

GMS Report Byrne Criminal Justice Innovation (BCJI) Program 2012-AJ-BX-0015 Reporting Period: October 1 - December 31, 2013

This report is generated for the City of Austin grantee for federal award number 2012-AJ-BX-0015. The award amount is \$ 1,000,000. It reflects performance measurement data for the period October 1 - December 31, 2013. Any funds reported only represent an estimate of dollars allocated or used for activities covered by this award.

Project Description

The goal of the Byrne Criminal Justice Innovation (BCJI) Program is to improve community safety by designing and implementing effective, comprehensive approaches to addressing crime within a targeted neighborhood as part of a broader strategy to advance neighborhood revitalization through cross-sector community-based partnerships. Research suggests that crime clustered in small areas, or "crime hot spots," accounts for a disproportionate amount of crime and disorder in many communities. In times of limited resources, local and tribal leaders need tools and information about crime trends in their jurisdiction and assistance in assessing, planning, and implementing the most effective use of criminal justice resources to address these issues. They also need a core foundation of resources and tools to support data-driven strategy development, community-driven capacity building for collaborative problem solving, and assistance to identify and implement evidence-based and innovative strategies to target these drivers of crime. A multi-faceted approach like the BCJI Program targets crime in the locations where most crime is occurring. This approach can have the biggest impact while also building the capacity of the community to deter future crime. This new program is a part of the Administration's larger Neighborhood Revitalization Initiative (NRI) that supports local and tribal communities in developing place-based strategies to change neighborhoods of distress into neighborhoods of opportunity. Recognizing that interconnected solutions are needed in order to resolve the interconnected problems existing in distressed communities, the BCJI Program is designed to provide neighborhoods with coordinated federal support in the implementation of comprehensive place-based strategies to effectively reduce and prevent crime by connecting this support to broader comprehensive neighborhood revitalization efforts. The FY 2012 program will fund planning and implement grants, as well as enhancement grants. The city of Austin will utilize this grant to: improve public safety; address social impacts including physical disorder, social economic status, and resources and collective efficacy; and ensure the long-term planning and implementation of revitalization strategies within the Rundberg neighborhood. The city will collaborate with various partners and focus on strategies that address social disorder, language barriers, reentry, at-risk youth, nuisance abatement, and trust between undocumented residents and police. Grant funds will be used to: provide overtime to officers to conduct law enforcement and community policing efforts; contract services to perform crime analysis; support research and evaluation; and provide confidential funds for undercover law enforcement activities. CA/CF

Grantee Comments

Grantee comments were added as follows:

October to December 2013

[No Comments Entered]

Narrative

Grantee-level narrative for the period October 1, 2013 - December 31, 2013 were reported as follows:

BJA 7 Questions

Question: What were your accomplishments during reporting period?

Response:

The planning year successfully concluded with the submission of a comprehensive implementation plan and research report.

Question: What goals were accomplished, as they relate to your grant application?

Response:

Improvements to public safety: traditional law enforcement solutions were employed during the reporting period.

Social impacts including physical disorder, social economic status and resources, and collective efficacy were explored during the development of the implementation plan.

The cross-sector partnership continued to discuss long-term plans for neighborhood-based revitalization strategies.

Question: What problems/barriers did you encounter, if any, within the reporting period that prevented you from reaching your goals or milestones?

Response:

Engaging the community - particularly high at-risk youth, refugee, immigrant, and non-English speaking populations - has been a challenge. LISC and the Vera Institute have been working with key project personnel and related training is scheduled for the January - March 2014 quarter.

Question: Is there any assistance that BJA can provide to address any problems/barriers identified in question #3?

Response:

No.

NR

Question: Are you on track to fiscally and programmatically complete your program as outlined in your grant application? (Please answer YES or NO and if no, please explain.)

Response:

Yes

NR

Question: What major activities are planned for the next 6 months?

Response:

Following acceptance of the implementation plan and research report (and release of the fund hold), the City will move forward with all approved implementation activities.

Question: Based on your knowledge of the criminal justice field, are there any innovative programs/accomplishments that you would like to share with BJA?

Response:

Not at this time.

*NR = not reported
