SUBJECT: C14-04-0180 - Conduct a public hearing and approve an ordinance amending Chapter 25-2 of the Austin City Code by rezoning property locally known as 2444 South 1st Street (East Bouldin Creek Watershed) from family residence (SF-3) district zoning to community commercial-conditional overlay (GR-CO) combining district zoning. Zoning and Platting Commission Recommendation: To grant community commercial-conditional overlay (GR-CO) combining district zoning. Applicant: Michael Vasquez. Agent: Michael Vasquez. City Staff: Tom Bolt, 974-2755.

REQUESTING  
DEPARTMENT: Neighborhood Planning and Zoning  
DIRECTOR'S  
AUTHORIZATION: Greg Guernsey
ZONING CHANGE REVIEW SHEET

CASE: C14-04-0180

ADDRESS: 2444 So. 1st St.

OWNER/APPLICANT: Michael Vasquez
AGENT: Michael Vasquez

ZONING FROM: SF-3 TO: GR

AREA: .15 acres

SUMMARY STAFF RECOMMENDATION:

Approve the rezoning from family residential district (SF-3) to community commercial district (GR)

ZONING AND PLATTING COMMISSION RECOMMENDATION:

APPROVED GR-CO ZONING; ONLY PERMITTED LR USE BEING GENERAL RETAIL SALES (GENERAL); ALL LR USES; NO DRIVE THROUGH SERVICES. [K.J. J.M 2ND] (9-0)

ISSUES: N/A

DEPARTMENT COMMENTS:

The subject property is situated between two Commercial Services district zoned properties on a right-of-way classified as an arterial. The Community Commercial (GR) district proposed would allow for less intense developments on properties to the north and south.

This site is located within the pending Galindo Neighborhood Planning Area. The Neighborhood Planning process is expected to begin in August 2005.

STAFF RECOMMENDATION

Approve the rezoning from family residence district (SF-3) to community commercial district (GR)

BACKGROUND N/A

BASIS FOR RECOMMENDATION

Zoning should not constitute a grant of special privilege to an individual owner; Granting of the request should result in an equal treatment of similarly situated properties.

Properties to the north and south fronting on South 1st St. are zoned CS allowing more intense commercial service uses than those allowed under the proposed zoning of this property.

Zoning changes should promote compatibility with adjacent and nearby uses.

Adjacent uses are a restaurant to the south and a single family structure zoned CS to the north. The proposed GR will continue the ability to develop commercial use along this section of So.1st St. The SF-3 zoning district is out of character in this area.

Zoning changes should promote compatibility with adjacent and nearby uses and should not result in detrimental impacts to the neighborhood character.

The proposed zoning will allow more consistency with potential adjacent uses.

Granting of the request should result in an equal treatment of similarly situated properties.

Similarly situated properties in this area have commercial district zoning.

EXISTING CONDITIONS

Site Characteristics

Site is relatively flat and developed with a single-family residence and accessory structures.

Impervious Cover

The site is not located over the Edwards Aquifer Recharge Zone. The site is located in the East Bouldin Creek Watershed of the Colorado River Basin, which is classified as an Urban Watershed by Chapter 25-8 of the City's Land Development Code. Impervious cover is not limited in this watershed class.

Environmental

According to flood plain maps, there is flood plain within the project area.

At this time, site-specific information is unavailable regarding existing trees and other vegetation, areas of steep slope, or other environmental features such as bluffs, springs, canyon rimrock, caves, sinkholes, and wetlands.
Environmental con’t.

Standard landscaping and tree protection will be required in accordance with LDC 25-2 and 25-8 for all development and/or redevelopment.

At this time, no information has been provided as to whether this property has any pre-existing approvals, which would preempt current water quality or Code requirements.

Water Quality Control Requirements

This site is required to provide on-site structural water quality controls (or payment in lieu of) for all development and/or redevelopment when 5,000 s.f. cumulative is exceeded, and detention for the two-year storm.

Transportation

No additional right-of-way is needed at this time.

The trip generation under the requested zoning is estimated to be 1,153 trips per day, assuming that the site develops to the maximum intensity allowed under the zoning classification (without consideration of setbacks, environmental constraints, or other site characteristics).

A traffic impact analysis was not required for this case because the traffic generated by the proposed zoning does not exceed the threshold of 2,000 vehicle trips per day. [LDC, 25-6-113]

Water and Wastewater

The landowner intends to serve the site with City water and wastewater utilities. If water or wastewater utility improvements, or offsite main extension, or system upgrades, or utility relocation, or utility adjustment are required, the landowner, at own expense, will be responsible for providing. Also, the water and wastewater utility plan must be reviewed and approved by the Austin Water Utility. The plan must be in accordance with the City utility design criteria. The landowner must pay all associated City plan review and inspection fees.

The landowner must pay the tap and impact fee once the landowner makes an application for a City water and wastewater utility tap permit.

Stormwater Detention

At the time a final subdivision plat, subdivision construction plans, or site plan is submitted, the developer must demonstrate that the proposed development will not result in additional identifiable flooding of other property. Any increase in stormwater runoff will be mitigated through on-site stormwater detention ponds, or participation in the City of Austin Regional Stormwater Management Program if available.

Compatibility Standards

The site is subject to compatibility standards. Along the west and south (currently under review for a proposed zoning change) and north property line, the following standards apply:

- No structure may be built within 25 feet of the property line.
Compatibility Standards con’t.

- No structure in excess of two stories or 30 feet in height may be constructed within 50 feet of the property line.
- No structure in excess of three stories or 40 feet in height may be constructed within 100 feet of the property line.
- No parking or driveways are allowed within 25 feet of the property line.
- In addition, a fence, berm, or dense vegetation must be provided to screen adjoining properties from views of parking, mechanical equipment, storage, and refuse collection. Additional design regulations will be enforced at the time a site plan is submitted.
