ZONING CHANGE REVIEW SHEET

CASE: C14-2019-0100 – 7505 Cooper Lane                  DISTRICT: 2

ZONING FROM: DR; SF-2                                    ZONING TO: SF-6

ADDRESSES: 7501, 7503, 7505, 7507, 7509, and 7511 Cooper Lane

SITE AREA: 9.85 acres

PROPERTY OWNERS: Estate of Nelma Mueller (Donnie Carter and Darlene Graber, Independent Executors); Donnie Carter

APPLICANT / AGENT: David Weekley Homes (Evan Caso)

CASE MANAGER: Wendy Rhoades (512-974-7719, wendy.rhoades@austintexas.gov)

STAFF RECOMMENDATION:

The Staff recommendation is to grant townhouse and condominium residence (SF-6) district zoning. The basis of Staff’s recommendation is provided on page 2.

The Restrictive Covenant includes all recommendations listed in the Neighborhood Traffic Analysis memo, dated October 1, 2019, as provided in Attachment A.

ZONING AND PLATTING COMMISSION ACTION / RECOMMENDATION:

October 1, 2019: APPROVED SF-6 DISTRICT ZONING, WITH THE CONDITIONS OF THE NEIGHBORHOOD TRAFFIC ANALYSIS, AS STAFF RECOMMENDED, BY CONSENT

[H. SMITH; N. BARRERA-ROMIREZ – 2ND] (10-0) 1 VACANCY ON THE COMMISSION

CITY COUNCIL ACTION:
October 31, 2019:

ORDINANCE NUMBER:

ISSUES:

None at this time.

CASE MANAGER COMMENTS:

The subject rezoning area consists of six platted lots that contain one occupied single family residence (7511 Cooper Lane) and multiple structures that are either used for storage purposes or are vacant. The Cooper Lane frontage contains five of the six lots and is zoned
single family residence – standard lot (SF-2) district. One flag lot extending from Cooper Lane is zoned development reserve (DR) district and comprises a majority of the rezoning area. Recently constructed condominiums are directly north (SF-6-CO), an undeveloped tract with South First Street frontage is to the east (DR), an undeveloped property approved for condominiums is to the south (SF-6-CO), and single family residences on large lots and tracts, and an event production business are to the west (DR). Please refer to Exhibits A (Zoning Map), A-1 (Aerial View).

The Applicant proposes to rezone the property to the townhouse and condominium residence (SF-6) district as the first step in constructing up to 98 condominium units. SF-6 zoning allows for the ability to introduce a different type of housing to the area, yet condominiums, including those recently constructed on Cooper Lane can have more of a single family appearance, and be compatible with the existing single family residences in the vicinity. In 2014, a similarly situated property directly north received approval for SF-6-CO zoning and was recently constructed (Cooper Lane Condominiums). The Owner was required to widen the pavement to accommodate a dedicated left turn lane into the property, and this is consistent with the requirements outlined in the attached Neighborhood Traffic Analysis. The adjacent property to the south was rezoned to SF-6-CO in December 2015 and is currently in the site plan review process for 30 stand-alone condominium units on 4.67 acres. Please refer to Exhibits A (Zoning Map), A-1 (Aerial View) and B (Recorded Plats).

**BASIS OF RECOMMENDATION:**

1. The proposed zoning should be consistent with the purpose statement of the district sought.

   The townhouse and condominium residence (SF-6) district is intended as an area for moderate density single family, duplex, two-family, townhouse and condominium use. The Applicant intends to develop the property with a condominium project consisting of stand-alone condominium units per structure.

2. Zoning changes should promote an orderly and compatible relationship among land uses.

3. Zoning should be consistent with approved and existing residential densities.

   This is a case of residential infill in a lower density residential area that has recent approvals and pending zoning changes for more compact development. There will be an impact on Cooper Lane with additional vehicle trips, and like the adjacent condominiums to the north, the Owner will be responsible for right-of-way dedication and a separate left-turn lane for entering site traffic.

   In the broader city-wide context, SF-6 zoning is a reasonable option for multiple-acre parcels developed or redeveloped as residential infill. As indicated in the purpose statement of the district, SF-6 can be a transition to single-family residential – reflecting it is an appropriate and compatible use.

   In conclusion, Staff believes the proposed SF-6 zoning and condominium development is compatible with the single-family character of the area that now includes two similarly
situated condominium projects on the east side of Cooper Lane and one proposed zoning change on the west side.

According to the Austin 2014 Bicycle Plan approved by Austin City Council in November 2014, a shared lane bike facility is recommended for Cooper Lane.

OTHER STAFF COMMENTS:

Comprehensive Planning

This rezoning case is located on the east side of Cooper Lane, on several lots that are not located within the boundaries of a neighborhood planning area. The property is approximately 9.85 acres in size and contains two houses and approximately 9.15 acres of undeveloped land. Surrounding land uses include a single family subdivision and a convenience storage facility to the north; to the south is undeveloped land and single family
housing; to the east is undeveloped land and a single family subdivision; and the west is a small farm and a single family subdivision. The proposal is to retain the existing two houses on the property and develop the rest of the property into 98 unit townhouse/condominium project, under Zone SF-6 development standards.

Connectivity

The Walkscore for this site is **31/100, Car-Dependent**, meaning most errands require a car. A CapMetro stop is located on South 1st Street, within 2,100 linear feet from the site. There are no public sidewalks or bike lanes located along Cooper Lane, which is a narrow rural road. The mobility and connectivity options in the area are limited.

Imagine Austin

The property is not located along an Activity Center or Corridor. The following Imagine Austin policies are applicable to this case:

- **LUT P4.** Protect neighborhood character by directing growth to areas of change that include designated redevelopment areas, corridors and infill sites. Recognize that different neighborhoods have different characteristics and new and infill development should be sensitive to the predominant character of these communities.

- **LUT P5.** Create healthy and family-friendly communities through development that includes a mix of land uses and housing types and affords realistic opportunities for transit, bicycle, and pedestrian travel and provides both community gathering spaces, parks and safe outdoor play areas for children.

- **HN P1.** Distribute a variety of housing types throughout the City to expand the choices able to meet the financial and lifestyle needs of Austin’s diverse population.

The Austin Strategic Housing Blueprint, which is an amendment to Imagine Austin, includes goals for affordable housing in every City Council district. Some of these goals include: (1) preventing households from being priced out of the Austin; (2) providing an affordable housing choice; and (3) protecting diverse communities. While this residential project does not identify as an affordable housing project, it will provide much needed missing middle housing (condos or townhouses). Based on this project providing much needed missing middle housing, but lacking nearby mobility options (public sidewalks, bike lanes) it appears to only partially support the some of the policies of the Imagine Austin Comprehensive Plan.
Drainage

The developer is required to submit a pre- and post-development drainage analysis at the subdivision and site plan stage of the development process. The City’s Land Development Code and Drainage Criteria Manual require that the Applicant demonstrate through engineering analysis that the proposed development will have no identifiable adverse impact on surrounding properties.

Environmental

The site is not located over the Edwards Aquifer Recharge Zone. The site is in the South Boggy Creek Watershed of the Colorado River Basin, which is classified as a Suburban Watershed by Chapter 25-8 of the City's Land Development Code. The site is in the Desired Development Zone.

Under current watershed regulations, development or redevelopment on this site will be subject to the following impervious cover limits:

<table>
<thead>
<tr>
<th>Development Classification</th>
<th>% of Gross Site Area</th>
<th>% of Gross Site Area with Transfers</th>
</tr>
</thead>
<tbody>
<tr>
<td>Single-Family (minimum lot size 5750 sq. ft.)</td>
<td>50%</td>
<td>60%</td>
</tr>
<tr>
<td>Other Single-Family or Duplex</td>
<td>55%</td>
<td>60%</td>
</tr>
<tr>
<td>Multifamily</td>
<td>60%</td>
<td>70%</td>
</tr>
<tr>
<td>Commercial</td>
<td>80%</td>
<td>90%</td>
</tr>
</tbody>
</table>

According to floodplain maps there is no floodplain within or adjacent to the project location.

Standard landscaping and tree protection will be required in accordance with LDC 25-2 and 25-8 for all development and/or redevelopment.

At this time, site specific information is unavailable regarding vegetation, areas of steep slope, or other environmental features such as bluffs, springs, canyon rimrock, caves, sinkholes, and wetlands.

Under current watershed regulations, development or redevelopment requires water quality control with increased capture volume and control of the 2 year storm on site.

Impervious Cover

The maximum impervious cover allowed by SF-6 zoning district is 55%, a consistent figure between the zoning and watershed regulations.
Site Plan and Compatibility Standards

Site plans will be required for any new development other than single-family or duplex residential.

Any development which occurs in an SF-6 or less restrictive zoning district which is located 540 feet or less from property in an SF-5 or more restrictive zoning district will be subject to compatibility development regulations.

Any new development is subject to Subchapter E. Design Standards and Mixed Use. Additional comments will be made when the site plan is submitted.

FYI: Additional design regulations will be enforced at the time a site plan is submitted.

COMPATIBILITY STANDARDS
The site is subject to compatibility standards due to the adjacency of single family residences to the west and south. The following standards apply:

- No structure in excess of two stories or 30 feet in height may be constructed within 50 feet of the property line.
- For a structure more than 100 feet but not more than 300 feet from property zoned SF-5 or more restrictive, height limitation is 40 feet plus one foot for each 10 feet of distance in excess of 100 feet from the property zoned SF-5 or more restrictive.
- An intensive recreational use, including a swimming pool, tennis court, ball court, or playground, may not be constructed 50 feet or less from property in an SF-5 or more restrictive zoning district.

DEMOLITION AND HISTORIC RESOURCES
The applicant is responsible for requesting relocation and demolition permits once the site plan is approved. The City Historic Preservation Officer will review all proposed building demolitions and relocations prior to site plan approval. If a building meets city historic criteria, the Historic Landmark Commission may initiate a historic zoning case on the property.

Transportation
The Austin Strategic Mobility Plan (ASMP) adopted 04/11/2019, calls for 78 feet of right-of-way for Cooper lane. Additional right-of-way may be required at the time of subdivision and / or site plan. A traffic impact analysis was not required for this case because the traffic generated by the proposed zoning does not exceed the threshold of 2,000 vehicle trips per day [LDC 25-6-113].

A Neighborhood Traffic Analysis is required for this project. The NTA requires three (3) consecutive 24 hour tube counts, preferably on Tuesday, Wednesday, and Thursday, during a non-holiday week when school is in session. Please contact South Area Development Engineer Justin Good (Justin.Good@austintexas.gov) to discuss the location of the tube counts. Results are provided in Attachment A [LDC 25-6-114].
Water and Wastewater

The landowner intends to serve the site with City of Austin water and wastewater utilities. The landowner, at own expense, will be responsible for providing any water and wastewater utility improvements, offsite main extensions, utility relocations and or abandonments required by the land use. The water and wastewater utility plan must be reviewed and approved by Austin Water for compliance with City criteria and suitability for operation and maintenance.

Depending on the development plans submitted, water and or wastewater service extension requests may be required. All water and wastewater construction must be inspected by the City of Austin.

The landowner must pay the City inspection fee with the utility construction. The landowner must pay the tap and impact fee once the landowner makes an application for a City of Austin water and wastewater utility tap permit.

By: Deola Shophare, Clerk of the County Court, Travis County, Texas.

NOTE: No lot in this subdivision shall be occupied until water satisfactory for human consumption is available from a source on the land, a community source, or a public utility source, in adequate supply for family use, and operation of a septic tank. Said septic tank system to have a capacity of not less than 350 gallons with a drain field of not less than 350 square feet, and shall be installed in accordance with the regulations of the City-County Health Officer, and shall be inspected and approved by said officer. This restriction is enforced by the City of Austin-Travis County Health Unit, and/or the public surveyor. APPROVAL LIMITED TO INITIAL FILING, NON-TRANSFERABLE.
MEMORANDUM

To: Wendy Rhoades, Case Manager
CC: Evan Caso, Chris Blackburn, Amber Mitchell, Joan Jenkins, EIT
FROM: Justin Good, P.E.
DATE: October 1, 2019
SUBJECT: Neighborhood Traffic Analysis for 7505 Cooper Lane
        Zoning Case # C14-2019-0100

The Transportation Development Services division has performed a Neighborhood Traffic Analysis for the above referenced case and offers the following comments.

The 9.85-acre tract is located in south Austin at 7505 Cooper Lane. The site is currently zoned Single Family Residence (SF-2) and Development Reserve (DR). The east is predominately zoned DR with SF-6 zones to the north and south. The DR zoning is vacant. The zoning request is for Townhouse and Condominium residence (SF-6).

Roadways

The tract proposes access to Cooper Lane. Cooper Lane is classified as a residential collector and would provide the main access to the site. The roadway currently has 60 feet of right-of-way and 20 feet of pavement. The roadway has two-lanes without curb and gutter and no sidewalks. The average 24-hour count traffic volume on Cooper Lane was 3,194 vehicles per day, based on data collected from August 27, 2019 to August 29, 2019.

Trip Generation and Traffic Analysis

Based on the Institute of Transportation Engineer's Trip Generation Manual, 10th Edition, the proposed 98 unit multi-family development, with the requested zoning of SF-6, will generate 857 vehicle trips per day.

According to Section 25-6-116 of the Land Development Code, streets which have pavement width of less than 30 feet are considered to be operating at an undesirable traffic level if the average daily traffic volume for such roadways exceeds 1,200 vehicles per day. Based on the values in Table 3, Cooper Lane is currently operating at an undesirable level and will continue to do so with proposed site traffic. In order to account for increased stress on the surrounding traffic network due to site traffic, recommendations for mitigations and improvements are presented in the following section.

**Recommendations/Conclusions**

1. At time of subdivision or site plan, a total of 39 feet of right-of-way from the existing centerline of Cooper Lane should be dedicated in accordance with the Transportation Criteria Manual.

2. At time of subdivision or site plan, the applicant shall widen Cooper Lane along the property frontage to provide a separate left-turn lane for entering site traffic. The applicant should submit a schematic drawing with dimensions and a construction cost estimate signed and sealed by an engineer to verify the amount required for posting. It is recommended that these improvements be implemented by the applicant to assure safer access and circulation into the subdivision. The roadway improvements should be included with the site plan application and be designed according to the Transportation Criteria Manual.

3. To mitigate the increase of traffic on Cooper Lane and to encourage pedestrian connectivity in the area, it is recommended that the following improvements be explored at the time of subdivision or site plan: reconstruction of Cooper Lane to urban standards with curb and gutter, construction of all ages and abilities bicycle facilities, and construction of sidewalk along Cooper Lane. Additional improvements may be required upon further review.

4. If the number of units proposed in Table 1 are exceeded, the Transportation Development Services division will have to reassess the NTA.
5. The City Council may deny an application if the neighborhood traffic analysis demonstrates that the traffic generated by the project combined with existing traffic exceeds the desirable operating level established on a residential local or collector street in the neighborhood traffic analysis study area.

If you have any questions or require additional information, please contact me at 974-1449.

Justin Good, P.E.
Transportation Development Engineer – Lead: South
Austin Transportation Department
