

City of Austin:

Site Plan Metric Report

This report provides regular updates on volume and performance of the site plan review process. It includes metrics at a high level and breaks them down by each phase of the process to provide a comprehensive view. Data is provided by month and by Fiscal Quarter (FQ). Measures marked with an asterisk (*) are considered lagging measures. This means they are reported in the time period in which the permit is issued. However, they incorporate review work completed during previous periods. Durations are measured in calendar days.

Austin Development Services Data Disclaimer:
Austin Development Services' database is continuously updated, so reports run at different times may produce different results. Care should be taken when comparing against other reports as different data collect on methods and different data sources may have been used.
