### **Additional Backup Information:**

The contract is for parts and repair services for City-owned John Deere equipment. The City currently has approximately 285 John Deere units. The contractor will provide repair services with associated parts to supplement the work performed by City technicians, and parts will also be purchased for maintenance and

repairs conducted in-house.

The contract will replace the current contract, which expires June 25, 2019. The requested authorization amount is based on historical spend and allows for a small annual growth for parts and repair services associated with the aging equipment. The recommended contractor is the current provider for these parts and services.

If the City is unable to secure a contract, Fleet Services will not have a reliable source for parts and repair services, forcing the City to procure these requirements on the open market which may lead to increased operational costs and extended equipment down time.
