Introduction

Blue Cross and Blue Shield of Texas (BCBSTX) is pleased to present the 2019 Drug List. This is a list of preferred drugs which includes brand drugs and a partial listing of generic drugs. **Members are encouraged to show this list to their physicians and pharmacists. Physicians are encouraged to prescribe drugs on this list, when right for the member. However, decisions regarding therapy and treatment are always between members and their physician.**

Drug List updates – This list is regularly updated as generic drugs become available and changes take place in the pharmaceuticals market. For the most up-to-date information, visit [myprime.com](https://www.myprime.com) or [bcbstx.com](https://www.bcbstx.com) and log in to Blue Access for MembersSM (BAMSM) or call the number on the back of your ID card. Physicians can access the list from the provider portal at [bcbstx.com](https://www.bcbstx.com).

How drugs are selected

Drugs on this list are selected based on the recommendations of a committee made up of physicians and pharmacists from throughout the country. The committee, which includes at least one representative from BCBSTX, reviews drugs regulated by the U.S. Food and Drug Administration (FDA).

Both drugs that are newly approved by the FDA as well as those that have been on the market for some time are considered. Drugs are selected based on safety, efficacy, cost and how they compare to other drugs currently on the list.

How member payment is determined

This list shows prescription drug products in tiers. Generally, each drug is placed into one of up to six member payment tiers: Preferred Generic (Tier 1), Non-Preferred Generic (Tier 2), Preferred Brand (Tier 3), Non-Preferred Brand (Tier 4), Preferred Specialty (Tier 5) and Non-Preferred Specialty (Tier 6). Non-Preferred Brand or Non-Preferred Specialty drugs are not listed in this document. Based on your benefit design, drugs can either be in these tiers or you may have fewer tiers, e.g., all generics in one tier. To verify your payment amount for a drug, visit [MyPrime.com](https://www.myprime.com) or [bcbstx.com](https://www.bcbstx.com) and log in to Blue Access for Members or call the number on the back of your ID card.

Your pharmacy benefit includes coverage for many prescription drugs, although some exclusions may apply. For example, drugs indicated for cosmetic purposes, e.g., Propecia, for hair growth, may not be covered. Prescription products that have over-the-counter (OTC) equivalents may not be covered. Drugs that are not FDA-approved for self-administration may be available through your medical benefit.

How to use this list

Generic drugs are shown in lower-case **boldface** type. Most generic drugs are followed by a reference brand drug in (parentheses). The reference brand drug is usually a non-preferred (NP) brand and is only included as a reference to the brand. Some generic products have no reference brand.

Example: **atorvastatin** (Lipitor)

Brand drugs are listed in all CAPITAL letters.

Example: PROAIR HFA

Drugs used to treat multiple conditions

Some drugs in the same dosage form may be used to treat more than one medical condition. In these instances, each medication is classified according to its first FDA-approved use. Please check the index if you do not find your particular medication in the class/condition section that corresponds to your use.

Generic drugs

Using generic drugs, when right for you, can help you save on your out-of-pocket medication costs. Generic drugs must be approved by the FDA just as brand drugs are, and must meet the same standards.

There are two types of generic drugs:

- A **generic equivalent** is made with the same active ingredient(s) at the same dosage as the reference drug.
- A **generic alternative** is a drug typically used to treat the same condition, but the active ingredient(s) differs from the brand drug.

According to the FDA, compared to its brand counterpart, an FDA-approved generic drug:

- Is chemically the same
- Works just as well in the body
- Is as safe and effective
- Meets the same standards set by the FDA

The main difference between the reference brand drug and the generic equivalent is that the generic often costs much less.

Preferred brand drugs typically move to a non-preferred brand tier after a generic equivalent becomes available.

You may be responsible for your member share payment amount (copay/coinsurance) *plus* the difference in cost between the brand and generic equivalent if you or your doctor requests the reference brand rather than the generic. Generic drugs generally have the lowest member payment amount.

Consider talking to your doctor about generic drugs

If your doctor writes a prescription for a brand drug that does not have a generic equivalent, consider asking if an appropriate generic alternative is available.

You can also let your pharmacist know that you would like a generic equivalent for a brand drug, whenever one is available. Your pharmacist can usually substitute a generic equivalent for its brand counterpart without a new prescription from your doctor.

Only your doctor can determine whether a generic alternative is right for you and must prescribe the medication.

Coverage considerations

Most prescription drug benefit plans provide coverage for up to a 30-day supply of medication, with some exceptions. Your plan may also provide coverage for up to a 90-day supply of maintenance medications. Maintenance medications are those drugs you may take on an ongoing basis for conditions such as high blood pressure, diabetes or high cholesterol. Some plans may exclude coverage for certain agents or drug categories, like those used for erectile dysfunction or weight loss. Drug coverage may be limited to recommendations based on FDA-approved labeling and recognized evidence-based or clinical practice guidelines.

Over-the-counter exclusions: Your benefit plan may not provide coverage for prescription medications that have an over-the-counter version. You should refer to your benefit plan material for details about your particular benefits.

Compounded medications: Your benefit plan may not provide coverage for compounded medications. Please see your plan materials or call the number on the back of your ID card to determine whether compounded medications are covered and/or verify your payment amount.

Rerepackaged medications: Repackaged versions of medications already available on the market are not covered.

Prior Authorization (PA): Your benefit plan may require prior authorization for certain drugs. This means that your doctor will need to submit a prior authorization request for coverage of these medications, and the request will need to be approved, before the medication will be covered under your plan. For the medications listed in this document, if a prior authorization is commonly required, it will generally be noted next to the medication with a dot under the prior authorization column. Some plans may have prior authorization on additional medications beyond those noted in this document. Refer to your benefit plan materials for details about your particular benefits.

Step Therapy (ST): Your benefit plan may include a step therapy program. This means you may need to try another proven, cost-effective medication before coverage may be available for the drug included in the program. Many brand drugs have less-expensive generic or brand alternatives that might be an option for you. For the medications listed in this document, if a step therapy is commonly required, it will generally be noted next to the medication with a dot under the step therapy column. Some plans may have step therapy programs on additional medications beyond those noted in this document. Refer to your benefit plan materials for details about your particular benefits.

Dispensing Limits (DL): Drug dispensing limits help encourage medication use as intended by the FDA. Dispensing limits are placed on medications in certain drug categories. For the medications listed in this document, if a dispensing limit applies, it will generally be noted next to the medication with a dot under the dispensing limits column. Limits may include: quantity of covered medication per prescription or quantity of covered medication in a given time period. If your doctor prescribes a greater quantity of medication than what the dispensing limit allows, you can still get the medication. However, you will be responsible for the full cost of the prescription beyond what your coverage allows.* For a list of medications and their dispensing limits, visit myprime.com or bcbstx.com.

*Please note: For certain controlled substance medications, some state laws may not allow coverage by a health benefit plan of such medication if dispensed in a quantity beyond what the dispensing limit allows. You will be responsible for the full cost of the prescription with no benefits applied if the dispensed quantity exceeds the dispensing limit.

Remember, medication decisions are between you and your doctor. Only you and your doctor can determine which medication is right for you. Discuss any questions or concerns you have about medications you are taking or are prescribed with your doctor. BCBSTX does not provide health care services and, therefore, cannot guarantee any results or outcomes.

Specialty drugs

Specialty drugs are used in the treatment of medical conditions such as hepatitis, hemophilia, multiple sclerosis and rheumatoid arthritis. Specialty drugs may be oral, topical or injectable medications that can either be self-administered or administered by a health care professional. For a current list of specialty medications, visit [myprime.com](http://www.myprime.com) or bcbstx.com and log in to Blue Access for Members.

Note that some drug classes may be excluded by some plans and therefore may not be covered under your pharmacy benefit. Your plan may have a different coverage level for self-administered specialty drugs. If you have questions about your coverage for specialty medications or your prescription drug benefit, call the number on the back of your ID card.

AllianceRx Walgreens Prime

Through AllianceRx Walgreens Prime, members can have covered specialty medications delivered directly to them or their doctor's office. When you receive specialty medications through AllianceRx Walgreens Prime, you also receive at no additional charge the following services:

- Coordination of coverage between you, your doctor and your health plan
- Educational materials about your particular condition and information about managing potential medication side effects
- Syringes, sharps containers and other supplies with every shipment for self-injectables
- 24/7/365 phone access to a pharmacist for urgent medication issues

To order through AllianceRx Walgreens Prime:

- Have your doctor call 877-627-6337 or e-prescribe your prescription to AllianceRx Walgreens Prime. Your doctor can find e-prescribing information at www.alliancerxwp.com.
- If you have an existing prescription for a covered specialty medication, you can call 877-627-6337 to transfer your prescription.
- A coordinator will contact you to arrange delivery of your medication.
- The prescription can be shipped directly to you or your prescribing doctor's office. Each package is individually marked for each member. Refrigerated drugs are shipped in temperature-controlled packaging.

If you have questions, please contact AllianceRx Walgreens Prime at 877-627-6337, visit www.alliancerxwp.com, or call the number on the back of your ID card.
