### **Additional Backup Information:**

The City is preparing for future disasters by entering contracts for post-disaster debris services. The contract

---

will provide a contractor for post-disaster emergency field debris monitoring services, including related management, and accounting services.

The recommended contractor will be responsible for monitoring the recovery efforts and actions of the City's post-disaster debris removal contractor in accordance with Federal Emergency Management Administration (FEMA) policies and guidelines. Utilizing a debris monitoring contractor is a necessary step in the FEMA reimbursement process. These services include the monitoring of debris collection and of temporary debris storage and reduction sites, the proper preparation and maintenance of documentation for requesting and obtaining reimbursement from FEMA for disaster-related costs, and the reporting of data on equipment use, load eligibility, regulations compliance, public and personnel safety, hazardous trees, hazardous wastes, and schedule issues, as well as other related services. The contractor will monitor the progress of recovery efforts and assist with making and implementing recommendations to improve efficiency and maintain compliance.

All work will follow Occupational Safety and Health Administration and Environmental Protective Agency requirements to maintain a safe working environment. Also, the contractor will be required to follow FEMA practices and guidelines and all other applicable regulations, guidelines, and practices.

The City has worked with Tetra Tech Inc. in the past when assisting with a disaster in Houston, Texas, as well as during recovery efforts related to the February 2021 Winter Storm. Tetra Tech Inc. is also an industry contact for the City regarding disaster recovery requirements and meeting FEMA standards.

The requested authorization amount was determined using departmental estimates based on historical emergency events.

An evaluation team with expertise in this area evaluated the offers and scored Tetra Tech Inc. as the best to provide these services based on project methodology, qualifications, experience, and pricing.
