AUSTIN WATER
Austin Water provides safe, reliable, high quality, sustainable, and affordable water services that have met the community’s needs for more than 100 years. Austin Water’s 1,200 employees serve more than one million people in the Austin metropolitan area, both retail and wholesale, across more than 548 square miles. The utility draws water from the Colorado River into three regional water treatment plants, Handcox, Davis, and Ullrich, which have a combined capacity of 335 million gallons per day.

Austin Water has two wastewater treatment plants, Walnut Creek and South Austin Regional, that can receive up to 150 million gallons per day of sewage to treat. Wastewater is cleaned into high-quality effluent that is safely returned to the Colorado River to augment environmental flows. More than a billion gallons of this high-quality effluent were reclaimed in Fiscal Year 2016-17 for outdoor irrigation, industrial cooling, manufacturing, and other uses.

Austin Water’s award-winning Water Conservation Division successfully guided customers through a historic drought with public outreach and incentive programs for customers.

The utility also manages 43,000 acres of wildlands that protect water quality and endangered species habitats.
