Zika Situational Report – Friday, June 1, 2017

Travis County

- As for May 31, 2017, Travis County reported 25 cases of illness due to Zika virus:

Year	Zika cases*	Pregnant women enrolled in the US Zika Pregnancy Registry	Liveborn infants with birth defects
2016	20	7	1
2017	5	5	0

*This count includes Zika confirmed and probable cases, as well as any specimen with laboratory evidence of a flavivirus infection (flaviviruses included Zika, Dengue, and West Nile)

- All the Zika virus infections or suspected cases reported traveling to countries where these viruses are being transmitted by mosquitos during the incubation period for that virus.
- There are no reported severe illnesses or deaths from Zika virus.
- One infant born (September 2016) in Travis County with microcephaly had the Zika virus disease. The child is the first confirmed case of congenital Zika virus in Travis County. The mother emigrated in August 2016.

Texas

- As of May 30, 2017, a total of 335 Zika virus cases have been reported in Texas (323 during 2016 and 12 in 2017).
- Texas has reported 337 pregnant women into the CDC's Zika Pregnancy Registry.

United States (as of May 31, 2017)

- 5,285 laboratory-confirmed Zika virus disease cases have been reported to Centers for Disease Control and Prevention (CDC) from 49 U.S. states and the District of Columbia.
 - 5,013 travel-associated Zika cases,
 - 224 locally acquired mosquito-borne Zika cases (218 in Florida and 6 in Texas)
 - 46 cases acquired through other routes, including sexual transmission

- 1 laboratory acquired Zika case
- 1 person to person through an unknown route

As of May 23, 2017, CDC reported within the U.S states and the District of Columbia:

- 1, 883 pregnant women with laboratory evidence of possible Zika virus infection.
- Outcomes of pregnancies with laboratory evidence of possible Zika virus infection:
 - 72 liveborn infants with birth defects
 - 8 pregnancy losses with birth defects

Other news

- As of May 29, Mexico reports 8,772 confirmed Zika cases. From the four Mexican states bordering Texas, there are 854 from Nuevo Leon, 154 from Tamaulipas, and 62 from Coahuila. Chihuahua doesn't have any case reported.
- As of April 27, over 36,583 Zika virus cases have been reported in US territories.

Austin Public Health (APH) staff are available 24/7 to support healthcare providers in responding to any patient with a suspect Zika virus infection. APH has created a website for healthcare providers and the public that provide information:
