Subject: Delwau Lane Development Project  
To: Glen Coleman <

Hi Glen,

Thanks for reaching out. We continue to be 100% in support of your project directly next door to us. 70 something RVs, a small store and community space would definitely fit the vibe of area and the community needs a little gathering space. This is a great use of this space for everyone!

I can see this serving people using the bike lane as well. As you know, we host the largest bicycle criterium in the world at Driveway Austin. We have also worked with the city by hosting several outreach programs. I can see your development blending very well into this community and providing services and resources that are very much needed.

If you are still allowing river access, that would be fantastic! The people of this community, that I have visited with over the last 14 years, have been coming to the river here to fish and in many cases...feed their families. This is a long-time East Austin tradition that defines what it's all about.

Feel free to share this email or my contact information with whomever you are speaking at the City.

Best Wishes

Bill Dollahite

President
