**Subject:** Re: Request postponement C14-2018-0124

Good morning,

The neighborhood (River Place and Milky Way) would like to request a postponement of case C14-2018-0124 from Aug 22 to the next available date on Sept 19.

Please help us understand what the correct channels are to formally make this request. We will also be directly asking council members for support on a postponement.

The reasons to support this postponement include:

1. The neighborhood is working with residents, HOA, and 2222 CONA to develop a compromise position. We need a little time to meet with council members and the applicant to discuss a compromise. A postponement supports the common goal of finding a mutual solution.
2. The prior council hearing and subsequent discussions have shown that there is a lot of confusion and incomplete answers as it relates to how the LDC applies and would be interpreted. Given the sensitivity of this decision, it is critical that everyone have enough time to research the impact and interplay of the LDC with the process. The council members also deserve a chance to get this information to caucus and deliberate before the next hearing.
3. This is the neighborhood's first and only request for postponement with city council.

Sincerely,

Scott Crosby, River Place HOA president

Ted Gaunt, River Place resident

Brian Showers, River Place resident

Brenda Langford, River Place resident
