

New Austin Build + Connect (AB+C) Portal is Live

The AB+C Portal Replacement went live this weekend with a fresh new look.

Registered users will find it easier to manage single or multiple projects. User-friendly drag-and-drop features make it simpler to submit permit applications and other documents. Other users will find a cleaner interface for public property search activities.

AB+C Portal users can:

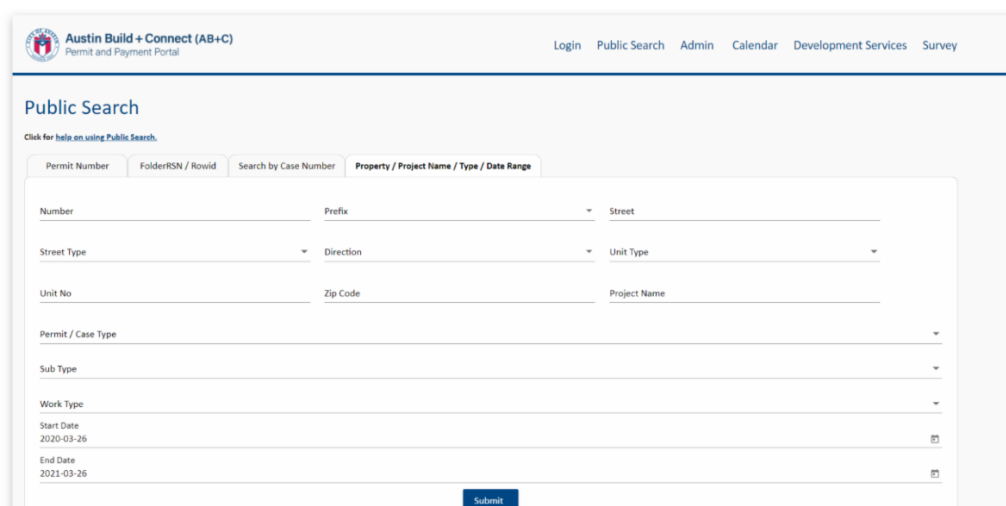

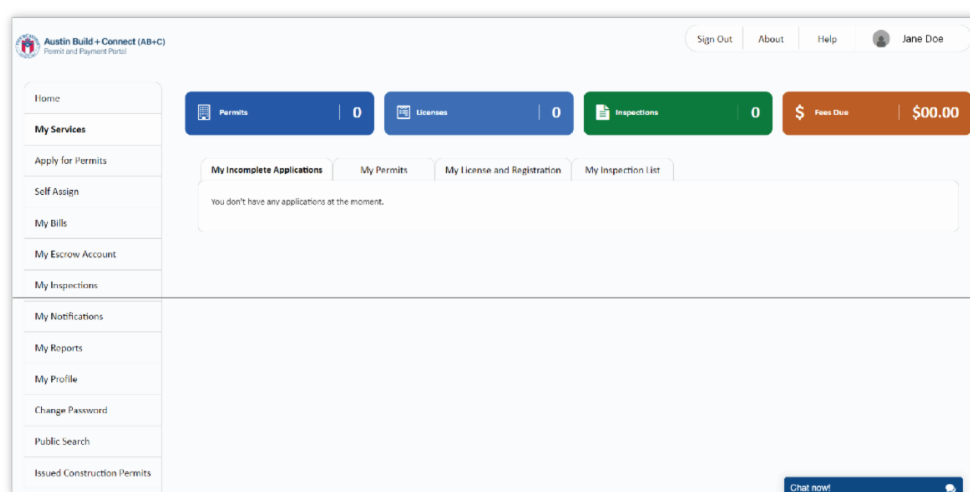

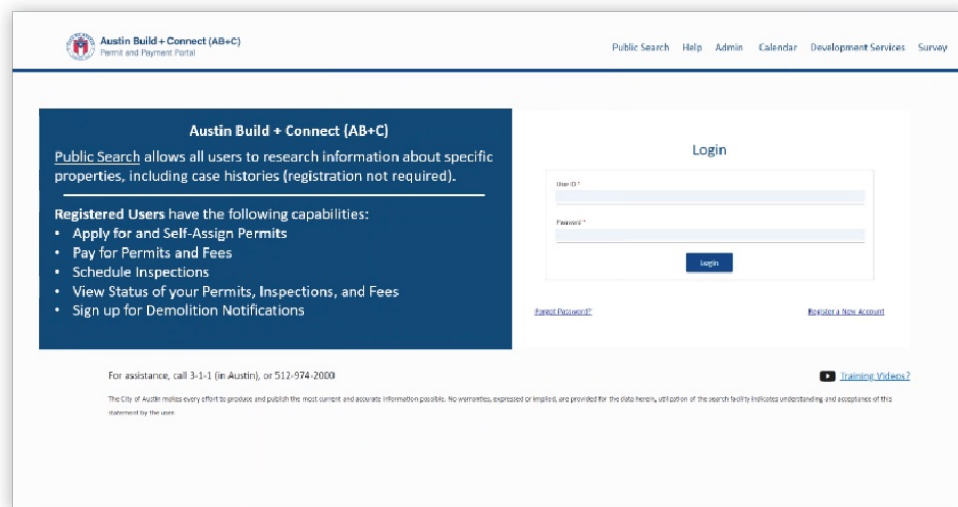

- Apply for, self assign, and pay for permits.
- Check application status throughout the development process.
- Schedule all types of inspections.
- Set up demolition notifications.

Over time, DSD will add new features and incorporate more business transactions, based on business needs and available resources. Future enhancements will focus on continuing to simplify and further streamline the development process.
