PURCHASING: Only bid received.

MBE / WBE: This contract will be awarded in compliance with Chapter 2-9 of the City Code (Minority-Owned and Women-Owned Business Enterprise Procurement Program). No subcontracting opportunities were identified; therefore, no goals were established for this solicitation.

This contract is for the purchase of 20 replacement motorcycles that will be assigned to the Austin Police Department for use in traffic enforcement. The City currently has 73 police motorcycles in the Austin Police Department fleet. Motorcycles are used by police officers to run radar, investigate traffic accidents, and as traffic escorts for approximately 150 events per year that include parades, run fests, and political events.

The City has purchased 30 of these type police motorcycles since 2001. This motorcycle is equipped with certain design features that make it the safest motorcycle in production. The R1150RTP model is lighter and more maneuverable than other makes of police motorcycles without any loss of the heavy-duty performance from the 90 horsepower, 1130 cc twin piston engine. The motorcycle has an integral ABS braking system that provides 20% better braking performance and is not available on any other police motorcycle currently in production. The integral ABS brake system links the front and rear wheel brake circuits that will apply the optimum amount of braking power to each wheel according to individual wheel load. This equates to better stopping ability without skidding.

These motorcycles will replace 20 existing bikes that have been identified by Fleet Services as eligible for replacement since they have 60,000 miles of wear, and are no longer able to provide reliable front-line service.

## **BID TABULATION**

Police Motorcycles (Quantity - 20) IFB No. RM06100001

Vendor Lone Star BMW Triumph Austin, Texas

Unit Price

**Total Price** 

\$18,939

\$378,780

## PRICE ANALYSIS

- a. Only bid received. This bike is equipped with the integral ABS braking system that is only provided by the manufacturer. The braking system on this motorcycle significantly reduces the possibility of skidding and loss of control for the rider; therefore, it offers the highest level of protection from injury or death to the rider and is necessary for health and safety reasons. In addition, it is lighter, faster, and more maneuverable than other police bikes in production.
- b. Thirteen solicitations were issued with no MBE/WBEs available for this commodity. One bid was received. The solicitations were sent to dealers as well as other motorcycle manufacturers in order to get competition. Potential bidders stated that they could not provide a bid at this time.
- c. The pricing offered represents a 4% decrease from the last purchase made in December 2004.

## APPROVAL JUSTIFICATION

- a. Only bid received.
- b. APD and Fleet Services concur with recommended award.
- c. Advertised in the Austin American-Statesman and on the Internet.
