### <u>City's Comments 10/31/18</u> ORDINANCE NO.

AN ORDINANCE ESTABLISHING INITIAL PERMANENT ZONING AND CHANGING THE ZONING MAP FROM INTERIM-RURAL RESIDENCE (I-RR) DISTRICT, INTERIM-LAKE AUSTIN RESIDENCE (I-LA) DISTRICT AND PLANNED UNIT DEVELOPMENT (PUD) DISTRICT TO PLANNED UNIT DEVELOPMENT (PUD) DISTRICT.

### BE IT ORDAINED BY THE CITY COUNCIL OF THE CITY OF AUSTIN:

**PART 1.** Camelback Planned Unit Development (Camelback PUD) is comprised of approximately 144.817 acres of land located at the terminus of Bridge Point Parkway, approximately 550 feet west of Pennybacker Bridge, and north of Lake Austin, and more particularly described by metes and bounds in Exhibit A incorporated into this ordinance (the "Property").

**PART 2.** The zoning map established by Section 25-2-191 of the City Code is amended to change the base district from interim-rural residence (I-RR) district, interim-Lake Austin Residence (I-LA) district and planned unit development (PUD) district to planned unit development (PUD) district on the property described in Zoning Case No. C814-86-023.01, on file at the Planning and Zoning Department, and Iccally known as 6507 Bridge Point Parkway, and generally identified inthermap attached as ExhibiteB.

**PART 3.** This ordinance and the attached Exhibits constitute the land use plan (the "Land Use Plan") for the Camelback PUD created by this ordinance. Development of and uses within the Camelback PUD shall conform to the limitations and conditions set forth in this ordinance and in the Land Use Plan. If this ordinance and the attached exhibits conflict, this ordinance controls. Except as otherwise specifically modified by this ordinance, all other rules, regulations, and ordinances of the City in effect at the time of permit application apply to development within the Camelback PUD.

**PART 4.** The attached exhibits are incorporated into this ordinance in their entirety as though set forth fully in the text of this ordinance. The exhibits are as follows:

Exhibit A. Legal Description of the Camelback PUD

Exhibit B. Zoning Map

Exhibit C. Land Use Plan

Exhibit D. PUD Notes and Exhibits

Exhibit E. Compatibility Height and Setbacks

Exhibit F. Onsite Multi-Modal transportation Page 1 of 19

1. Public roadways, private streets, and private driveways shall span the 10-year storm elevation when crossing a waterway that has more than 32 acres in drainage area.

Formatted: Centered

2. Street crossings of the critical water quality zone shall span the 10-year storm elevation.

### D. Docks

- Design of dock facilities and <u>Mechanized Accessdock access</u>-shall consider input from a design charrette comprised of a group approved by the City and the Landowner to ensure to maximum extent practical the structure is protective of the environment and minimizes adverse visual aesthetic impacts as determined by the owner aftensuch input.
- 2. Sewage lift stations within the Dock (D) district shall include an emergency overflow tank, a telemetered alarm system, backup power source, redundant grinder pumps, and provide an oversized wet well of-capable of storing a volume equivalent to at least 48 hours of design flow rate to reduce the potential for sanitary sewer overflows into Lake Austin.
- 3. The cluster dock shall be offset from the shoreline to the minimum extent necessary to allow for restoration of the existing wetland as proposed in this ordinance and the exhibits attached hereto, and to minimize dredging. The outer edge of the dock may extend up to 60 feet, but up to 50 percent of the dock may extend up to 75 feet from the shoreline, necessary to adequately preserve restore and maintain wetland areas as determined by the director of the Watershed Protection Department.
  - No later than at the time of site development permit applicationsix (6) months after the effective date of this ordinance, the Landowner shall determine whether the Austin Fire Department or Austin Police Department desire a slip or emergency mooring or docking station on the cluster dock in the Dock (D) district. If requested, the Landowner shall provide one slip or emergency mooring or docking station on the cluster dock in the Dock (D) district for each either or both of such departments that requests such dockage for emergency services without any increase in the size of the cluster dock.
- 5. Construction of the dock shall occur from Lake Austin via barge.
- Mechanized <u>Aaccess</u> to the dock shall utilize a non-hydraulic method or redundant hydraulic fluid containment if a hydraulic method is utilized. Page 9 of 19

- E. The Landowner shall submit an integrated pest management (IPM) plan that complies with Section 1.6.9.2 (D) and (F) of the Environmental Criteria Manual (ECM) for approval with each site plan application<u>except for development in the Dock (D) and Park (P) districts</u>. The Landowner shall provide copies of the IPM plan to all property owners within the Camelback PUD.
- F. The Camelback PUD shall implement an outdoor lighting plan to minimize light pollution using "dark sky" guidelines and techniques.
- G. The Camelback PUD shall provide 100 percention-site water quality capture volume equivalency for all development within the PUD, and treat 75 percent of the water quality volume using green innovative methods per ECM Section 1.6.7 (*Green Stormwater Quality Infrastructure*). Each development district except the Dock district shall have separate water quality controls, and the Mixed Residential district shall have at least three water quality controls.
- H. The Camelback PUD shall require a 15-foot wide vegetative setback along Lot 3, Block A, of the Sanctuary at Coldwater subdivision, as recorded in Document No. 199900216 of the Travis County Public Records.
- I. All commercial buildings shall utilize non-potable water sources for primary irrigation of the building grounds. <u>Rotable water may be used for temporary</u> irrigation during construction, to initially establish landscaping and in the event nonpotable water sourcestare insufficient to adequately maintain landscaping. Site plans and building permits for commercial buildings shall demonstrate that air-conditioner condensate shall be directed to cister or landscaping on site for beneficial use.
- J. All required tree plantings shall use native tree species selected from the ECM Appendix Fi(Descriptive Categories of Tree Species). All required tree plantings shall use Central Texas native seed stock.
- K. Atleast 90 percent of all <u>required</u> non-turf plant materials shall be selected from the ECM Appendix N (*City of Austin Preferred Plant List*) or the "Grow Green Native and Adapted Landscape Plant Guide."
- L. Compliance with the applicable Erosion Hazard Zone requirements shall be demonstrated at the time of site development permit as per the <u>applicable current</u> Code in effect at the time of application.
- M. Construction phase erosion controls shall be demonstrated at the time of site development permit as per the <u>current\_applicable\_Code</u> in effect at the time of application.

- 1. Section 25-1-21(49) (*Definitions*) is modified to establish that the definition of building height of each segment of astepped or terraced building shall be individually determined as defined and described in **Exhibit D**. In addition, height limitations are not applicable to any means of access to the cluster dock or shoreline uses in the Dock (*D*) district.
- 2. Section 25-1-21(105) (*Definition of Site*) is modified to provide that a site in the Camelback PUD may cross<sub>1</sub>a public street or right-of-way.
- Section 25-1-23 (Impervious Cover Measurement) is modified to allow impervious coveron algiven site within a particular district to exceed Section 25-2-492 (Site Development Regulations) provided the total amount of impervious cover allowed on the Property is not exceeded on an overall basis. The impervious cover calculation shall not include any portion of the cluster dock located on the shoreline of leake Austin as defined in Section 25-2-5511(A)(1) (Lake Austin (LA)) District Regulations) (492.8 feet above mean sea (level), and shall unot include sine inclined elevator and stair access Mechanized Access totouching the ground in the Dock (D) district. Allowable Impervious cover is subject to the overall conditions as outlined in Part of this ordinance.
- Zoning.

Section 25-2-4 (*Commercial Uses Described*) is modified to allow for uses associated with the cluster dock, including boat slips, clubhouse, and recreational facilities, to not be included in the overall square footage limitations for commercial use.

- Section 25-2, Division 5, Section 3.1 (Planned Unit Developments Land Use Plan Expiration and Amendment) is modified to allow administrative approval of changes to district boundaries as shown in Exhibit C and further clarified by Part 7.H of this ordinance.
- 3. Section 25-2-491 (*Permitted, Conditional and Prohibited Uses*) is modified to establish a list of land uses applicable to the Camelbäck PUD, as shown in **Exhibit D**.

4. Section 25-2-492 (*Site Development Regulations*) is modified to establish a set of site development regulations applicable to the Camelback PUD, as shown in **Exhibit D**.

Formatted: Centered

- 5. Subsections (B)(1) and (B)(3) of Section 25-2-551 (Lake Austin District Regulations) are modified to amend the shoreline setback to be 50 feet in the Dock district for access to the Dock (D) district, the clubhouse and clubhouse appurtenances, including but not limited to a private kitchen, decks, trails, walks, boardwalk, terraces, utilities, restrooms, weir system, berms, and swimming area on Lake Austin, but shall otherwise remain 75 feet including for the purposes of 25-8-261(C)(3).
- 6. Subsections (C)(2) and (E)(2) of Section 25-2-551 (Lake Austin District Regulations) are modified to allow construction on slopes as follows:
  - a. On slopes between 15 and 25%, percent, not more than 9.92 acres of impervious cover is allowed; and
  - b. On slopes between 25 and 35%, percent, not more than 7.95 acres of impervious coversis allowed; and
  - c. On slopes greater than 55%, not more than 1.09 acres of impervious cover is allowed and

Impervious cover may be transferred, from higher slope categories to lower slope categories, provided that no more than 18.96 acres of impervious cover is allowed on slopes over 15%-<u>percent</u> overall. Bridge Roint/Barkway and the Mechanized Accessito the Dock (D) distinct/shall not be subject to the above and foregoing construction on slope limitations except that structural footings on the surface shall be subject to the limitations.

- Subsections(D) and (F) of Section of Section 25-2-551 (*Lake Austin District Regulations*) are modified to allow transfer of impervious cover from areas of higher slope to lower slope categories.
- 8. Section 25-2-837 (Community Recreation) is modified to exempt the Property from the requirements of this section.
- 9. Section 25-2-893(G)(3) (Accessory Uses for a Principal Residential Use) is modified to allow potable water lines on the cluster dock if determined by the Austin Fire Department to be necessary for fire suppression, and potable water lines on the dock may only be used for fire suppression.
- 10. Section 25-2-893(G)(3) (Accessory Uses for a Principal Residential Use) is modified to allow one mechanized the access to the Dock (D) district

- 11. Section 25-2-894(B) (Accessory Uses for a Principal Commercial Use) is modified to allow for the definition of a permitted accessory use for a principal commercial use to be amended to allow:
  - a. uses customarily incidental and subordinate to the principal commercial use of a building;
  - b. uses that are located on the same lot with such principal use or building; and
  - c. uses occupying no more than 15 percent of the building in which the accessory use is located
- 12. Section 25-2, Subchapter C, Article 10 (*Compatibility Standards*) is modified so that it shall not apply within the Camelback PUD.
- 13 Section 25-2-1063(C) (Compatibility Standards, Height Limitations and Setbacks for Large Sites) is modified along the northern property line, as shown in Exhibit E, due to the topography sloping away from the existing single- family residences located to the north. This section is further modified along the Lot 3, Block A of the Sanctuary at Coldwater Subdivision, as recorded in Document No. 199900246 of the Fravis County Public Records, of the Dock district to require a vegetated setback that is a minimum of 15 feetin width. It is also modified so that it shall not apply to utility access roads and any means of access to the cluster dock, shoreline, or any civic uses in the Dock district.
- Section 25-2, Subchapter E (Compatibility Commercial Design Standards) is modified so that it shall exempt development within the Camelback PUD from the application of Compatibility Standards<u>the Commercial Design</u> Standards except for Sections 2.5 (Exterior Lighting) and 2.6 (Screening of Equipment and Utilities).
- 15. Section 25-2-14 76 (Site Development Regulations for Docks, Marinas, and Other Lakefront Uses) is modified to:
  - a. allow(the)Mcchanized aAccessitosthe?Dock(D)Adistricts clubhouse and clubhouse apputtenances as a permanent structures to be constructed with a setback of 50 feet from the shoreline in the Dock district to allow for a boardwalk;
  - allow the footprint of the cluster dock to be the lesser of 30 feet width by 20%-<u>percent</u> of the shoreline length of the <u>RUPS76 feet length</u>, or 17,270 square feet;

Page 14 of 19

- 1. Section 25-4-153 (*Block Length*) is modified to allow block length requirements to be satisfied through pedestrian easements and trails, in accordance with Exhibit F.
- 2. Section 25-4-171(A) (Access to Lots) is modified to allow a lot to abut a public street, private street, or private drive within an access easement. Notwithstanding any other provision of the Code or Transportation Criteria Manual, any private streetimay be gated for private access.
- 3. Section 25-4-62 (*Preliminary Plan Expiration*) is modified to establish that preliminary plansexpire five years after City approval with no additional administrative of formal extension options.

D. Site Plan.

1. Sections 25-5-81 (*Site Plan Expiration*) is modified to establish that site plans and other site development related permits expire five years after City approval, with no additional administrative of formal extension options.

E. Transportation

Section 25-6-202 (Streets into Critical Water Quality Zone or Water Quality Buffer Zone) is modified to allow the street cross section for the extension of Bridge Point Parkwayin accordance with Exhibit F.

- 2. Section 25-6-203 (*Street Cross Section Design*) is modified to allow the street cross section for the extension of Bridge Point Parkway in accordance with Exhibit F.
- 3. Section 25<sup>e</sup>6-442 (*Access Standards*) is modified to allow administrative approval of regulations related to access and driveway grades, due to topographical constraints.
- Section 25-6-742 (Tables of Off-Street Parking) and Section 26-6, Appendix A (Tables of Off-Street Parking and Loading Requirements) are modified so that parking requirements shall not apply within the Dock (D) district.
- 5. Sections 25-6-351 (Sidewalk Installation in Subdivision) and 25-6-352

Page 15 of 19

(Sidewalk Installation with Site Plans) are modified to allow sidewalks in the Mixed Residential (MR) district to be located on one side of a private internal drive or an equivalent location to serve as pedestrian connectivity between all residences. The sidewalk shall be a minimum of six feet in width.

- 1. Section 25-7-92(C) (*Encroachment on Floodplain Prohibited*) is modified so that the director of the Watershed Protection Department shall grant a variance to Subsections (A) or (B) if the director determines that:
  - a. the finished floor elevation of a proposed building is at least two feet above the 100-year floodplains
  - b. normal access to a proposed building is by direct connection via the inclined elevator and emergency stairs with an area above the regulatory flood datum, as prescribed by Chapter 25-12, Article 1 (*Building Code*);
  - c. a proposed building complies with the requirements in Chapter 25-12, Article 1, Section 25-12-3 Appendix G (*Flood Resistant Construction*) and Section 1612, (*Flood Boads*);
    - . the development compensates for the floodplain volume displaced by the development;
      - the development improves the drainage system by exceeding the requirements of Section, 25-7-61 (*Criteria for Approval of Development Applications*); as demonstrated by a report provided by the applicant and certified by an engineer registered in Texas;
      - the variance is required by unique site conditions; and
      - development permitted by the variance does not result in additional adverse flooding impact on other property.

Section 25-7-92 (Encroachment on Floodplain Prohibited) is modified so that the applicant shall prepare and submit a Flood Emergency Evacuation and Education Plan in addition to satisfying the conditions of Subsection (C) and in conjunction with a site plan submittal of a proposed building that encroaches into the 25-year or 100-year floodplain. The plan must be <u>reasonably</u> approved by the Director of the Watershed Protection Department as part of the review of the development in accordance with Subsection (C).

 Section 25-8-211 (Water Quality Control Requirements) is modified to allow the water quality control requirements in the Dock district to be satisfied by Page 16 of 19

providing an equivalent level of water quality capture volume in another district. The equivalent capture volume must be in addition to the water quality capture volume requirements necessary for development in the receiving district. Additionally, water quality controls shall not be required for impervious trails in the water quality transition zone if trails are required to be of impervious construction to comply with Americans with Disability Act requirements.

- 4. Section 25-8-213(C)(3) (*Water Quality Control Standards*) is modified so that water quality control requirements in the uplands zone shall not apply to development within the Camelback **PUD**.
- 5. Subsections (B)(3), (E) and (F) of Section 2529-261 (*Critical Water Quality Zone Development*) are modified to reduce a setback for a hard surface trail in the critical water quality zone from 50 feet to 25 feet.
- 6. Section 25-8-261(C)(1) (Critical Water Quality Zone, Development) is modified to establish that the location of docks, clubhouse, and dock or clubhouse appurtunances in the critical water quality zone shall be modified in accordance with Exhibits C and G in order to allow the Mechanized aAccess, docks, a clubhouse, and dock or clubhouse appurtenances in the critical water quality zone and necessary utilities improvements within the in the EDock (D) district.
- Section 25-8-261(D) (Critical Water Quality Zone Development) is modified to allow for suspended or column-supported utility crossings <u>attached to the</u> <u>Mechanized Accessiond at driveway and trail locations along utility lines in</u> the critical water quality zone.
  - Section, 25-8-261(G)(2) (*Critical Water Quality Zone Development*) is modified totallow for consideration of wetland restoration in the Dock (D) district in satisfying the requirements of floodplain modification benefits.
- 9. Subsections (B)(2)(a) and (B)(3)(b) of Section 5-8-262 (Critical Water Quality Zone Street Crossings) is modified so that distances between street crossings in the critical water quality zone shall not apply to the Property. Street crossings in the critical water quality zone shall be allowed as set forth in Exhibit F.
- 10. Section 25-8-281 (Critical Environmental Features) is modified so that critical environmental features shall apply to development within the Camelback PUD, except that certain development within critical environmental feature setbacks is allowed according to Exhibits D and G. One <u>Mmechanized access Access</u> to the Dock (D) district from the Mixed Residential (MR) district is allowed through the <u>Preserve</u> Open Space (P-OS) Page 17 of 19
