Increase the current rate of $1.559 to $1.641 per pound of ammonia-nitrogen discharged into Austin Water’s wastewater system by an Industrial User when the ammonia-nitrogen concentration is in excess of 35 mg/l. The surcharge fee for ammonia nitrogen will be charged to an Industrial User that uses or produces ammonia-nitrogen in a manufacturing process. The surcharge fee for ammonia-nitrogen will be determined by calculating the difference between the average concentrations discharged from such an Industrial User and the 35 mg/l threshold as described in the formula below:

Surcharge fee for ammonia-nitrogen = Volume of wastewater discharged (in millions of gallons) x 8.34 pounds per gallon x [$1.641 per pound X (Industrial User’s average ammonia-nitrogen (in mg/l) - 35 mg/l)]

Industrial Wastewater Surcharges for BOD, COD, or TSS remain unchanged.
