GMS Report
Byrne Criminal Justice Innovation (BCJI) Program
2012-AJ-BX-0015
Reporting Period: July 1 - December 31, 2015

This report is generated for the City of Austin grantee for federal award number 2012-AJ-BX-0015. The award amount is \$ 1,000,000. It reflects performance measurement data for the period July 1 - December 31, 2015. Any funds reported only represent an estimate of dollars allocated or used for activities covered by this award.

Project Description

The goal of the Byrne Criminal Justice Innovation (BCJI) Program is to improve community safety by designing and implementing effective, comprehensive approaches to addressing crime within a targeted neighborhood as part of a broader strategy to advance neighborhood revitalization through cross-sector community-based partnerships. Research suggests that crime clustered in small areas, or "crime hot spots," accounts for a disproportionate amount of crime and disorder in many communities. In times of limited resources, local and tribal leaders need tools and information about crime trends in their jurisdiction and assistance in assessing, planning, and implementing the most effective use of criminal justice resources to address these issues. They also need a core foundation of resources and tools to support data-driven strategy development, community-driven capacity building for collaborative problem solving, and assistance to identify and implement evidence-based and innovative strategies to target these drivers of crime. A multi-faceted approach like the BCJI Program targets crime in the locations where most crime is occurring. This approach can have the biggest impact while also building the capacity of the community to deter future crime. This new program is a part of the Administration's larger Neighborhood Revitalization Initiative (NRI) that supports local and tribal communities in developing place-based strategies to change neighborhoods of distress into neighborhoods of opportunity. Recognizing that interconnected solutions are needed in order to resolve the interconnected problems existing in distressed communities, the BCJI Program is designed to provide neighborhoods with coordinated federal support in the implementation of comprehensive place-based strategies to effectively reduce and prevent crime by connecting this support to broader comprehensive neighborhood revitalization efforts. The FY 2012 program will fund planning and implement grants, as well as enhancement grants. The city of Austin will utilize this grant to: improve public safety; address social impacts including physical disorder, social economic status, and resources and collective efficacy; and ensure the long-term planning and implementation of revitalization strategies within the Rundberg neighborhood. The city will collaborate with various partners and focus on strategies that address social disorder, language barriers, reentry, at-risk youth, nuisance abatement, and trust between undocumented residents and police. Grant funds will be used to: provide overtime to officers to conduct law enforcement and community policing efforts; contract services to perform crime analysis; support research and evaluation; and provide confidential funds for undercover law enforcement activities. 27. Please list the milestones you expect to achieve over the life of the award. Milestones refer to objectives that you will achieve over the course of the award.		
Jul - Sep 15	<p>The City continues to rely on existing and new cross-sector partners; current and future grant awards and leveraged resources; and, federal support, including training and technical assistance, to meet project milestones. We hope that the efforts of this collaboration will result a continuum of strategies to comprehensively address and reduce instances of Part I and Part II crimes. The objectives that the cross-sector partnership will achieve during the project period include:</p> <p>Identify a neighborhood with a concentration of crime hot spots which have for a period of time composed a significant proportion of crime or types of crime.</p> <p>Identify new and build upon existing planning efforts to revitalize the neighborhood and address issues that relate to the crime issues identified.</p> <p>Enhance the Rundberg Revitalization Team with the presence of criminal justice, social service, and neighborhood revitalization partners.</p> <p>Offer ongoing community engagement and leadership building support and ensure the community is engaged in the process.</p> <p>Facilitate collaboration between the Austin Police Department, project partners, and the University of Texas to conduct an analysis of crime drivers and an assessment of needs and available resources.</p> <p>Develop a strategy that offers a continuum of approaches to address the drivers of crime, including potentially, enforcement, prevention, intervention, and revitalization strategies.</p> <p>Establish effective partnerships both to provide solutions along the continuum and commit resources to sustain what works. Implement a comprehensive and coordinated strategy with support from the BCJI TTA provider.</p> <p>Assess program implementation in collaboration with the University of Texas and other research partners, and plan for sustainment of effective strategies with private and public funding.</p>

BJA 7 Questions

Question: What were your accomplishments during reporting period?

Response:

During the reporting period, the mobile walking beat continued to make new neighborhood contacts and connect community members to resources; community engagement coordinator and Restore Rundberg Revitalization Team meetings and efforts brought the project closer to achieving overarching goals; and, the University of Texas at Austin presented their year end report at the RRRT December meeting. The University's power point presentation was posted online. The City's juvenile services contractor, Council on At-Risk Youth (CARY), provided services for target area youth on four campuses.

Question: What goals were accomplished, as they relate to your grant application?

Response:

The cross-sector partnership is steadily reaching the project goals of improving public safety, addressing social impacts (including physical disorder, social economic status and resources, and collective efficacy) and, ensuring the long-term planning and implementation of neighborhood-based revitalization strategies.

Question: What problems/barriers did you encounter, if any, within the reporting period that prevented you from reaching your goals or milestones?

Response:

None

Question: Is there any assistance that BJA can provide to address any problems/barriers identified in question #3?

Question: What major activities are planned for the next 6 months?

Response:

The cross-sector partnership will strive to complete all activities described in the implementation plan, to include the mobile walking beat, marketplace, community engagement, Restore Rundberg Revitalization Team efforts (prioritized objectives), and juvenile services programming - to include a month-long camp for the target area at-risk youth.

Question: Based on your knowledge of the criminal justice field, are there any innovative programs/accomplishments that you would like to share with BJA?

Response:

Not at this time. The University, City, Revitalization Team, and community members are developing a "final report and replication guide" that will be shared at the conclusion of the grant period.
