- Development of traffic management plan to mitigate construction impacts
- Ongoing outreach to the community, City departments, and local agencies
- Continue analyzing realities of implementation
- Coordination with business and property owners to develop strategies to minimize construction impacts
- Finalize design
- Refine cost estimates, look for budget efficiencies, and explore leveraging/partnership opportunities
- Permitting for the projects
- Seek leveraging/other funding opportunities

BID/AWARD/EXECUTION PHASE

- Develop and announce bid/procurement opportunities for construction services
- City Council considers and approves construction contract awards

CONSTRUCTION PHASE

- Construction of corridor improvement projects to enhance mobility, safety, and connectivity
- Ongoing communication with affected stakeholders using multiple methods
- Mitigation of construction impacts

**CORRIDOR
 MOBILITY
 PROGRAM**

This spring, Austin City Council will consider a Proposed Corridor Construction Program for approval. It will include recommendations for mobility, safety, and connectivity improvements on Airport Boulevard between US 183 and North Lamar Boulevard as well as improvements on eight other corridors. Corridors are primary roadways in Austin's transportation network.

The recommendations came from the Airport Boulevard Corridor Mobility Plan, which was developed with the help of the community. The Corridor Mobility Plan is available at AustinTexas.gov/AirportBlvd. Funding from the 2016 Mobility Bond will go to improvements on Airport Boulevard.

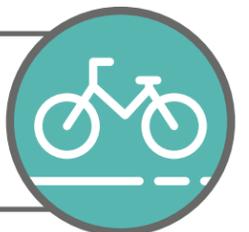

Those projects in the Proposed Corridor Construction Program that have been prioritized for design and construction will result in the biggest bang for the buck and meet other goals outlined in City Council's Contract With Voters.

Here's what you'll get:

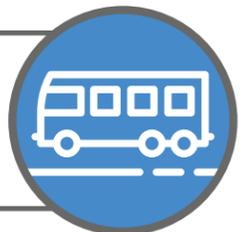

Better traffic flow and reduced delay through intersection improvements, upgraded traffic signals, pavement rehabilitation, and intermittent median islands for safety.

Continuous bicycle lanes or shared-use paths along the full length of the corridor to improve safety and traffic flow.

Continuous ADA-compliant sidewalks along the full length of the corridor, with additional mid-block signalized pedestrian crossings.

Better traffic flow, reduced delay and enhanced connectivity through transit signal priority, and coordination with Capital Metro on strategic placement of transit stops.

The timing and delivery of improvements may be modified after Corridor Construction Program approval, as a variety of factors are being considered, such as geographic dispersion, potential leveraging opportunities, utility conflicts, and scheduling or construction risks. This is to ensure taxpayer dollars are used wisely and in a manner that achieves the desired outcomes expressed in the Contract With Voters.

All recommendations are at a conceptual/preliminary level. Additional project development, including design work, will begin after the Corridor Construction Program is approved by City Council. At that time, the City will work with the community, as well as property and business owners who may be affected. If you have questions about the Proposed Corridor Construction Program, contact Sara Behunek at corridors@austintexas.gov and (512) 974-7840.

MOBILITY, SAFETY, AND CONNECTIVITY IMPROVEMENTS

The list below is what is proposed for the Burnet Road corridor using 2016 Mobility Bond funds. The City will design and construct improvements that will enhance mobility, safety, and connectivity from MoPac Expressway to Koenig Lane.

Design and Construction

Up to 19 traffic signal improvements with enhanced technology to promote vehicular and transit efficiency, and pedestrian and bicyclist safety

Intersection improvements with turn lane modifications to enhance vehicular and transit efficiency, and pedestrian and bicyclist safety.

1. W Koenig Ln
2. W Braker Ln
3. Kramer Ln
4. Esperanza Crossing
5. Gault Ln

Up to 10 miles of new shared-use paths to create continuous ADA-compliant sidewalks and bicycle facilities along length of corridor

Up to 5 miles of pavement rehabilitation to repair spot damage, restore surface, and improve rideability

Intermittent median islands from W Koenig Ln to W Anderson Ln to improve vehicular and transit efficiency, and safety for everyone

On-corridor stormwater drainage upgrades from US 183 to MoPac to support mobility improvements

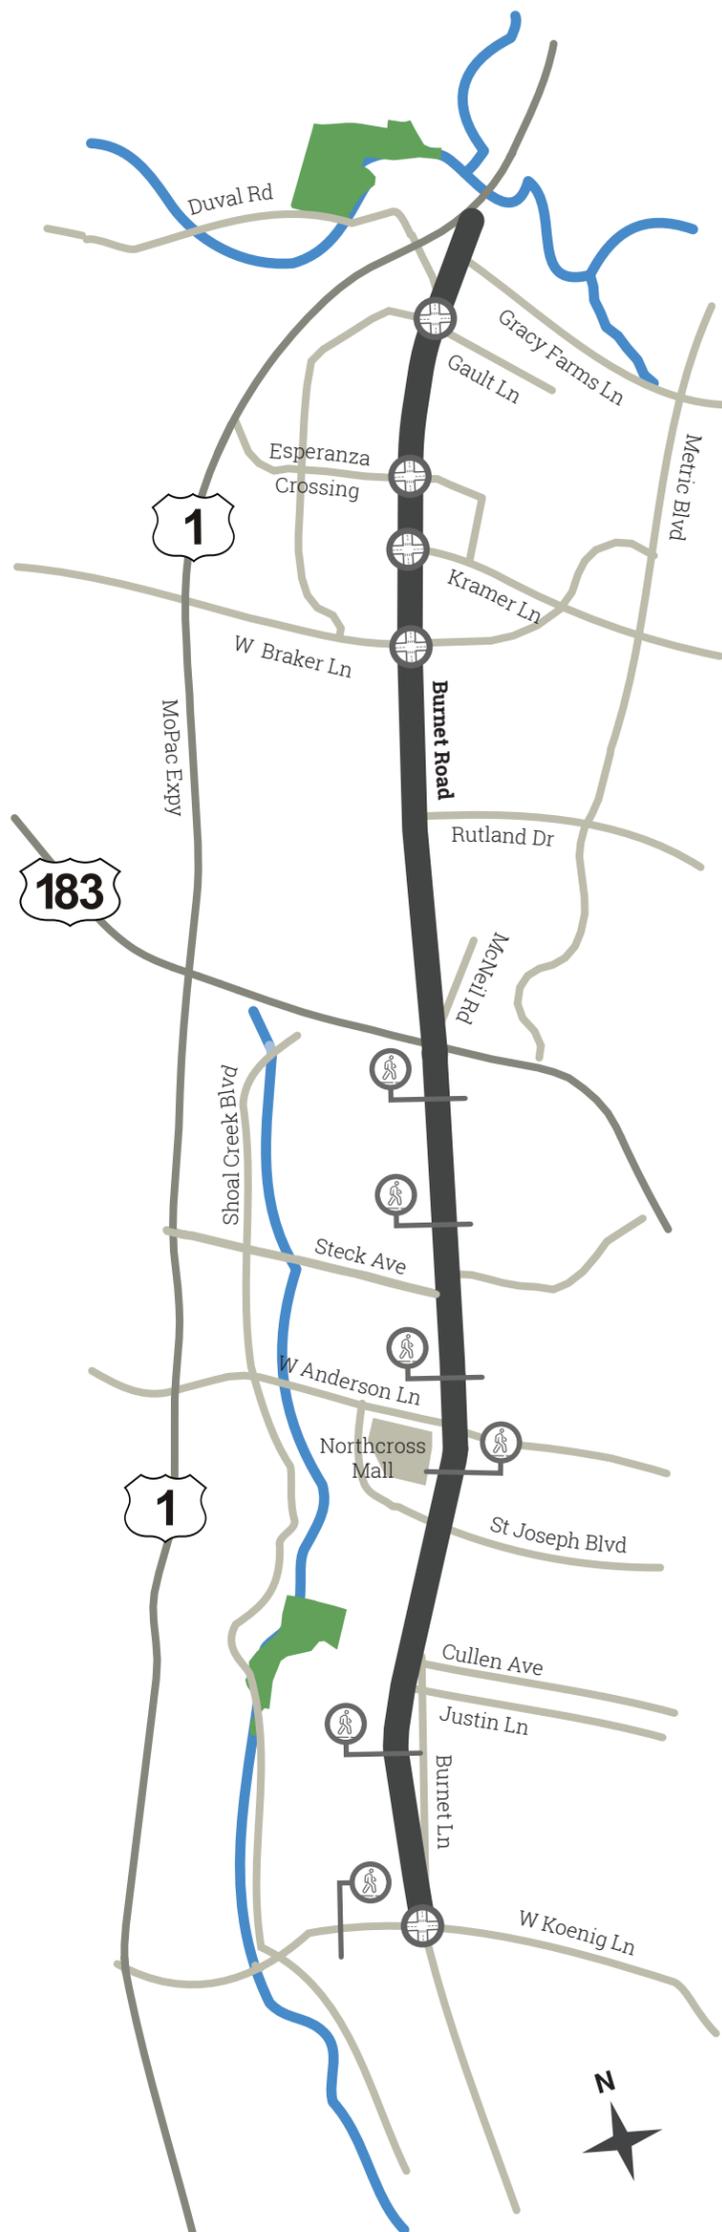

Evaluation and possible construction of new midblock pedestrian crosswalk signals (Pedestrian Hybrid Beacons) for cyclists and pedestrians in the vicinity of:

1. Allandale Rd/W Koenig Ln and White Rock Dr
2. Twin Oaks Dr
3. Northcross Mall
4. Ashdale Dr
5. Penny Ln/Doris Dr
6. South of US 183

A single improvement may benefit multiple transportation modes.

- Vehicular
- Pedestrian
- Bicycle
- Transit

Corridor Limits

NOTE: All recommendations are approximate, proposed, and subject to change. The exact locations of improvements will be determined in the Project Design Phase and the City will work with the community prior to project construction.

For more information and a complete list of proposed enhancements, visit AustinTexas.gov/CorridorMobility

EAST MLK JR BLVD/FM 969 US 183 to Decker Lane

MOBILITY, SAFETY, AND CONNECTIVITY IMPROVEMENTS

The list below is what is proposed for the East MLK Jr. Boulevard/FM 969 corridor using 2016 Mobility Bond funds. The City will design and construct improvements that will enhance mobility, safety, and connectivity from US 183 to Decker Lane.

Design and Construction

Up to 3 traffic signal improvements with enhanced technology to promote vehicular and transit efficiency, and pedestrian and bicyclist safety

Intersection improvements with turn lane modifications at Decker Ln to enhance vehicular and transit efficiency, and pedestrian and bicyclist safety

Up to 3.5 miles of new shared-use paths to create continuous ADA-compliant sidewalks along length of corridor

Sidewalks across the bridge over Walnut Creek will be expanded in both directions to provide safer crossings for drivers, pedestrians, and bicyclists

Widening the existing at-grade Capital MetroRail crossing near Sendero Hills Pkwy to enhance pedestrian and bicyclist safety

New street lighting at Decker Ln to improve visibility and enhance safety

New connections to Walnut Creek Trail for bicyclists and pedestrians

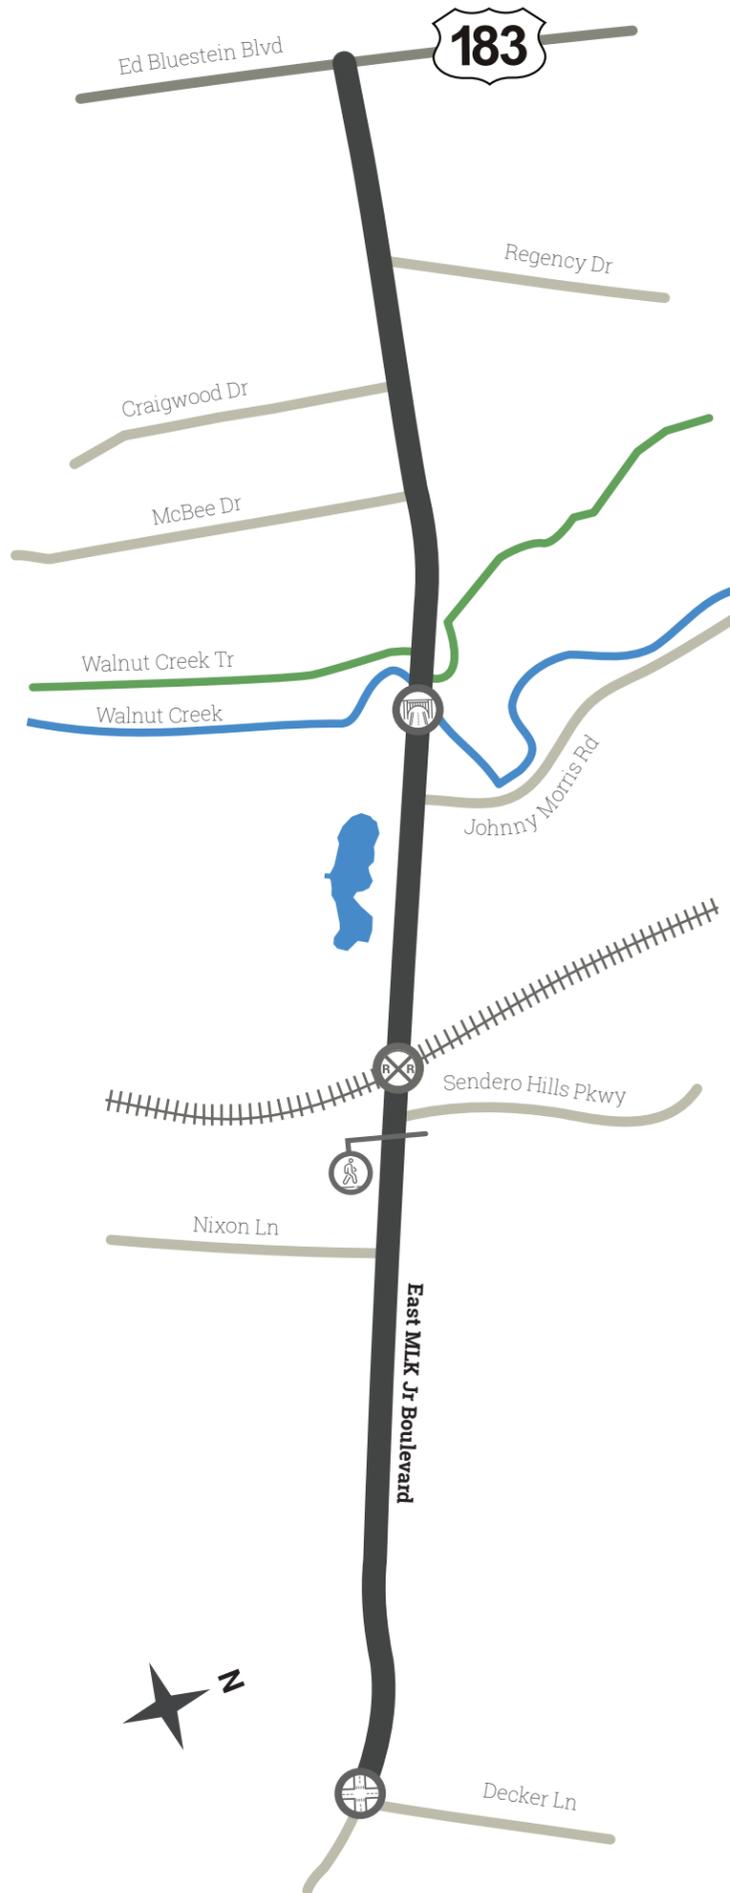

New speed ramps at Walnut Creek bridge to enhance bicyclist safety

New signalized crosswalk in the vicinity of Sendero Hills Pkwy to enhance safety for pedestrians and bicyclists

A single improvement may benefit multiple transportation modes.

	
	
 Corridor Limits	

NOTE: All recommendations are approximate, proposed, and subject to change. The exact locations of improvements will be determined in the Project Design Phase and the City will work with the community prior to project construction.

East Riverside Drive I-35 to SH 71

/ATXTRANSPORTATION

@AUSTINMOBILITY

@AUSTINTEXASGOV

MOBILITY, SAFETY, AND CONNECTIVITY IMPROVEMENTS

The list below is what is proposed for the East Riverside Drive corridor using 2016 Mobility Bond funds. The City will design and construct improvements that will enhance mobility, safety, and connectivity from I-35 to SH 71.

Additionally, design and construction will occur on multimodal enhancements between Shore District Drive and Montopolis Drive. This includes elements like full street reconstruction to extend the life of the roadway; bike lanes that are protected from vehicular traffic; intermittent median islands for safety; and streetscape enhancements.

Volume III: Corridor Construction Program

Design and Construction

- 

Up to 14 traffic signal improvements with enhanced technology to promote vehicular and transit efficiency, and pedestrian and bicyclist safety
- 

Intersection improvements with turn lane modifications to enhance vehicular and transit efficiency, and pedestrian and bicyclist safety at:

 1. I-35
 2. Willow Creek Dr
 3. S Pleasant Valley Rd
 4. Montopolis Dr
- 

Up to 3 miles of full pavement reconstruction and/or rehabilitation to repair spot damage, restore surface, and improve rideability
- 

Bridge widenings at Country Club Creek to provide safer crossings for drivers, pedestrians, and bicyclists
- 

Intermittent median islands at various locations to improve vehicular and transit efficiency, and safety for everyone
- 

Evaluation and possible construction of new or reconfigured midblock pedestrian crosswalk signals (Pedestrian Hybrid Beacons) for cyclists and pedestrians in the vicinity of:

 1. Summit St
 2. Willow Hill Dr
 3. S Pleasant Valley Rd
- 

On-corridor stormwater drainage upgrades from Shore District Dr to Montopolis Dr to support mobility improvements

- 

Up to 4 miles of protected bicycle lanes from Shore District Dr to Montopolis Dr to improve safety and mobility for bicyclists and drivers
 - 

New street lighting from Shore District Dr to Montopolis Dr to improve visibility and enhance safety
 - 

Streetscape enhancements with elements like banners, aesthetic treatments, hardscaping, landscaping, etc.
 - 

Up to 4.5 miles of new or rehabilitated sidewalks to create continuous ADA-compliant sidewalks along length of corridor, with wider sidewalks from Shore District Dr to Montopolis Dr
- A single improvement may benefit multiple transportation modes.

NOTE: All recommendations are approximate, proposed, and subject to change. The exact locations of improvements will be determined in the Project Design Phase and the City will work with the community prior to project construction.

Guadalupe Street

18th Street to 29th Street;
Includes West 24th Street from
North Lamar Boulevard to Guadalupe Street

/ATXTRANSPORTATION

@AUSTINMOBILITY

@AUSTINTEXASGOV

MOBILITY, SAFETY, AND CONNECTIVITY IMPROVEMENTS

The list below is what is proposed for the Guadalupe Street corridor using 2016 Mobility Bond funds. The Guadalupe Street corridor includes Guadalupe Street from 18th Street to 29th Street, and some adjacent street segments. The City will design and construct improvements that will enhance mobility, safety, and connectivity.

Design and Construction

Up to 3 traffic signal improvements with enhanced technology to promote vehicular and transit efficiency, and pedestrian and bicyclist safety along Guadalupe St:

- MLK Jr Blvd
- 24th St
- Dean Keeton St

Up to 4.5 miles of new or rehabilitated sidewalks to fill in gaps and create continuous ADA-compliant sidewalks:

- Along Guadalupe St from MLK Jr Blvd to W 29th St
- Along Nueces St from 24th St to Guadalupe St
- Between Guadalupe St and San Antonio St/ Nueces St on 21st St, 22nd St, 23rd St, 24th St, 25th St, 26th St, 27th St and 28th St

Up to 1.5 miles of pavement rehabilitation along 24th St and Nueces St to repair spot damage, restore surface, and improve rideability

Addition of transit operational enhancements on Guadalupe St from 18th St to MLK Jr Blvd

New street lighting to improve visibility and enhance safety:

- Guadalupe St from 18th St to 29th St
- 24th St from Guadalupe St to North Lamar Blvd

Along 24th St between Lamar Blvd and Guadalupe St:

- A new continuous, dedicated center turning lane to improve traffic flow and enhance safety for drivers, bicyclists, and pedestrians
- A dedicated bicycle lane to improve safety and mobility for bicyclists and drivers
- These additions are made possible by repurposing one travel lane in each direction

Restripe Nueces St from one way to two-way traffic to enhance traffic flow in and around Guadalupe St

A single improvement may benefit multiple transportation modes.

- Vehicular
- Pedestrian
- Bicycle
- Transit
- Corridor Limits

NOTE: All recommendations are approximate, proposed, and subject to change. The exact locations of improvements will be determined in the Project Design Phase and the City will work with the community prior to project construction.

For more information and a complete list of proposed enhancements, visit AustinTexas.gov/CorridorMobility

**CORRIDOR
 MOBILITY
 PROGRAM**

This spring, Austin City Council will consider a Proposed Corridor Construction Program for approval. It will include recommendations for mobility, safety, and connectivity improvements on Guadalupe Street between 18th Street and 29th Street, including West 24th Street, as well as improvements on eight other corridors. Corridors are primary roadways in Austin's transportation network.

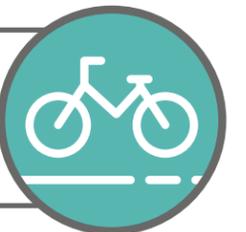

The recommendations came from the Guadalupe Street Corridor Mobility Plan, which was developed with the help of the community. The Corridor Mobility Plan is available at AustinTexas.gov/Guadalupe. Funding from the 2016 Mobility Bond will go to improvements for the Guadalupe Street corridor.

Those projects in the Proposed Corridor Construction Program that have been prioritized for design and construction will result in the biggest bang for the buck and meet other goals outlined in City Council's Contract With Voters.

Here's what you'll get:

Better traffic flow and reduced delay through intersection improvements, upgraded traffic signals, pavement rehabilitation, and intermittent median islands for safety.

Continuous bicycle lanes or shared-use paths along the full length of the corridor to improve safety and traffic flow.

Continuous ADA-compliant sidewalks along the full length of the corridor, with additional mid-block signalized pedestrian crossings.

Better traffic flow, reduced delay and enhanced connectivity through transit signal priority, and coordination with Capital Metro on strategic placement of transit stops.

The timing and delivery of improvements may be modified after Corridor Construction Program approval, as a variety of factors are being considered, such as geographic dispersion, potential leveraging opportunities, utility conflicts, and scheduling or construction risks. This is to ensure taxpayer dollars are used wisely and in a manner that achieves the desired outcomes expressed in the Contract With Voters.

All recommendations are at a conceptual/preliminary level. Additional project development, including design work, will begin after the Corridor Construction Program is approved by City Council. At that time, the City will work with the community, as well as property and business owners who may be affected. If you have questions about the Proposed Corridor Construction Program, contact Sara Behunek at corridors@austintexas.gov and (512) 974-7840.

North Lamar Boulevard

US 183 to I-35/Howard Lane

MOBILITY, SAFETY, AND CONNECTIVITY IMPROVEMENTS

The list below is what is proposed for the North Lamar Boulevard corridor using 2016 Mobility Bond funds. The City will design and construct improvements that will enhance mobility, safety, and connectivity from US 183 to I-35/Howard Lane. Design work will also begin on additional multimodal enhancements between Parmer Lane and Howard Lane for potential future construction. This includes elements like full street reconstruction to extend the life of the roadway; bike lanes that are protected from vehicular traffic; intermittent median islands for safety; and streetscape enhancements.

Design and Construction

- 

Up to 13 traffic signal improvements with enhanced technology to promote vehicular and transit efficiency, and pedestrian and bicyclist safety
- 

Intersection improvements with turn lane modifications to enhance vehicular and transit efficiency, and pedestrian and bicyclist safety at:

 1. Rundberg Ln
 2. W Braker Ln
 3. W Parmer Ln
- 

Up to 11.5 miles of new or rehabilitated sidewalks and shared-use paths to create continuous ADA-compliant sidewalks along length of corridor
- 

Up to 10 miles of new dedicated bicycle lanes to improve safety and mobility for bicyclists and drivers
- 

Up to 5.5 miles of pavement rehabilitation to repair spot damage, restore surface, and improve rideability
- 

New bridge construction and/or widenings to provide safer crossings for drivers, pedestrians, and bicyclists:

 1. US 183 northbound
 2. Walnut Creek
- 

Addition of a dedicated transit connection to Tech Ridge Park and Ride at W Howard Ln
- 

Intermittent median islands at various locations to improve vehicular and transit efficiency, and safety for all users

- 

On-corridor stormwater drainage upgrades from Rundberg Ln to W Howard Ln to support mobility improvements
 - 

Evaluation and possible construction of new midblock pedestrian crosswalk signals (Pedestrian Hybrid Beacons) for cyclists and pedestrians in the vicinity of:

 1. Meadowlark St
 2. Fairfield Dr

Design and Possible Construction

The City will begin design on the following projects for possible construction with 2016 Mobility Bond funding. Other funding sources and partnerships will be sought.

- Up to 1 mile of full street reconstruction between Parmer Ln and Howard Ln:
 - Wider sidewalks
 - Protected bicycle lanes
 - Enhanced streetscapes with elements like banners, aesthetic treatments, hardscaping, landscaping, trees, etc.
 - Street lighting
 - On-corridor stormwater drainage upgrades

NOTE: All recommendations are approximate, proposed, and subject to change. The exact locations of improvements will be determined in the Project Design Phase, and the City will work with the community prior to project construction.

For more information and a complete list of proposed enhancements, visit AustinTexas.gov/CorridorMobility

Program Phases

City staff anticipates bringing the Proposed Corridor Construction Program to City Council for consideration and approval in spring 2018. Once a Corridor Construction Program is approved, work will begin on the Project Design Phase. If modifications to the approved Corridor Construction Program become necessary, those changes will be communicated to City Council and the community.

DEVELOPMENT OF CORRIDOR MOBILITY PLANS

- Data collection and analysis, including crashes, traffic counts, and anticipated future transportation demand
- Development of mobility recommendations, like continuous sidewalks, bike lanes, and intersection improvements
- Public input through meetings and online
- Conceptual level design
- Corridor Mobility Plans are finalized

CORRIDOR CONSTRUCTION PROGRAM DEVELOPMENT PHASE

- Develop model to prioritize Corridor Mobility Plan recommendations as per the Contract With Voters
- Update Corridor Mobility Plan data to reflect current corridor conditions, plans, and policies
- Coordinate with various City of Austin departments and local agencies
- Conduct public outreach to inform community about existing Corridor Mobility Plans and prioritization process (pop-in meetings, online information, briefings to City Boards and Commissions, and civic groups)
- Conduct cost risk assessment and develop mitigation strategies
- Begin analyzing realities of implementation, like utility impacts, agency coordination, and geographic dispersion
- Prepare Proposed Corridor Construction Program

We are here: February 2018

CITY COUNCIL CONSIDERS PROPOSED CORRIDOR CONSTRUCTION PROGRAM

PROJECT DESIGN PHASE

- Conduct surveys to gather information about utilities, property lines, geotechnical analysis, etc.
- Development of traffic management plan to mitigate construction impacts
- Ongoing outreach to the community, City departments, and local agencies
- Continue analyzing realities of implementation
- Coordination with business and property owners to develop strategies to minimize construction impacts
- Finalize design
- Refine cost estimates, look for budget efficiencies, and explore leveraging/partnership opportunities
- Permitting for the projects
- Seek leveraging/other funding opportunities

BID/AWARD/EXECUTION PHASE

- Develop and announce bid/procurement opportunities for construction services
- City Council considers and approves construction contract awards

CONSTRUCTION PHASE

- Construction of corridor improvement projects to enhance mobility, safety, and connectivity
- Ongoing communication with affected stakeholders using multiple methods
- Mitigation of construction impacts

CORRIDOR MOBILITY PROGRAM

This spring, Austin City Council will consider a Proposed Corridor Construction Program for approval. It will include recommendations for mobility, safety, and connectivity improvements on North Lamar Boulevard between US 183 and I-35/Howard Lane as well as improvements on eight other corridors. Corridors are primary roadways in Austin's transportation network.

The recommendations came from the North Lamar Corridor Mobility Plan, which was developed with the help of the community. The Corridor Mobility Plan is available at AustinTexas.gov/NorthLamar. Funding from the 2016 Mobility Bond will go to improvements on North Lamar. Funds from the 2012 Bond Program will also be applied to the Burnet Road and North Lamar Boulevard corridors.

Those projects in the Proposed Corridor Construction Program that have been prioritized for design and construction will result in the biggest bang for the buck and meet other goals outlined in City Council's Contract With Voters.

Here's what you'll get:

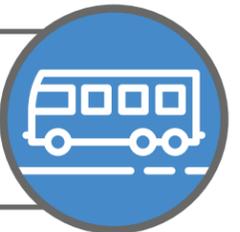

Better traffic flow and reduced delay through intersection improvements, upgraded traffic signals, pavement rehabilitation, and intermittent median islands for safety.

Continuous bicycle lanes or shared-use paths along the full length of the corridor to improve safety and traffic flow.

Continuous ADA-compliant sidewalks along the full length of the corridor, with additional mid-block signalized pedestrian crossings.

Better traffic flow, reduced delay and enhanced connectivity through transit signal priority, and coordination with Capital Metro on strategic placement of transit stops.

The timing and delivery of improvements may be modified after Corridor Construction Program approval, as a variety of factors are being considered, such as geographic dispersion, potential leveraging opportunities, utility conflicts, and scheduling or construction risks. This is to ensure taxpayer dollars are used wisely and in a manner that achieves the desired outcomes expressed in the Contract With Voters.

All recommendations are at a conceptual/preliminary level. Additional project development, including design work, will begin after the Corridor Construction Program is approved by City Council. At that time, the City will work with the community, as well as property and business owners who may be affected. If you have questions about the Proposed Corridor Construction Program, contact Sara Behunek at corridors@austintexas.gov and (512) 974-7840.

Slaughter Lane FM 1826 to Vertex Boulevard

MOBILITY, SAFETY, AND CONNECTIVITY IMPROVEMENTS

The list below is what is proposed for the Slaughter Lane corridor using 2016 Mobility Bond funds. The City will design and construct improvements that will enhance mobility, safety, and connectivity from FM 1826 to Vertex Boulevard.

Design and Construction

Up to 28 traffic signal improvements with enhanced technology to promote vehicular and transit efficiency, and pedestrian and bicyclist safety

Intersection improvements with turn lane modifications to enhance vehicular and transit efficiency, and pedestrian and bicyclist safety:

1. Escarpment Blvd
2. Brodie Ln
3. S Congress Ave/I-35

Up to 6 miles of new or rehabilitated sidewalks to create continuous ADA-compliant sidewalks along length of corridor

Up to 14 miles of dedicated or protected bicycle lanes to improve safety and mobility for bicyclists and drivers

A protected bicycle lane will be added in each direction between I-35 and Brandt Rd by repurposing one travel lane in each direction

Up to 3 miles of pavement rehabilitation to repair spot damage, restore surface, and improve rideability

Evaluation and possible construction of new midblock pedestrian crosswalk signals (Pedestrian Hybrid Beacons) for cyclists and pedestrians in the vicinity of:

1. Zuniga Dr
2. Briar Ridge Dr
3. Narrow Glen Pkwy
4. Orchard Ridge

A single improvement may benefit multiple transportation modes.

- Vehicular
- Pedestrian
- Bicycle
- Transit
- Corridor Limits

NOTE: All recommendations are approximate, proposed, and subject to change. The exact locations of improvements will be determined in the Project Design Phase and the City will work with the community prior to project construction.

South Lamar Boulevard

Riverside Drive to Ben White Boulevard/US 290 West

MOBILITY, SAFETY, AND CONNECTIVITY IMPROVEMENTS

The list below is what is proposed for the South Lamar Boulevard corridor using 2016 Mobility Bond funds. The City will design and construct improvements that will enhance mobility, safety, and connectivity from Riverside Drive to Ben White Boulevard/US 290 West. Additionally, design work will begin on multimodal enhancements between Panther Trail and US 290 for potential future construction. This includes elements like full street reconstruction to extend the life of the roadway; bike lanes that are protected from vehicular traffic; intermittent median islands for safety; and streetscape enhancements.

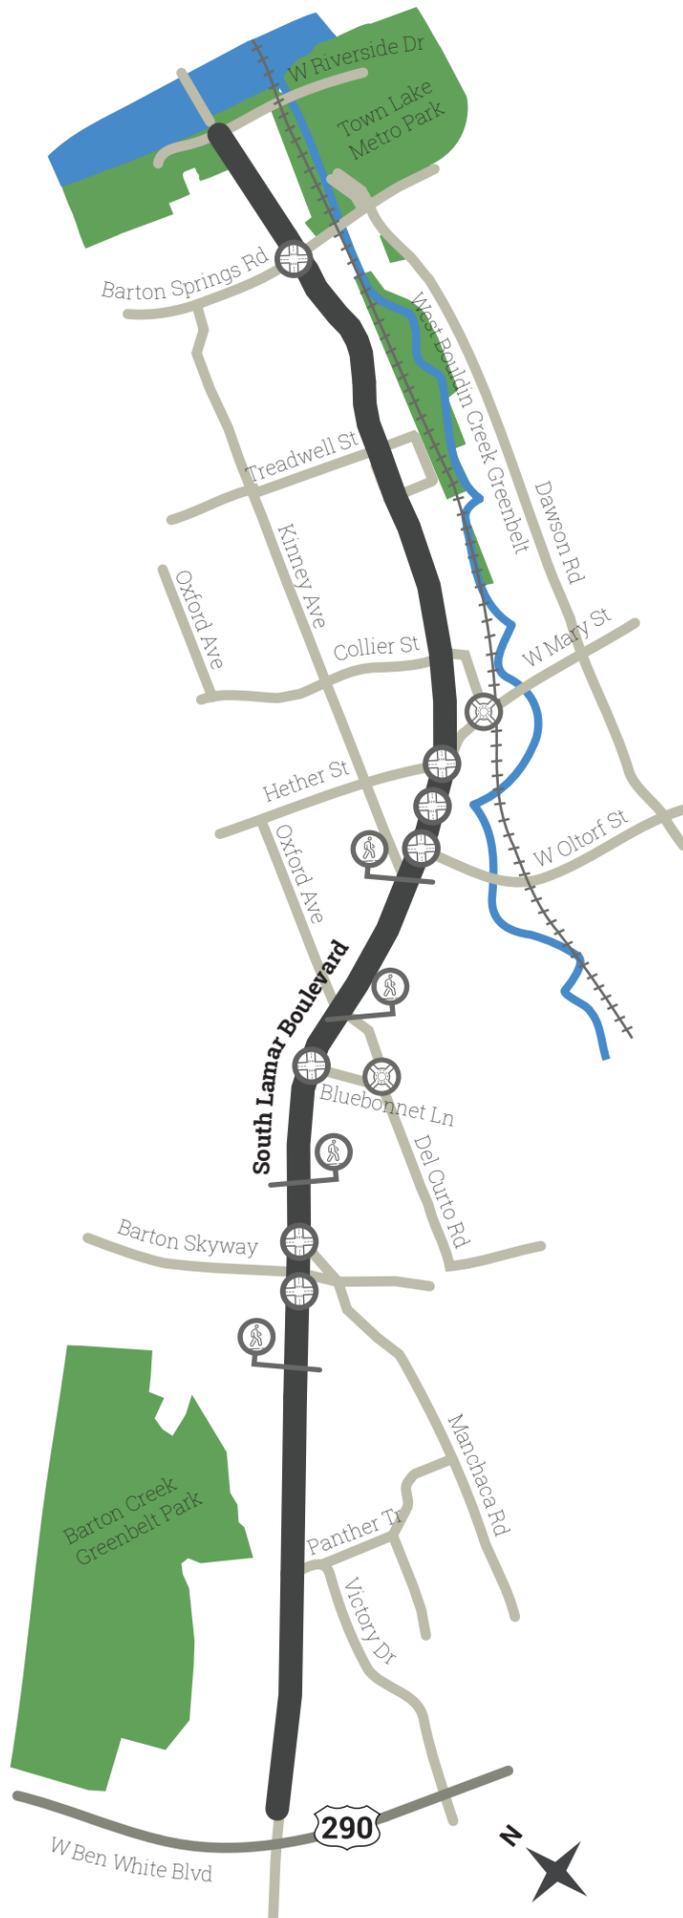

Design and Construction

- Up to 15 traffic signal improvements with enhanced technology to promote vehicular and transit efficiency, and pedestrian and bicyclist safety
- Intersection improvements with turn lane modifications to enhance vehicular and transit efficiency, and pedestrian and bicyclist safety at:

 1. Barton Springs Rd
 2. Hether St
 3. Oltorf St
 4. Mary St
 5. Bluebonnet Ln
 6. Barton Skyway
 7. Manchaca Rd
- Up to 3 miles of pavement rehabilitation to repair spot damage, restore surface, and improve rideability
- Evaluation and possible construction of new midblock pedestrian crosswalk signals (Pedestrian Hybrid Beacons) for cyclists and pedestrians in the vicinity of:

 1. West Oak Dr
 2. Dickson Dr
 3. Oxford Ave/Kinney Ave
 4. Post Apartments
- New roundabouts to increase safety and improve traffic at intersections:

 - Mary St/Evergreen Ave
 - Bluebonnet Ln/Del Curto Rd
- New bicyclist and pedestrian railroad crossing at Treadwell St to provide a safer connection to West Bouldin Creek Greenbelt
- Up to 6 miles of new or rehabilitated sidewalks and shared-use paths to create continuous ADA-compliant sidewalks along length of corridor

- New transit operational enhancements at:

 1. Manchaca Rd
 2. Lightsey Rd
 3. Bluebonnet Ln
 4. Oltorf St
 5. Barton Springs Rd
- Intermittent median islands at various locations to improve vehicular and transit efficiency, and safety for all users
- On-corridor stormwater drainage upgrades from Oxford Ave to Panther Tr to support mobility improvements
- Up to 6 miles of new or improved dedicated bicycle lanes to enhance safety and mobility for bicyclists and drivers
- A single improvement may benefit multiple transportation modes.

 - Vehicular
 - Bicycle
 - Pedestrian
 - Transit
 - Corridor Limits

Design and Possible Construction

The City will begin design on the following projects for possible construction with 2016 Mobility Bond funding. Other funding sources and partnerships will be sought.

- Up to half a mile of full street reconstruction between Panther Tr and US 290:

 - Wider sidewalks
 - Protected bicycle lanes
 - Enhanced streetscapes with elements like banners, aesthetic treatments, hardscaping, landscaping, trees, etc
 - Street lighting
 - On-corridor stormwater drainage upgrades

NOTE: All recommendations are approximate, proposed, and subject to change. The exact locations of improvements will be determined in the Project Design Phase and the City will work with the community prior to project construction.

William Cannon Drive Southwest Parkway to McKinney Falls Parkway

/ATXTRANSPORTATION

@AUSTINMOBILITY

@AUSTINTEXASGOV

MOBILITY, SAFETY, AND CONNECTIVITY IMPROVEMENTS

The list below is what is proposed for the William Cannon Drive corridor using 2016 Mobility Bond funds. The City will design and construct improvements that will enhance mobility, safety, and connectivity from Southwest Parkway to McKinney Falls Parkway.

Design work will also begin on additional enhancements between Brodie Lane and Manchaca Road, and between Running Water Drive and McKinney Falls Parkway, for potential future construction. This includes elements like road widening to add more travel lanes, enhanced landscaping with trees, additional stormwater drainage improvements, and additional traffic signal and intersection improvements.

Design and Construction

Up to 7 traffic signal improvements with enhanced technology to promote vehicular and transit efficiency, and pedestrian and bicyclist safety

Up to 18 miles of new or rehabilitated sidewalks to create continuous ADA-compliant sidewalks along length of corridor

Up to 5 miles of dedicated or protected bicycle lanes to improve safety and mobility for bicyclists and drivers

A protected bike lane will be added in each direction between US 290 and Southwest Pkwy by repurposing one travel lane in each direction

Up to 2 miles of pavement rehabilitation to repair spot damage, restore surface, and improve rideability

A new bridge over Marble Creek to provide two additional travel lanes for drivers and bicyclists, and sidewalks for pedestrians

Landscaping enhancements including new trees from Running Water Dr to McKinney Falls Pkwy

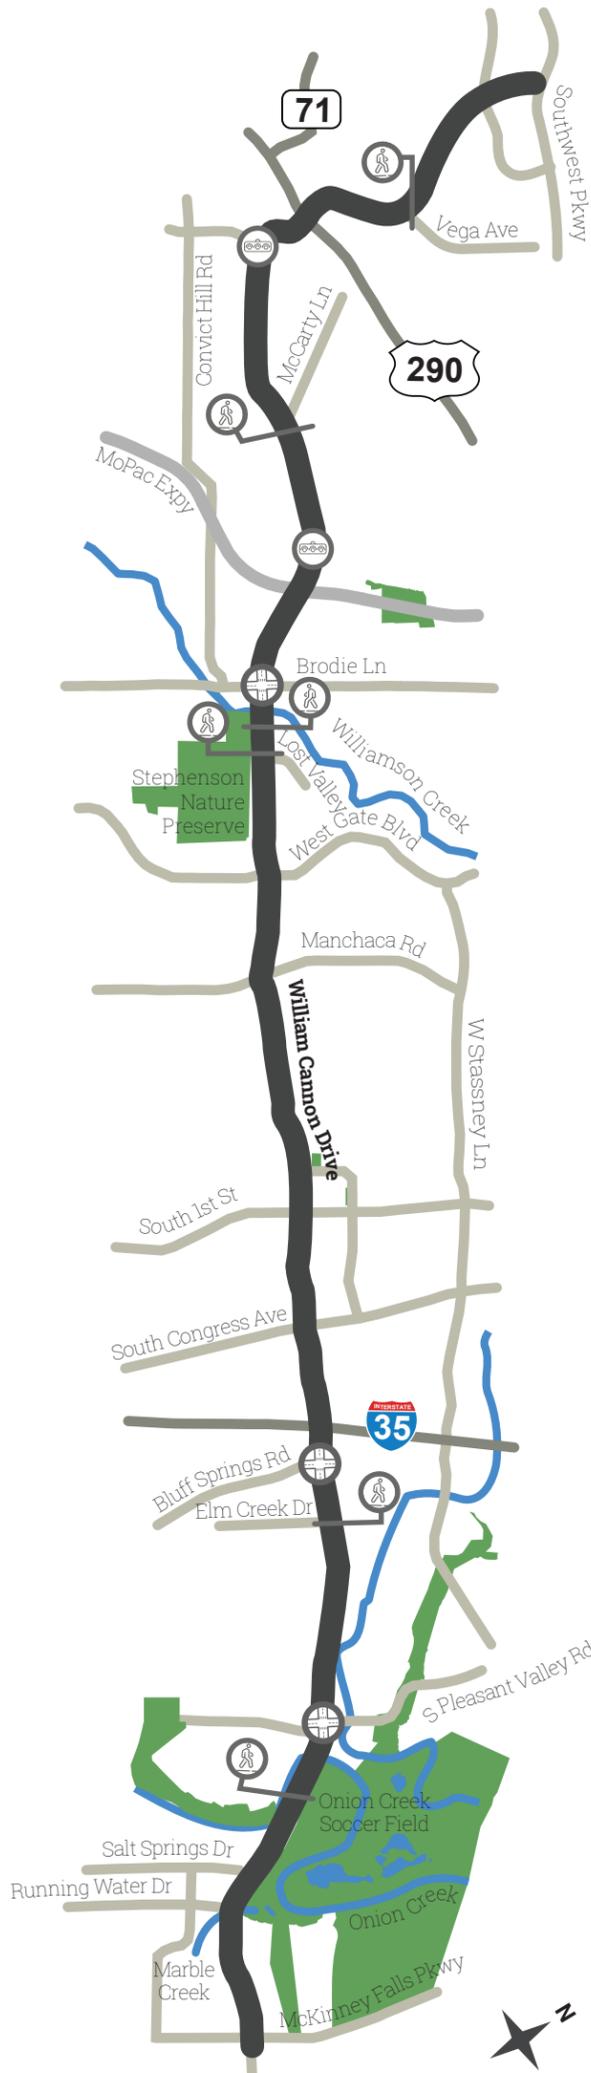

Intersection improvements with turn lane modifications to enhance vehicular and transit efficiency, and pedestrian and bicyclist safety:

1. Brodie Ln
2. S Pleasant Valley Rd
3. Bluff Springs Rd

On-corridor stormwater drainage upgrades from Running Water Dr to McKinney Falls Pkwy to support mobility improvements

Evaluation and possible construction of new midblock pedestrian crosswalk signals (Pedestrian Hybrid Beacons) for cyclists and pedestrians in the vicinity of:

1. Vega Ave
2. McCarty Ln
3. Lost Valley
4. Stephenson Nature Preserve
5. Elm Creek Dr
6. Rockridge Dr
7. Onion Creek Soccer Fields

A single improvement may benefit multiple transportation modes.

● Vehicular ● Bicycle
● Pedestrian ● Transit

■ Corridor Limits

Design and Possible Construction

The City will begin design on the following projects for possible construction with 2016 Mobility Bond funding. Other funding sources and partnerships will be sought.

Additional multimodal enhancements in some areas include:

- Roadway widening (from four lanes to six lanes) from Brodie Ln to Manchaca Rd, and from Running Water Dr to McKinney Falls Pkwy
- Enhanced landscaping, including trees
- Additional traffic signal and intersection improvements:
 1. Southwest Pkwy
 2. Rialto Blvd
 3. US 290
 4. Escarpment Blvd
 5. Beckett Rd
 6. Brush Country Rd
 7. MoPac Expy
 8. West Gate Blvd
 9. Manchaca Rd
 10. Emerald Forest Dr
 11. S 1st St
 12. S Congress Ave
 13. I-35
 14. Salt Springs Rd
- Additional on-corridor stormwater drainage upgrades from Brodie Ln to Manchaca Rd

NOTE: All recommendations are approximate, proposed, and subject to change. The exact locations of improvements will be determined in the Project Design Phase and the City will work with the community prior to project construction.

For more information and a complete list of proposed enhancements, visit AustinTexas.gov/CorridorMobility

William Cannon Drive

Southwest Parkway to McKinney Falls Parkway

Program Phases

City staff anticipates bringing the Proposed Corridor Construction Program to City Council for consideration and approval in spring 2018. Once a Corridor Construction Program is approved, work will begin on the Project Design Phase. If modifications to the approved Corridor Construction Program become necessary, those changes will be communicated to City Council and the community.

DEVELOPMENT OF CORRIDOR MOBILITY PLANS

- Data collection and analysis, including crashes, traffic counts, and anticipated future transportation demand
- Development of mobility recommendations, like continuous sidewalks, bike lanes, and intersection improvements
- Public input through meetings and online
- Conceptual level design
- Corridor Mobility Plans are finalized

CORRIDOR CONSTRUCTION PROGRAM DEVELOPMENT PHASE

- Develop model to prioritize Corridor Mobility Plan recommendations as per the Contract With Voters
- Update Corridor Mobility Plan data to reflect current corridor conditions, plans, and policies
- Coordinate with various City of Austin departments and local agencies
- Conduct public outreach to inform community about existing Corridor Mobility Plans and prioritization process (pop-in meetings, online information, briefings to City Boards and Commissions, and civic groups)
- Conduct cost risk assessment and develop mitigation strategies
- Begin analyzing realities of implementation, like utility impacts, agency coordination, and geographic dispersion
- Prepare Proposed Corridor Construction Program

CITY COUNCIL CONSIDERS PROPOSED CORRIDOR CONSTRUCTION PROGRAM

PROJECT DESIGN PHASE

- Conduct surveys to gather information about utilities, property lines, geotechnical analysis, etc.
- Development of traffic management plan to mitigate construction impacts
- Ongoing outreach to the community, City departments, and local agencies
- Continue analyzing realities of implementation
- Coordination with business and property owners to develop strategies to minimize construction impacts
- Finalize design
- Refine cost estimates, look for budget efficiencies, and explore leveraging/partnership opportunities
- Permitting for the projects
- Seek leveraging/other funding opportunities

BID/AWARD/EXECUTION PHASE

- Develop and announce bid/procurement opportunities for construction services
- City Council considers and approves construction contract awards

CONSTRUCTION PHASE

- Construction of corridor improvement projects to enhance mobility, safety, and connectivity
- Ongoing communication with affected stakeholders using multiple methods
- Mitigation of construction impacts

This spring, Austin City Council will consider a Proposed Corridor Construction Program for approval. It will include recommendations for mobility, safety, and connectivity improvements on William Cannon Drive between Southwest Parkway and McKinney Falls Parkway as well as improvements on eight other corridors. Corridors are primary roadways in Austin's transportation network.

The recommendations came from development of the William Cannon Drive Corridor Mobility Plan, which will be finalized in early 2018. More information about the William Cannon Drive Corridor Mobility Plan is available at AustinTexas.gov/WilliamCannon. Funding from the 2016 Mobility Bond will go to improvements on William Cannon Drive.

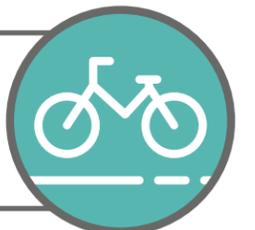

Those projects in the Proposed Corridor Construction Program that have been prioritized for design and construction will result in the biggest bang for the buck and meet other goals outlined in City Council's Contract With Voters.

Here's what you'll get:

Better traffic flow and reduced delay through intersection improvements, upgraded traffic signals, pavement rehabilitation, and intermittent median islands for safety.

Continuous bicycle lanes or shared-use paths along the full length of the corridor to improve safety and traffic flow.

Continuous ADA-compliant sidewalks along the full length of the corridor, with additional mid-block signalized pedestrian crossings.

Better traffic flow, reduced delay and enhanced connectivity through transit signal priority, and coordination with Capital Metro on strategic placement of transit stops.

The timing and delivery of improvements may be modified after Corridor Construction Program approval, as a variety of factors are being considered, such as geographic dispersion, potential leveraging opportunities, utility conflicts, and scheduling or construction risks. This is to ensure taxpayer dollars are used wisely and in a manner that achieves the desired outcomes expressed in the Contract With Voters.

All recommendations are at a conceptual/preliminary level. Additional project development, including design work, will begin after the Corridor Construction Program is approved by City Council. At that time, the City will work with the community, as well as property and business owners who may be affected. If you have questions about the Proposed Corridor Construction Program, contact Sara Behunek at corridors@austintexas.gov and (512) 974-7840.
