

Join the movement and change your commute! The City of Austin Employee Commute Program helps City of Austin employees understand their sustainable commute options and take action to reduce their drive-alone work trips, especially during peak travel times. The goal is to minimize the impact these commutes have on traffic congestion and air quality in our region.

TELEWORK

The City of Austin's telework program allows employees to work from home if the Department Director or Division Manager determines that the employee's job content & job performance are appropriate for a telework schedule. Teleworking just one day a week is enough to have a major impact on traffic congestion. Ask your supervisor about teleworking & the necessary forms to get started.
