Introduction

- **Winter Storm After Action Review**
  - Incident Response and Situational Awareness
  - Communications
  - Infrastructure Systems
  - Power Reliability

- **Resources**
  - Austin Water Staff
  - Water & Wastewater Commission – Winter Storm Working Group
  - WaterPIO (Communications Consulting Firm)
  - Freese & Nichols (Engineering Consulting Firm)
  - City-wide After Action Review (led by HSEM and Hagerty Associates)
Commission Working Group
Process and Priorities

- Winter Storm Working Group:
  - Chair: Commissioner Christianne Castleberry
  - Vice Chair: Commissioner William Moriarty
  - Members: Commissioners Grant Fisher, Christy Williams, Jesse Penn

- Monthly Meetings (April – October)
- Comprehensive Review of Winter Storm Impacts
- Priorities and Recommendations
- Continue to Serve in Advisory Role
Key Recommendations
Winter Storm After Action Review
Incident Response & Situational Awareness

Key Recommendations

- Enhance Incident Command System (ICS) training and depth
- Clarify and strengthen ICS public information roles, resources, and decision-making
- Improve capabilities to provide real-time water system insights from operational and AMI data sources
  - Example: Outage map
Communications Strategies
Key Recommendations

- Adjust and enhance Winter Weather Preparedness messaging
- Enhance guidance and training for use of public notification systems
  - Warn Central Texas (Reverse 911)
  - My ATX Water Portal
- Conduct targeted outreach to multi-family properties
Infrastructure Systems
Key Recommendations

- Increase investments to replace under performing water mains
- Enhance plant winterization (pipe heat tracing, insulation, thermal blankets)
- Increase chemical and sludge storage at treatment plants
- Modify maintenance and repair schedules and approaches to increase available capacity year-round
- Increase pumping, transmission and storage capacity
Power Reliability
Key Recommendations

- Increase inventory of portable emergency generators
- Prioritize investments to modernize plant electrical systems
- Senate Bill 3 and TCEQ Emergency Preparedness Plan
  - Focuses on water system power reliability
  - TCEQ guidance still evolving
  - Review critical load facility designation with all power providers
  - Critical facility on-site emergency power generation systems
Implementation – Completed Items

Winter Storm After Action Review
Implementation of Recommendations
Completed Items

- Emergency Water Resources
  - Two potable water trucks procured
  - Increased on-site inventory of emergency water from 6 to 60 Pallets
  - New vendor contract for additional local storage of 19 pallets
  - Inventory of 58 bulk water storage totes and 65 fire hydrant adaptors
  - New Emergency Management Plans Officer position supporting emergency water planning.

Winter Weather Preparedness Tips

Prepare for Freezing Weather

LOCATE YOUR WATER SHUTOFF

Make sure everyone in your residence knows where the water main shutoff valve is located and keep it clear of debris and obstacles at all times.

For most homes in our service area, the property owner’s shutoff valve is on your side of the water meter at the meter box. If you are not sure if you have an inside shutoff valve, check the property inspection report from when you purchased your residence. For rentals, please contact your property manager.

If you cannot find your shutoff valve or if it is damaged, then you should be prepared to access the City shutoff valve in the meter box. You may need a water meter key to open the meter box, which can be purchased at most hardware stores.

KEEP OUT COLD AIR

Tightly close doors and windows to the outside.

Make repairs to broken or chafing windows, doors, and walls. Seal all leaks in cribs, spaces, and basements.

Water tanks in unheated spaces and close garage doors for the duration of the freeze.

EXPOSED PIPES AND WATER HEATERS

Insulate pipes in unheated and shaded areas, such as attic or garage. Also check manufacturer’s recommendations for your tankless water heater. Hardware and plumbing supply stores carry insulation to help keep pipes from freezing.

OUTSIDE FAUCETS

Turn off outside faucets. Thaw out all connected hoses and wrap faucets with towels or a Shiokawara insulation. Turn off and drain automatic spigot systems.

PREPARE BEFORE LEAVING TOWN

If you plan to be away during a time when freezing temperatures are possible, turn off your water at the meter and set your thermostat to 65 degrees or higher.

EMERGENCY SUPPLIES to have on hand:

- WATER METER KEY to access your meter box if necessary
- INSULATION for indoor and outdoor pipes
- HOSE BIB COVERS for outdoor faucets
- Battery powered RADIO and FLASHLIGHT
- Have enough water for 1 GALLON PER PERSON PER DAY for 7 DAYS

Implementation of Recommendations
Completed Items

- **Operations**
  - Storm damage repairs (broken pipes, valves, basins, chemical feed systems)
  - Insulation enhancements underway
  - Procurement of heaters, sand, deicing fluid
  - Increased tire chain inventory
  - Increased electrician staffing at water treatment plants
