

Tovo revised amendment Item 63

May 20, 2021

BE IT FURTHER RESOLVED:

The Water Forward Implementation Plan details a process that includes piloting strategies, collecting information about costs, and conducting stakeholder input that informs program development. The City Manager is directed to follow this process.

The City Manager shall provide recommendations to mitigate the impacts to affordability of these Water Forward strategies; any recommendations related to affordability shall consider the long-term benefits of reducing bills for water customers, costs associated with securing additional water supply, and other relevant considerations. The recommendations shall be developed with stakeholder input and brought back to Council for consideration in conjunction with implementation of the above strategies.
