Council Committee, Boards and Commission Action:

August 21, 2020 - To be reviewed by the Water and Wastewater Commission.

Additional Backup Information:

The contract will provide services to remove accumulated scale from the solids clarifier mechanisms at Ullrich and Handcox Water Treatment Plants. These water treatment plants employ a lime softening process to provide drinking water for the City. After years of operation, a layer of scale forms over all submerged surfaces of the clarifiers and diminishes clarifier efficiency.

If the City is unable to secure a contract, the clarifiers will not be operating as required and the risk of

equipment failure increases.
