DEPARTMENT COMMENTS:

The subject tract is zoned family residential (SF-3) and is developed with one single family home.

The applicant has met with the Galindo Neighborhood Association and prior to the scheduled public hearing on April 5, the neighborhood supported the request with a limit of 30 units on the site. The applicant agreed to these conditions. Since that time, the neighborhood association has withdrawn its support, pending a review of preliminary site plan. Negotiations continue, and Commission will be updated as to their status at the Public Hearing. (see attached email).

The property is located in the proposed Galindo Neighborhood Planning Area, that is scheduled to begin in the October 2005. The tentative Planning Commission Public hearing dates should occur in the June 2006, and the City Council will consider the neighborhood plan and rezoning in the summer of 2006.

SUMMARY STAFF RECOMMENDATION

C14-05-0024

Staff recommends approval of SF-6-CO, with a limit of 30 units.

BASIS FOR LAND USE RECOMMENDATION (ZONING PRINCIPLES)

1. *Zoning changes should promote compatibility with adjacent and nearby uses.*

SF-6 zoning is an appropriate zoning designation for the site between CS and SF-3

2. *The proposed zoning should be consistent with the goals and objectives of the City Council.*

SF-6 zoning would provide additional infill development and housing in the urban core

EXISTING CONDITIONS

Site Plan

The site is subject to compatibility standards. Along the north, south, east & west property line, the following standards apply:

- No structure may be built within 25 feet of the property line of the SF-3 properties.
- No structure in excess of two stories or 30 feet in height may be constructed within 50 feet of the property line of the SF-3 properties.
- No structure in excess of three stories or 40 feet in height may be constructed within 100 feet of the property line of the SF-3 properties.
- No parking or driveways are allowed within 25 feet of the property line of the SF-3 properties.
- In addition, a fence, berm, or dense vegetation must be provided to screen adjoining properties from views of parking, mechanical equipment, storage, and refuse collection.

Additional design regulations will be enforced at the time a site plan is submitted.

Transportation

No additional right-of-way is needed at this time.

The trip generation under the requested zoning is estimated to be 261 trips per day, assuming that the site develops to the maximum intensity allowed under the zoning classification (without consideration of setbacks, environmental constraints, or other site characteristics).

A traffic impact analysis was not required for this case because the traffic generated by the proposed zoning does not exceed the threshold of 2,000 vehicle trips per day. [LDC, 25-6-113]

There are existing sidewalks along Cardinal Street.

Capital Metro bus service is available along South 1st Street.

Cardinal is classified in the Bicycle Plan as a Priority 1 bike route.

Existing Street Characteristics:

NAME	ROW	PAVEMENT	CLASSIFICATION
Cardinal	60'	Varies	Collector
S. 2 nd Street	60'	Varies	Collector

Water and Wastewater

The landowner intends to serve the site with City water and wastewater utilities. If water or wastewater utility improvements, or offsite main extension, or system upgrades, or utility relocation, or utility adjustment are required, the landowner will be responsible for all costs and providing. Also, the utility plan must be reviewed and approved by the Austin Water Utility. The plan must be in accordance with the City of Austin utility design criteria and specifications.

The landowner must pay all required water and wastewater utility tap permit, impact, construction inspection, and utility plan review fees.

Environmental

The site is not located over the Edwards Aquifer Recharge Zone. The site is located in the West Bouldin Creek Watershed of the Colorado River Basin, which is classified as an Urban Watershed by Chapter 25-8 of the City's Land Development Code. It is in the Desired Development Zone.

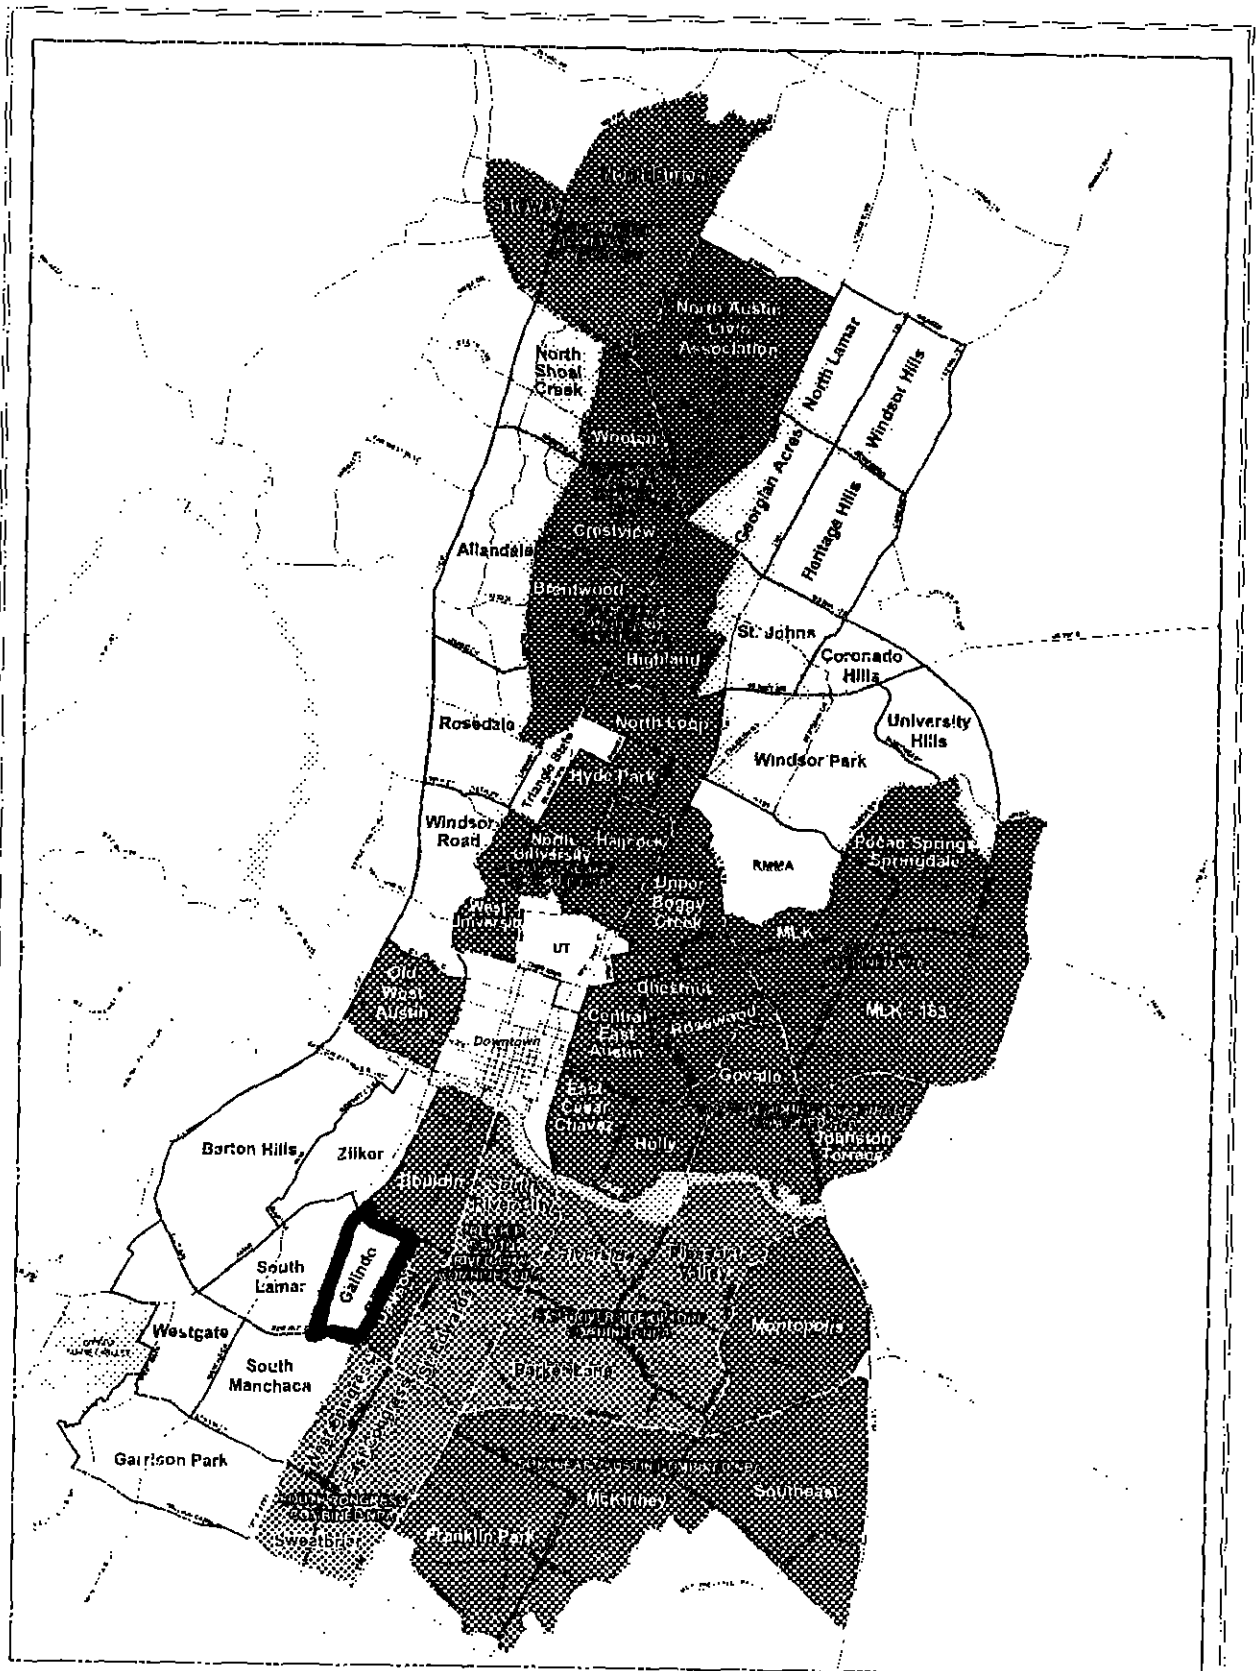

Impervious cover is not limited in this watershed class; therefore the zoning district impervious cover limits will apply.

This site is required to provide on-site structural water quality controls (or payment in lieu of) for all development and/or redevelopment when 5,000 s.f. cumulative is exceeded, and detention for the two-year storm. At this time, no information has been provided as to whether this property has any pre-existing approvals which would preempt current water quality or Code requirements.

According to flood plain maps, there is no flood plain within the project area.

At this time, site-specific information is unavailable regarding existing trees and other vegetation, areas of steep slope, or other environmental features such as bluffs, springs, canyon rimrock, caves, sinkholes, and wetlands.

Standard landscaping and tree protection will be required in accordance with LDC 25-2 and 25-8 for all development and/or redevelopment.
