Council Committee, Boards and Commission Action:

Additional Backup Information:

The proposed amendment will increase the authorization allowing Austin Energy and Communications and

Technology Management to continue licensing for products and related service under their existing Adobe Enterprise License Agreements (ETLA). The software is used for document compilation, manipulation, and design. The ETLAs allow the City departments to better organize and consolidate their Adobe software portfolios into one agreement to facilitate upgrades, annual subscription renewals, and new purchases.

The combining of Austin Energy and Communications and Technology Management requirements under one contract is part of a strategic shift to relieve the administrative burden of managing multiple information technology contracts for similar products and services and allow for the potential of volume discounts or cost savings through enterprise licensing.
