Terracon Project No. 96197913

Dear Mr. Balestiere:

Terracon Consultants, Inc. (Terracon) is pleased to submit the enclosed Phase I Environmental Site Assessment (ESA) report for the above-referenced site. This assessment was performed in accordance with Terracon Supplement to Agreement Task Order No. 96197913 dated March 18, 2022.

We appreciate the opportunity to be of service to you on this project. In addition to Phase I services, our professionals provide geotechnical, environmental, construction materials, and facilities services on a wide variety of projects locally, regionally and nationally. For more detailed information on all of Terracon's services please visit our website at [www.terracon.com](http://www.terracon.com). If there are any questions regarding this report or if we may be of further assistance, please do not hesitate to contact us.

Sincerely,  
**Terracon Consultants, Inc.**

## **EXECUTIVE SUMMARY**

This Phase I Environmental Site Assessment (ESA) was performed in accordance with Terracon Supplement to Agreement Task Order No. 96197913 dated March 18, 2022, and was conducted consistent with the procedures included in ASTM E1527-13, *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process*. The ESA was conducted under the supervision or responsible charge of Melissa S. Stevens, Environmental Professional. Melissa S. Stevens performed the site reconnaissance on April 1, 2022.

### **Findings and Opinions**

A summary of findings is provided below. It should be recognized that details were not included or fully developed in this section, and the report must be read in its entirety for a comprehensive understanding of the items contained herein.

#### Site Description and Use

The 5.468-acre site is currently addressed as 6909 Ryan Drive in Austin, Travis County, Texas, and is improved with several warehouse-type buildings. At the time of the site reconnaissance, the site was unoccupied; however, the Austin Energy division was using a portion of the parking lot as storage.

#### Historical Information

The historical review indicated that the site was agricultural land from at least 1896 until the late 1940s when warehouse-type buildings were developed. The site had been occupied by various construction and automotive related businesses from its development until 1996 when the City of Austin's Austin Energy division bought the site. The City occupied the site until approximate two years ago when they began to vacate the site. The surrounding properties were agricultural land from at least 1896 until the 1940s when commercial development commenced. By the 1950s, residential development commenced on properties to the southwest of the site. The site and surrounding properties have continued to be mixed-use development through the present day.

#### Records Review

A review of available regulatory database information was conducted for specified federal and state agencies. Review of the regulatory databases identified forty-three on- and off-site regulated facilities within the specified search distances.

#### G.I. Distributing

G.I. Distributing is identified as an on-site USTAUSTIN facility. This facility was identified during the review of City of Austin Historical Underground Storage Tank records. According to these records, on March 24, 1949 the city council approved the application of G.I. Distributing Company for permission to operate a "private gasoline plant consisting of a 1,000-gallon underground tank and electric pump for the sole purpose of servicing their own motor equipment and from which no

gasoline is to be sold,” the property “is designated as 1.477 acres out of the Richcreek 19-acre tract in the City of Austin, Travis County, Texas.” The tank and pipe construction material, and current status (present or removed from the ground) of the tank are unknown. In addition, the exact location of this UST could not be determined based on this information; however, based on the historical information, this UST was likely located to the north or west of the on-site 920 Justin Lane building. Based on the on-site investigation (further discussed below), no further investigation of the historical tank appears warranted at this time. However, during future site redevelopment activities, if any tanks and/or unanticipated impacted media associated with this facility is encountered, the tank should be removed and disposed of in accordance with applicable regulations and any impacted media should be characterized, removed and disposed of in accordance with applicable regulations.

#### G I Surplus Distributing

G I Surplus Distributing is identified as an on-site USTAUSTIN facility. This facility was identified during the review of City of Austin Historical Underground Storage Tank records. According to these records, on October 7, 1954 the city council approved the application of R. B. Okley for permission to operate a “private gasoline plant consisting of a 1,000-gallon underground tank and electric pump for the sole purpose of servicing his own motor equipment and from which no gasoline is to be sold, upon property located on the north side of Justin Lane, which property is designated as part of G.I. Surplus Distributing Company tract, in the City of Austin, Travis County, Texas, and locally known as 920 Justin Lane.” The tank and pipe construction material, and current status (present or removed from the ground) of the tank are unknown. In addition, the exact location of this UST could not be determined based on this information; however, based on the historical information, this UST was likely located to the north or west of the on-site 920 Justin Lane building. Based on the on-site investigation (further discussed below), no further investigation of the historical tank appears warranted at this time. However, during future site redevelopment activities, if any tanks and/or unanticipated impacted media associated with this facility is encountered, the tank should be removed and disposed of in accordance with applicable regulations and any impacted media should be characterized, removed and disposed of in accordance with applicable regulations.

#### Glastron Sales Inc.

Glastron Sales Inc. is identified as an on-site USTAUSTIN facility. Based on the review of the city directories, this facility was identified on-site in the 1958 directory. This facility was identified during the review of City of Austin Historical Underground Storage Tank records. According to these records, on April 24, 1958 the city council approved the application of Glastron Sales, Inc. for permission to operate a “private gasoline plant consisting of a 1,000-gallon underground tank and electric pump for the sole purpose of servicing their own motor equipment and from which no gasoline is to be sold, upon property located on the north side of Justin Lane, which property as an unplatted 1.513 acres out of the Richcreek 19.5 acre tract, ....., and locally known as 920 Justin Lane.” The tank and pipe construction material, and current status (present or removed from the ground) of the tank are unknown. In addition, the exact location of this UST could not be determined based on this information; however, based on the historical information, this UST

was likely located to the north or west of the on-site 920 Justin Lane building. Based on the on-site investigation (further discussed below), no further investigation of the historical tank appears warranted at this time. However, during future site redevelopment activities, if any tanks and/or unanticipated impacted media associated with this facility is encountered, the tank should be removed and disposed of in accordance with applicable regulations and any impacted media should be characterized, removed and disposed of in accordance with applicable regulations.

#### Comfort Supply/Railton Manufacturing

Comfort Supply/Railton Manufacturing is identified as an on-site LPST, UST, and USTAUSTIN facility. Based on the review of the city directories, Comfort Supply and Railton Manufacturing were identified on-site in 1987-1988. According to the regulatory database review, this facility formerly operated one 2,000-gallon steel diesel UST and one 8,000-gallon steel gasoline UST, which were reportedly installed in 1987 and removed from the ground in 1991. No information regarding spill prevention equipment or release detection equipment was reported in the regulatory database for the former USTs. In 1991, a hydrocarbon release was reported as not impacting groundwater with no apparent threats or impacts to receptors. Final concurrence was issued and the case is closed. Terracon personnel requested and obtained this facility's regulatory file from the TCEQ Central Records office. Based on review of this file, during the removal of these former USTs, the soil was identified as having elevated concentrations of TPH and tank pit water was identified as having elevated concentrations of TPH and BTEX. As a result, the tank pit was overexcavated and a groundwater treatment system was installed to treat the water recovered from the tank pit. The groundwater treatment system was later removed and additional soil samples were collected following the overexcavation activities. The analytical results indicated elevated concentrations of TPH in the soils on the western portion of the north excavation wall. In 1996, three groundwater monitoring wells were installed and the groundwater sampled for TPH and BTEX. The results indicated that the TPH was at or below detection limits and the BTEX was below detection limits. According to a letter from the TCEQ, dated July 17, 1996, they concur that this facility "has met the closure requirements." Based on the information reviewed and issuance of regulatory closure, these former USTs constitute a historical recognized environmental condition (HREC) in connection with the site. At this time, no further environmental investigation with regards to this facility appears warranted. However, during future site redevelopment activities, if any impacted materials are encountered, they should be removed and disposed of in accordance with applicable regulations. The site has been affected by a documented release of petroleum hydrocarbons. If soils and groundwater located on the site are to be disturbed during future excavations, proper procedures should be followed with respect to worker health and safety and any affected soil or groundwater encountered should be properly handled and disposed in accordance with local and state regulations.

#### 6909 Ryan Drive Property

6909 Ryan Drive Property is identified as an on-site VCP facility. According to the regulatory database, the site (approximately 5.602-acres) was entered into the VCP program in 2021 based upon volatile organic compounds (VOCs) and chlorinated solvents detected in the groundwater

and metals detected in the soils. As a part of the VCP, Terracon prepared an Affected Property Assessment Report (APAR) and excerpts of this report are as follows.

“Potential On-site Sources

*The primary known on-site source for contaminants [was] the UST system removed from the ground in 1991. Site assessment conducted at that time indicated that groundwater was unaffected, and LPST site closure was issued by TCEQ in 1996. The recent site assessment confirmed that [chemicals of concern (COC)] concentrations in soil and groundwater in this area do not exceed the [residential assessment levels (RALs)] (soil boring/monitoring well MW-3, which is located to the west of the former UST).*

*A former automotive shop was identified in the northeast corner of the on-site property, and was evaluated by MW-8.*

*The ESA [further discussed in Section 3.7] identified several historical businesses whose operations may or may not have including chemical usage. Barnhart Manufacturing and Supply was located at the same address as the Comfort Supply facility (evaluated by soil borings/monitoring wells MW-1, MW-3, MW-5, and MW-8). Texas Urethanes was located at 9611 Ryan Drive (evaluated by MW-2 and MW-6), and Underground VW was located at 9615 Ryan Drive (evaluated by MW-7).*

*There is no evidence of on-site significant surface releases that may have penetrated the pervasive on-site surface pavement to affect underlying shallow soils. There is also no evidence that City of Austin stored PCB-containing equipment at the site.*

Off-site Source

*The ESA identified a major potential off-site source area associated with a former chemical manufacturing facility operated by Jefferson Chemical Company, Texaco Chemical Company, and Huntsman Chemical Corporation (hereinafter, Huntsman site). This off-site source area appears to be a source of chlorinated solvents and petroleum hydrocarbons in groundwater at the on-site property. The historic Huntsman facility was a large, triangular tract bounded to the east by North Lamer Boulevard, to the west by the railroad easement, and to the north by Morrow Street. It is located adjacent to the northeast of the on-site property, separated only by the railroad easement. Please note that the Huntsman Tract has been redeveloped with Crestview Station and associated commercial buildings and residential neighborhoods.*

*Given the nature of the facility and documented historic releases, an extensive amount of environmental investigation was conducted at the Huntsman facility including an investigation of both soil and groundwater through the installation of soil borings, groundwater monitoring wells, and trenching activities. The Huntsman site assessment indicated that groundwater at that site was affected with both petroleum hydrocarbons and chlorinated solvents, and also documented that groundwater plume(s) extended off-site to the west-southwest of Huntsman (i.e., in the general direction of the on-site property). The TCEQ VCP (VCP ID No. 1830) issued a Certificate*

*of Completion for the Huntsman site in 2007. The COC indicated that groundwater at the Huntsman site was classified as a Class 3 resource, and a restrictive covenant was recorded due to groundwater concentrations exceeding the TCEQ Tier 1 PCLs for Class 3 groundwater.*

*The off-site source area was intended to be evaluated by MW-4 and MW-8, located along the northeastern property boundary near the Huntsman site. However, the site assessment results suggest that the off-site Huntsman source area has affected groundwater throughout the northern portion of the on-site property.*

*The detected COC concentrations in soil and groundwater at the site did not exceed the RALs (or [protective concentration levels (PCLs)]). Based on the lack of a [protective concentration level exceedance (PCLE)] Zone, a response action is not warranted at the site. Threatened or affected receptors associated with the detected COC concentrations were not identified.*

#### Recommendations

*The COC concentrations detected in soil and groundwater samples collected at the site did not exceed the RALs, and there are no PCLE Zones or warranted response actions for the site.”*

Based on this information, the site has been impacted by releases from prior on- and off-site operations, and hence, an REC in connection with the site. However, no further environmental investigation appears warranted at this time, based on the extensive subsurface investigations on the site.

#### Texaco Chemical Company, Huntsman Petrochemical Corporation, Austin Laboratories, Crestview Station

A former chemical manufacturing facility operated by Jefferson Chemical Company, Texaco Chemical Company, and Huntsman Chemical Corporation (hereinafter, Huntsman) was identified as a CERCLIS, CERCLIS-NFRAP, SEMS ARCHIVE, RCRA TSD, RCRA NON GEN, HIST RCRA GEN, RCRA CORRACTS, CLI, IHW, IHW CORR ACTION, UST, USTAUSTIN, and VCP facility and was located to the adjoining northeast of the site (across the railroad tracks and addressed as 7114 North Lamar Boulevard) and topographically up to cross gradient relative to the site. According to historical resources and information obtained from various websites, this facility operated at this location from 1949 until the mid-2000s. The Austin location was reportedly a research and development laboratory which developed products used in “a variety of common consumer products, including soaps, detergents, carpeting, foam cushions, automobile parts and in technologies such as newspaper recycling.”

Given the nature of the facility and documented historic releases, an extensive amount of environmental investigation was conducted at the facility including an investigation of both soil and groundwater through the installation of soil borings, groundwater monitoring wells, and trenching activities. This investigation work was conducted by Weston Solutions, Inc. (hereinafter, Weston). Based on a review of regulatory records, the Huntsman property was divided into two separate partial response action areas. The majority of the facility was included in Partial

Response Action Area 1 (PRAA-1), and an approximate 3-acre tract in the vicinity of an identified groundwater benzene plume was designated as Partial Response Action Area 2 (PRAA-2). Based on available maps, PRAA-1 was located adjoining the site (across the railroad tracks) and PRAA-2 was located approximately 375 feet north of the site.

Based on Terracon's review of the Affected Property Assessment Report (APAR, dated December 2006) and Response Action Completion Report (RACR, dated February 2007), it appears that the overall assessment and remediation plan initiated by Weston was effective in achieving the removal of buried waste materials from the Huntsman facility.

Two areas of the former Huntsman facility were identified with groundwater impact including an area in the vicinity of Banyon Street (located at least 1,625 feet northeast of the site) within PRAA-1 where elevated concentrations of perchloroethylene (PCE) were documented, and in the west-central portion of the facility within PRAA-2 where elevated concentrations of benzene were documented. Further investigation identified a groundwater benzene plume extending from the Huntsman facility in a west/southwesterly direction, across the adjoining railroad tract, and beneath a residential development (located to the northwest of the site). According to a map of the identified groundwater benzene plume, this plume is located approximately 375 feet north of the site.

Both PRAA-1 and PRAA-2 have received regulatory closure through the TCEQ Voluntary Cleanup Program. A Certificate of Completion was issued by the TCEQ dated July 16, 2007 for PRAA-1 stating that the reports demonstrated "...attainment of Texas Risk Reduction Program Remedy Standard A for residential land use...". A Certificate of Completion was issued by the TCEQ dated September 27, 2007 for PRAA-2 stating that the reports demonstrated "...attainment of Texas Risk Reduction Program Remedy Standard A for residential land use..."; however, since the area of PRAA-2 "overlies groundwater which contains concentrations of chemicals exceeding the TCEQ Tier 1 protective concentrations for Class 3 groundwater", a restrictive covenant was placed on this area. The restrictions read as follows: "Use of and exposure to the groundwater at the partial response action area for any purpose is prohibited until such a time when all of the chemicals of concern in the groundwater within the area specified in Exhibit "A" no longer exceed levels which exceed TCEQ Tier 1 protective concentration levels for Class 3 groundwater." This restrictive covenant was subsequently deed recorded.

Based on this information, the site has been impacted by releases from prior off-site operations, and hence, an REC in connection with the site. However, no further environmental investigation appears warranted at this time, based on the extensive subsurface investigations on the site. Although not part of the ESA scope of services, it should be noted however, that based on the continued presence of benzene within the shallow groundwater in the vicinity of the site, a risk exists for vapor encroachment (VE) into future buildings built. The State of Texas does not currently regulate VE evaluations; therefore, potential risks associated with future VE from the existing contamination would not be covered under the current VCP closure. Due to the potential

risks of VE from the existing benzene plume, it is recommended that further evaluation of the shallow soil gas be conducted in the vicinity of the groundwater plume to assess the potential risk.

Based upon facility characteristics, environmental setting, and distance from the site, the remaining identified facilities do not appear to constitute RECs in connection with the site as specified within the text of the report.

### Site Reconnaissance

With the exception of the observed monitoring wells, no items/features of potential environmental concern were noted during the site reconnaissance.

### Adjoining Properties

An unoccupied building, formerly occupied by National Wholesale Supply Inc., is located to the northwest of the site. Railroad tracks, followed by Midtown Commons at Crestview Station is located to the northeast of the site. Ryan Drive, followed by residences are located to the southwest of the site. Vacant buildings, Structures, KibRob Construction, former Nugent Grocery, former automotive shop, Dia's Market, and Justin Lane, followed by Argosy Apartments at Crestview are located to the southeast of the site. Indications of RECs were not identified with the current adjoining properties.

### **Significant Data Gaps**

No significant data gaps were identified.

### **Conclusions**

We have performed a Phase I ESA consistent with the procedures included in ASTM Practice E 1527-13 at 6909 Ryan Lane, Austin, Travis County, Texas, the site. Recognized environmental conditions were identified in connection with the site and include the following:

- Former USTAUSTIN facilities documented on-site, and
- Former off-site operations associated with the Huntsman site.

### **Recommendations**

Based on the scope of services, limitations, and conclusions of this assessment, several RECs were identified in connection with the site; however, based on the extensive environmental subsurface investigations on the site, no further environmental investigation appear warranted at this time.

- Terracon recommends that the client continue to comply with TCEQ's directives regarding future site redevelopment activities and the VCP closure requirements.

- As soils located on the site are to be disturbed during future site redevelopment activities, proper procedures should be followed with respect to worker health and safety.
- During future site redevelopment activities, if any tanks and/or unanticipated impacted media associated with the USTAUSTIN facilities are encountered, the tanks should be removed and disposed of in accordance with applicable regulations and any impacted media should be characterized, removed and disposed of in accordance with applicable regulations.

## 1.0 INTRODUCTION

### 1.1 Site Description

<b>Site Name</b>	Former Austin Energy Facility
<b>Site Location/Address</b>	6909 Ryan Lane, Austin, Travis County, Texas
<b>Land Area</b>	Approximately 5.468-acres
<b>Site Improvements</b>	Several warehouse-type buildings
<b>Anticipated Future Site Use</b>	Residential mixed use development
<b>Purpose of the ESA</b>	Voluntary Cleanup Program closure

The location of the site is depicted on Exhibit 1 of Appendix A, which was reproduced from a portion of the USGS 7.5-minute series topographic map. The site and adjoining properties are depicted on the Site Diagram, which is included as Exhibit 2 of Appendix A. Acronyms and terms used in this report are described in Appendix F.

### 1.2 Scope of Services

This Phase I ESA was performed in accordance with Terracon Supplement to Agreement Task Order No. 96197913 dated March 18, 2022, and was conducted consistent with the procedures included in ASTM E1527-13, *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process*. The purpose of this ESA was to assist the client in developing information to identify RECs in connection with the site as reflected by the scope of this report. This purpose was undertaken through user-provided information, a regulatory database review, historical and physical records review, interviews, including local government inquiries, as applicable, and a visual noninvasive reconnaissance of the site and adjoining properties. Limitations, ASTM deviations, and significant data gaps (if identified) are noted in the applicable sections of the report.

ASTM E1527-13 contains a new definition of "migrate/migration," which refers to "the movement of hazardous substances or petroleum products in any form, including, for example, solid and liquid at the surface or subsurface, and vapor in the subsurface." By including this explicit reference to migration in ASTM E1527-13, the Standard clarifies that the potential for vapor migration should be addressed as part of a Phase I ESA. This Phase I ESA has considered vapor migration in evaluation of RECs associated with the site.

### 1.3 Standard of Care

This ESA was performed in accordance with generally accepted practices of this profession, undertaken in similar studies at the same time and in the same geographical area. We have endeavored to meet this standard of care, but may be limited by conditions encountered during

performance, a client-driven scope of work, or inability to review information not received by the report date. Where appropriate, these limitations are discussed in the text of the report, and an evaluation of their significance with respect to our findings has been conducted.

Phase I ESAs, such as the one performed at this site, are of limited scope, are noninvasive, and cannot eliminate the potential that hazardous, toxic, or petroleum substances are present or have been released at the site beyond what is identified by the limited scope of this ESA. In conducting the limited scope of services described herein, certain sources of information and public records were not reviewed. It should be recognized that environmental concerns may be documented in public records that were not reviewed. No ESA can wholly eliminate uncertainty regarding the potential for RECs in connection with a property. Performance of this practice is intended to reduce, but not eliminate, uncertainty regarding the potential for RECs. No warranties, express or implied, are intended or made. The limitations herein must be considered when the user of this report formulates opinions as to risks associated with the site or otherwise uses the report for any other purpose. These risks may be further evaluated – but not eliminated – through additional research or assessment. We will, upon request, advise you of additional research or assessment options that may be available and associated costs.

#### **1.4 Additional Scope Limitations, ASTM Deviations and Data Gaps**

Based upon the agreed-on scope of services, this ESA did not include subsurface or other invasive assessments, vapor intrusion assessments or indoor air quality assessments (i.e. evaluation of the presence of vapors within a building structure), business environmental risk evaluations, or other services not particularly identified and discussed herein. Credentials of the company (Statement of Qualifications) have not been included in this report but are available upon request. Pertinent documents are referred to in the text of this report, and a separate reference section has not been included. Reasonable attempts were made to obtain information within the scope and time constraints set forth by the client; however, in some instances, information requested is not, or was not, received by the issuance date of the report. Information obtained for this ESA was received from several sources that we believe to be reliable; nonetheless, the authenticity or reliability of these sources cannot and is not warranted hereunder. This ESA was further limited by the following:

- City directories and Sanborn maps are copyright protected and, therefore, reproductions are not provided in this report.

An evaluation of the significance of limitations and missing information with respect to our findings has been conducted, and where appropriate, significant data gaps are identified and discussed in the text of the report. However, it should be recognized that an evaluation of significant data gaps is based on the information available at the time of report issuance, and an evaluation of information received after the report issuance date may result in an alteration of our conclusions, recommendations, or opinions. We have no obligation to provide information obtained or discovered by us after the issuance date of the report, or to perform any additional services, regardless of whether the information would affect any conclusions, recommendations, or

opinions in the report. This disclaimer specifically applies to any information that has not been provided by the client.

This report represents our service to you as of the report date and constitutes our final document; its text may not be altered after final issuance. Findings in this report are based upon the site’s current utilization, information derived from the most recent reconnaissance and from other activities described herein; such information is subject to change. Certain indicators of the presence of hazardous substances or petroleum products may have been latent, inaccessible, unobservable, or not present during the most recent reconnaissance and may subsequently become observable (such as after site renovation or development). Further, these services are not to be construed as legal interpretation or advice.

### 1.5 Reliance

This ESA report is prepared for the exclusive use and reliance of City of Austin. Use or reliance by any other party is prohibited without the written authorization of City of Austin and Terracon Consultants, Inc. (Terracon).

Reliance on the ESA by the client and all authorized parties will be subject to the terms, conditions and limitations stated in the proposal, ESA report, and Terracon’s Agreement for Services. The limitation of liability defined in the Agreement for Services is the aggregate limit of Terracon’s liability to the client and all relying parties.

Continued viability of this report is subject to ASTM E1527-13 Sections 4.6 and 4.8. If the ESA will be used by a different user (third party) than the user for whom the ESA was originally prepared, the third party must also satisfy the user’s responsibilities in Section 6 of ASTM E1527-13.

### 1.6 Client Provided Information

Prior to the site visit, Mr. Eric Stager, client’s representative, was asked to provide the following user questionnaire information as described in ASTM E1527-13 Section 6.

#### Client Questionnaire Responses

Client Questionnaire Item	Client Did Not Respond	Client’s Response	
		Yes	No
Specialized Knowledge or Experience that is material to a REC in connection with the site.		X	
Actual Knowledge of Environmental Liens or Activity Use Limitations (AULs) that may encumber the site.			X
Actual Knowledge of a Lower Purchase Price because contamination is known or believed to be present at the site.			X

Client Questionnaire Item	Client Did Not Respond	Client's Response	
		Yes	No
Commonly Known or Reasonably Ascertainable Information that is material to a REC in connection with the site.		X	
Obvious Indicators of Contamination at the site.			X

According to Mr. Stager, he has “visited the site several times since the early 2000s as part of [their] environmental compliance programs.” Mr. Stager stated that the “site has primarily been used by AE [Austin Energy] as a storage area for electrical equipment, relay gear, and other electronics waiting for reclamation or recycling.” Mr. Stager further stated that “there was minimal use of chemicals or oil at this facility (oil-filled equipment was not sent to this facility).” Terracon’s consideration of the client provided information did not identify RECs. A copy of the questionnaire is included in Appendix C.

## 2.0 PHYSICAL SETTING

Physical Setting Information		Source
<b>Topography</b>		
Site Elevation	Approximately 720 feet above sea level	USGS Topographic Map, Austin East, Texas Quadrangle, 2019 (Appendix A)
Topographic Gradient	Gently sloping towards the south-southeast	
Closest Surface Water	Hancock Creek, approximately 2,100 feet northwest-west of the site	

Physical Setting Information		Source
<b>Soil Characteristics</b>		
Soil Type	Urban land and Austin soils	Travis County, TX USDA, Soil Conservation Services Soil Survey issued 1974
Description	Based on review of the Travis County soil survey, this soil type consists of nearly level to gently undulating undifferentiated soils occupying smooth ridges and side slopes. It is comprised of about 60 percent Urban land, about 30 percent Austin soils, and about 10 percent other soils. The more sloping areas are cut or filled to a depth of a few inches or up to as much as 2 feet. Although the original soils have been altered, the basic characteristics remain essentially the same. The principal soil characteristics that affect urban development are shrink-swell potential, as it affects foundations and pavements; corrosivity, as it affects uncoated steel; and percolation rate, as it affects septic systems.	
<b>Geology/Hydrogeology</b>		
Formation	Austin Group	"Austin Sheet," Geologic Atlas of Texas, Bureau of Economic Geology, The University of Texas at Austin 1992
Description	Chalk, marly limestone, and limestone, light gray, soft to hard, thin to thick bedded, massive to slightly nodular	
Estimated Depth to First Occurrence of Groundwater	Greater than five feet bgs	On-site Investigations further discussed in Sections 3.7 and 4.1
*Hydrogeologic Gradient	Not known - may be inferred to be parallel to topographic gradient (primarily to the south-southeast)	

\* The groundwater flow direction and the depth to shallow, unconfined groundwater, if present, would likely vary depending upon seasonal variations in rainfall and other hydrogeological features. Without the benefit of on-site groundwater monitoring wells surveyed to a datum, groundwater depth and flow direction beneath the site cannot be directly ascertained.

### 3.0 HISTORICAL USE INFORMATION

Terracon reviewed the following historical sources to develop a history of the previous uses of the site and surrounding area, in order to help identify RECs associated with past uses. Copies of selected historical documents are included in Appendix C.

### 3.1 Historical Topographic Maps, Aerial Photographs, Sanborn Maps

Readily available historical USGS topographic maps, selected historical aerial photographs (at approximately 10 to 15 year intervals) and historical fire insurance maps produced by the Sanborn Map Company were reviewed to evaluate land development and obtain information concerning the history of development on and near the site. Reviewed historical topographic maps, aerial photographs and Sanborn maps are summarized below.

Historical fire insurance maps produced by the Sanborn Map Company were requested from ERIS to evaluate past uses and relevant characteristics of the site and surrounding properties. ERIS provided Sanborn maps as summarized below.

- Topographic map: Austin, Texas, published **1896** (1:125,000)
- Topographic map: Austin, Texas, published **1910** (1:125,000)
- Aerial photograph: Agricultural Stabilization and Conservation Service (ASCS), **1940**, 1" = 500'
- Aerial photograph: United States Geological Survey (USGS), **1952 and 1954**, 1" = 500'
- Topographic map: Austin East, Texas, published **1954** (1:24,000)
- Topographic map: Austin, Texas, published **1955** (1:62,500)
- Aerial photograph: ASCS, **1958**, 1" = 500'
- Sanborn Fire Insurance Map: **1961**, Sheets 341 and 342
- Topographic map: Austin East, Texas, published **1966** (1:24,000)
- Aerial photograph: USGS, **1966**, 1" = 500'
- Sanborn Fire Insurance Map: **1971**, Sheets 341 and 342
- Topographic map: Austin East, Texas, published 1966, photorevised **1973** (1:24,000)
- Aerial photograph: USGS, **1973**, 1" = 500'
- Aerial photograph: Texas Department of Transportation (TxDOT), **1980**, 1" = 500'
- Topographic map: Austin East, Texas, published **1988** (1:24,000)
- Aerial photograph: TxDOT, **1988**, 1" = 500'
- Aerial photograph: USGS, **1995**, 1" = 500'
- Aerial photograph: United States Department of Agriculture (USDA), **2004, 2005, 2008, 2010, 2012, 2014, 2016, 2018, and 2020**, 1" = 500'

#### Historical Maps and Aerial Photographs

Direction	Description
Site	Agricultural land (1896-1940); an unimproved road evident (1940); warehouse-type buildings are evident (1952-2020); which were occupied by various commercial-type tenants on the Sanborn maps and included Ranne Insulation Company (1959-1961), Standard Glass Products Inc. (1959-1961), Wholesale Industrial & Plumbing Supplies (1971), Insulation Products (1971), plumbing (1971), sheet metal working (1971), and building materials (1971)

Direction	Description
Northwest	Agricultural land (1896-1940); a warehouse-type building is evident (1952); a warehouse-type building, followed by residences (1954-2020); only a portion of the properties to the northwest are noted on the Sanborn maps which included Cole Products Corporation (1959-1961), and trailer home manufacturing (1971)
Northeast	Railroad tracks, followed by undeveloped land (1896-1910); railroad tracks, followed by warehouse-type buildings (1940); railroad tracks, followed by a <b>chemical manufacturing plant (known as Jefferson Chemical Company)</b> (1952-2005); a <b>filling station</b> is noted across the railroad tracks on the Sanborn map (1959-1971); the chemical manufacturing plant property is being redeveloped into the present day Midtown Commons mixed use development (2008); the present day Midtown Commons is evident (2010-2020); the Midtown Commons has expanded (2014-2020)
Southwest	Undeveloped land and a creek tributary (1896-1910); agricultural land with rural buildings evident (1940); residencies are evident (1952-2020); Ryan Drive is evident (1954-2020)
Southeast	Agricultural land (1896-1940); an unimproved road is evident (1940); Justin Lane and warehouse-type buildings are evident (1952-2020); which were occupied by Reese Lumber, a store, and a <b>filling station</b> on the Sanborn maps (1959-1971); a drive-in theater is evident across Justin Lane (1952-1961); the drive-in theater is no longer in operation (1966); the former drive-in theater property appears to be used as storage for portable containers (1973-1980); the portable storage containers are no longer evident and the present day apartment complex is evident (1988-2020)

The property to the northeast of the site was a part of a former chemical manufacturing plant, historically operated by Jefferson Chemical Company, Texaco Chemical Company, and Huntsman Petrochemical Corporation. This facility was identified during the regulatory records review and is further discussed in Section 4.1. In addition, please see Section 4.1 for further discussion of the two filling stations (Texas Company and James Eichelberger Jr.) located to the northeast and southeast of the site.

During the Sanborn map review, an on-site automotive and warehouse building was identified on the 1959, 1962, and 1971 maps. During the site reconnaissance, this building appeared to be a former automotive shop and no interior floor drains or former hydraulic lifts were identified. Based on the years of operations and absence of information regarding facility operations, this former automotive shop appears to constitute a REC in connection with the site. Please see Section 4.1 for further discussion of on-site investigation.

### 3.2 Historical City Directories

Digital Business, Cole, and Polk city directories used in this study were made available through the Austin History Center and ERIS (selected years reviewed: 1932-2020) and were reviewed at approximate five year intervals, if readily available. Since these references are copyright protected, reproductions are not provided in this report. The various street addresses for the site are identified in the table below. Street listings for the site were not available prior to 1953. City

Directories for the surrounding properties were not available prior to 1947. Facilities which have been identified as requiring further inquiry are shown in bold italics.

During the city directory review, several service stations and businesses with potential hazardous waste management activities were identified on the site and surrounding properties. Please see Section 4.1 for further discussion of the facilities which were identified during the review of the regulatory databases, and see below for further discussion of facilities which were not registered as regulated facilities. Due to the magnitude and volume of city directory listings, it was not practicable to list facilities by name. Therefore, they were combined and described by business type.

During the city directory review, several commercial-type businesses (including Barnhart Manufacturing & Supply, Texas Urethanes, and Underground Vw.) were identified on-site in the late 1960s, early 1970s, and late 1990s. Based on the names, these businesses may have potentially conducted operations including chemical usage, and/or hazardous waste management activities. However, neither the identified businesses nor their addresses were registered as regulated facilities. Based on the duration of facility operations and absence of information regarding potential operations, these facilities appear to constitute RECs in connection to the site. Please see Section 4.1 for further discussion of on-site investigation.

### 3.3 Site Ownership

According to information obtained from the Travis Central Appraisal District website, the site is currently listed as being owned by City of Austin. In addition, previous owners identified included private individuals.

### 3.4 Title Search

At the direction of the client, a title search was not included as part of the scope of services. Unless notified otherwise, we assume that the client is evaluating this information outside the scope of this report.

### 3.5 Environmental Liens and Activity and Use Limitations

The ERIS regulatory database report included a review of both Federal and State Engineering Control (EC) and Institutional Control (IC) databases. Based on a review of the database report, the site was not listed on the EC or IC databases. Please note that in addition to these federal and state listings, AULs can be recorded at the county and municipal level that may not be listed in the regulatory database report. Environmental lien and activity and use limitation records recorded against the site were not provided by the client. At the direction of the client, performance of a review of these records was not included as part of the scope of services and unless notified otherwise, we assume that the client is evaluating this information outside the scope of this report.

### 3.6 Interviews Regarding Current and Historical Site Uses

The following individuals were interviewed regarding the current and historical use of the site.

#### Interviewees

Interviewer	Interviewee	Title	Date/Time
Melissa S. Stevens	Sammy Ramirez	Facilities Supervisor	May 1, 2013/9 am
Melissa S. Stevens	Eric Stager	Site Representative	April 1, 2022/10 am

A previous interview was conducted with Mr. Sammy Ramirez, City of Austin's Facilities Supervisor for the site. According to Mr. Ramirez, the City of Austin's Austin Energy division bought the site in approximately 1996. Mr. Ramirez indicated that the site was primarily utilized as storage by the reclamation division, substation division, relay division, IT division (networking group), facilities division, and a portion of the site was leased to a contractor for storage. Mr. Ramirez further indicated that no fueling or fleet maintenance activities were conducted on-site and PCB-containing equipment had never been stored on the site. Mr. Ramirez was not aware of any water wells, septic systems, above- or underground storage tanks, or other environmental concerns associated with the site.

A recent interview was conducted with Mr. Eric Stager, current site representative. According to Mr. Stager, previous site operations began vacating the site approximately two years ago and only a portion of the parking lot is currently being used as storage by the Austin Energy Department.

### **3.7 Prior Report Review**

Terracon requested the client provide any previous environmental reports they are aware of for the site. Previous reports were provided by the client to Terracon for review.

- Environmental Site Assessment (Project No. 61-1966.96)  
906-910 Justin Lane & 6909-6917 Ryan Drive, Austin, TX  
Dated: August 2, 1996  
Prepared by: HBC Engineering, Inc. (n.k.a. Terracon Consultants, Inc.)  
For: Southland Equities

This prior report describes the site similar to its existing condition. Excerpts from the prior report are summarized below.

*"The subject site is located at 906-910 Justin Lane and 6909-6917 Ryan Drive in Austin, Travis County, Texas and consists of seven office/warehouse buildings.*

*The historical review indicates the subject site was improved with three of the onsite buildings by 1951, with the remainder added by 1973. The buildings onsite have been occupied by construction related businesses since at least the early 1950s. Generally, these types of businesses perform services offsite or sell supplies for offsite use. Previous tenants at the 6917 Ryan Drive building also include several automotive shops. Observations made during the site visit indicate no evidence of impact to the subject site from former automotive shops in the 6917 Ryan Drive Building. Although not reflected in city directory listings, the site was formerly used as a lumber yard. The lumber yard managed two underground storage tanks located east of the 906 Justin Lane Building.*

*Surrounding properties were also developed prior to 1951 with retail, residential, and commercial improvements that have changed only slightly throughout the time period covered by the aerial photographs. The Texaco facility north of the subject site was present in 1951 and expanded to its present-day configuration by 1964.*

*The site visit was conducted on June 6, 1996 by Ms. Stephanie Garcia of HBC Engineering, Inc. The site is occupied by Oliver Roofing, Aikido of Austin, International Supply, Texas Discount Furniture, an automotive shop, Underground VW, Dan Reeves (party equipment), Depew Appliance, and Personal Water-Craft.*

*Minor, localized staining of the concrete floor slabs and asphalt drives was noted in several portions of the site. Concrete floors and asphalt drives are relatively impervious surfaces and unlikely to allow vertical migration of small amounts of fluids. The tenants should be encouraged to remediate those affected areas and adopt appropriate management techniques to minimize future releases.*

*Three monitoring wells were noted between the 906 Justin Lane building and the covered storage area. The wells were installed in 1996 for the purpose of performing a risk-based assessment to evaluate impact to the site from an 8,000 gallon diesel UST and a 2,000 gallon gasoline UST removed from the site in 1991. Analysis of the water samples collected indicated that BTEX and TPH were non-detect in all of the samples except one. TPH in the sample collected from monitoring well 1 is listed as 1 part per million. According to Mr. Uche I. Ikemba, of the Petroleum Storage Tank Division of the TNRCC, the case was closed on July 17, 1996. A copy of the closure letter is included in the References Section of this report.*

*A sewage sump pump was noted at the northeast corner of the building. It appears that runoff from the parking lot has been allowed to enter the manhole access to the pump, and an oily sheen was noted during the site inspection.*

*The Texaco Chemical Company (Austin Research Laboratories) (Huntsman Corporation) is listed on the CERCLIS, ERNS, RCRA (TSD and Violator), TNRCC Spills, TNRCC solid waste landfill, and PST databases. The facility is located north of the subject site, across the Southern Pacific railroad tracks. Review of TNRCC files indicates operations at the facility have resulted in releases which have impacted groundwater. Texaco has installed a groundwater recovery system and has been periodically sampling and analyzing groundwater from a network of groundwater monitoring wells. Groundwater gradient maps prepared as recently as October 1995 indicate that apparent groundwater gradient is toward the subject site and the closest upgradient well to the subject site has elevated concentrations of some organic chemicals and metals. An interview was conducted with Ms. Patty Allen, enforcement Coordinator for the TNRCC. According to Ms. Allen, the site is under enforcement and a risk assessment has not yet been conducted nor have cleanup criteria been developed. The TNRCC has requested that the downgradient extent of impact to groundwater be evaluated, but this investigation has not yet been conducted. It is not known if impacted groundwater from the Texaco facility extends to the subject site.*

*The remainder of the facilities identified on the regulatory databases do not appear to present an environmental concern to the site based upon facility characteristics as specified within the text of the report.*

#### Recommendations

*If no further use is required, the onsite septic system should be cleaned out and closed according to Austin-Travis County Health Department regulations, and the monitoring wells from the onsite LPST investigation should be plugged and abandoned according to TNRCC regulations.*

*Future use of the subject site should consider the potential for impact to the subject site from operations at the Texaco facility adjacent and upgradient to the north of the subject site.”*

**Please see Section 4.1 for further discussion of the former on-site UST system and Section 5.4 for further discussion of the former on-site septic system/sump pump.**

- Phase I Environmental Site Assessment (Terracon Project No. 96137207)  
6909 Ryan Drive, Austin, TX  
Dated: May 20, 2013  
Prepared by: Terracon Consultants, Inc.  
For: City of Austin

Terracon 2013 ESA describes the site similar to its existing condition. “Recognized environmental conditions were identified in connection with the site and include the following: former on-site commercial-type tenants, former on-site automotive shop, and former City of Austin Historical USTs documented on-site. Based on the scope of services, limitations and findings of this assessment, several RECs were identified in connection with the site. Due to the proposed future use of the site (a city park), no further investigation appears warranted at this time. However, during future site redevelopment activities, if any USTs and/or impacted materials are encountered, they should be characterized, removed, and disposed of in accordance with applicable regulations. In addition, if the site is to be redeveloped with buildings, then further evaluation should be conducted regarding potential impact to site soil and groundwater, and the potential for vapor encroachment.

The site has been affected by a documented release of petroleum hydrocarbons. If soils and groundwater located on the site are to be disturbed during future excavations, proper procedures should be followed with respect to worker health and safety and any affected soil or groundwater encountered should be properly handled and disposed in accordance with local and state regulations.”

- Affected Property Assessment Report (Terracon Project No. 96197913)  
906 Justin Lane and 6909 Ryan Drive, Austin, TX  
Dated: December 14, 2021  
Prepared by: Terracon Consultants, Inc.  
For: City of Austin

Terracon prepared the Affected Property Assessment Report (APAR) in 2021 as a part of the site being entered into the Voluntary Cleanup Program (VCP). Please see Section 4.1 for further discussion.

## **4.0 RECORDS REVIEW**

Regulatory database information was provided by ERIS, a contract information services company. The purpose of the records review was to identify RECs in connection with the site. Information in this section is subject to the accuracy of the data provided by the information services company and the date at which the information is updated. The scope herein did not include confirmation of facilities listed as "unmappable" by regulatory databases.

In some of the following subsections, the words up-gradient, cross-gradient and down-gradient refer to the topographic gradient in relation to the site. As stated previously, the groundwater flow direction and the depth to shallow groundwater, if present, would likely vary depending upon seasonal variations in rainfall and the depth to the soil/bedrock interface. Without the benefit of on-site groundwater monitoring wells surveyed to a datum, groundwater depth and flow direction beneath the site cannot be directly ascertained.

#### 4.1 Federal and State/Tribal Databases

Listed below are the facility listings identified on federal and state/tribal databases within the ASTM-required search distances from the approximate site boundaries. Database definition, descriptions, and the database search report are included in Appendix D.

In addition to the above ASTM-required listings, Terracon reviewed other federal, state, local, and proprietary databases provided by the database firm. A list of the additional reviewed databases is included in the regulatory database report included in Appendix D.

The following table summarizes the site-specific information provided by the database and/or information gathered by this office for identified facilities located within 300 feet of the site. The remaining identified facilities indicated in the above Table can be referenced in Appendix D. Additional discussion for selected facilities may follow the summary table.

**G.I. Distributing**

G.I. Distributing is identified as an on-site USTAUSTIN facility. This facility was identified during the review of City of Austin Historical Underground Storage Tank records. According to these records, on March 24, 1949 the city council approved the application of G.I. Distributing Company for permission to operate a “private gasoline plant consisting of a 1,000-gallon underground tank and electric pump for the sole purpose of servicing their own motor equipment and from which no gasoline is to be sold,” the property “is designated as 1.477 acres out of the Richcreek 19-acre tract in the City of Austin, Travis County, Texas.” The tank and pipe construction material, and current status (present or removed from the ground) of the tank are unknown. In addition, the exact location of this UST could not be determined based on this information; however, based on the historical information, this UST was likely located to the north or west of the on-site 920 Justin Lane building. Based on the on-site investigation (further discussed below), no further investigation of the historical tank appears warranted at this time. However, during future site redevelopment activities, if any tanks and/or unanticipated impacted media associated with this facility is encountered, the tank should be removed and disposed of in accordance with applicable regulations and any impacted media should be characterized, removed and disposed of in accordance with applicable regulations.

**G I Surplus Distributing**

G I Surplus Distributing is identified as an on-site USTAUSTIN facility. This facility was identified during the review of City of Austin Historical Underground Storage Tank records. According to these records, on October 7, 1954 the city council approved the application of R. B. Okley for permission to operate a “private gasoline plant consisting of a 1,000-gallon underground tank and electric pump for the sole purpose of servicing his own motor equipment and from which no

gasoline is to be sold, upon property located on the north side of Justin Lane, which property is designated as part of G.I. Surplus Distributing Company tract, in the City of Austin, Travis County, Texas, and locally known as 920 Justin Lane.” The tank and pipe construction material, and current status (present or removed from the ground) of the tank are unknown. In addition, the exact location of this UST could not be determined based on this information; however, based on the historical information, this UST was likely located to the north or west of the on-site 920 Justin Lane building. Based on the on-site investigation (further discussed below), no further investigation of the historical tank appears warranted at this time. However, during future site redevelopment activities, if any tanks and/or unanticipated impacted media associated with this facility is encountered, the tank should be removed and disposed of in accordance with applicable regulations and any impacted media should be characterized, removed and disposed of in accordance with applicable regulations.

#### Glastron Sales Inc.

Glastron Sales Inc. is identified as an on-site USTAUSTIN facility. Based on the review of the city directories, this facility was identified on-site in the 1958 directory. This facility was identified during the review of City of Austin Historical Underground Storage Tank records. According to these records, on April 24, 1958 the city council approved the application of Glastron Sales, Inc. for permission to operate a “private gasoline plant consisting of a 1,000-gallon underground tank and electric pump for the sole purpose of servicing their own motor equipment and from which no gasoline is to be sold, upon property located on the north side of Justin Lane, which property as an unplatted 1.513 acres out of the Richcreek 19.5 acre tract, ....., and locally known as 920 Justin Lane.” The tank and pipe construction material, and current status (present or removed from the ground) of the tank are unknown. In addition, the exact location of this UST could not be determined based on this information; however, based on the historical information, this UST was likely located to the north or west of the on-site 920 Justin Lane building. Based on the on-site investigation (further discussed below), no further investigation of the historical tank appears warranted at this time. However, during future site redevelopment activities, if any tanks and/or unanticipated impacted media associated with this facility is encountered, the tank should be removed and disposed of in accordance with applicable regulations and any impacted media should be characterized, removed and disposed of in accordance with applicable regulations.

#### Comfort Supply/Railton Manufacturing

Comfort Supply/Railton Manufacturing is identified as an on-site LPST, UST, and USTAUSTIN facility. Based on the review of the city directories, Comfort Supply and Railton Manufacturing were identified on-site in 1987-1988. According to the regulatory database review, this facility formerly operated one 2,000-gallon steel diesel UST and one 8,000-gallon steel gasoline UST, which were reportedly installed in 1987 and removed from the ground in 1991. No information regarding spill prevention equipment or release detection equipment was reported in the regulatory database for the former USTs. In 1991, a hydrocarbon release was reported as not impacting groundwater with no apparent threats or impacts to receptors. Final concurrence was issued and the case is closed. Terracon personnel requested and obtained this facility’s regulatory file from the TCEQ Central Records office. Based on review of this file, during the removal of these former USTs, the soil was identified as having elevated concentrations of TPH

and tank pit water was identified as having elevated concentrations of TPH and BTEX. As a result, the tank pit was overexcavated and a groundwater treatment system was installed to treat the water recovered from the tank pit. The groundwater treatment system was later removed and additional soil samples were collected following the overexcavation activities. The analytical results indicated elevated concentrations of TPH in the soils on the western portion of the north excavation wall. In 1996, three groundwater monitoring wells were installed and the groundwater sampled for TPH and BTEX. The results indicated that the TPH was at or below detection limits and the BTEX was below detection limits. According to a letter from the TCEQ, dated July 17, 1996, they concur that this facility “has met the closure requirements.” Based on the information reviewed and issuance of regulatory closure, these former USTs constitute a historical recognized environmental condition (HREC) in connection with the site. At this time, no further environmental investigation with regards to this facility appears warranted. However, during future site redevelopment activities, if any impacted materials are encountered, they should be removed and disposed of in accordance with applicable regulations. The site has been affected by a documented release of petroleum hydrocarbons. If soils and groundwater located on the site are to be disturbed during future excavations, proper procedures should be followed with respect to worker health and safety and any affected soil or groundwater encountered should be properly handled and disposed in accordance with local and state regulations.

#### 6909 Ryan Drive Property

6909 Ryan Drive Property is identified as an on-site VCP facility. According to the regulatory database, the site (approximately 5.602-acres) was entered into the VCP program in 2021 based upon volatile organic compounds (VOCs) and chlorinated solvents detected in the groundwater and metals detected in the soils. As a part of the VCP, Terracon prepared an Affected Property Assessment Report (APAR) and excerpts of this report are as follows.

#### “Potential On-site Sources

*The primary known on-site source for contaminants [was] the UST system removed from the ground in 1991. Site assessment conducted at that time indicated that groundwater was unaffected, and LPST site closure was issued by TCEQ in 1996. The recent site assessment confirmed that [chemicals of concern (COC)] concentrations in soil and groundwater in this area do not exceed the [residential assessment levels (RALs)] (soil boring/monitoring well MW-3, which is located to the west of the former UST).*

*A former automotive shop was identified in the northeast corner of the on-site property, and was evaluated by MW-8.*

*The ESA [further discussed in Section 3.7] identified several historical businesses whose operations may or may not have including chemical usage. Barnhart Manufacturing and Supply was located at the same address as the Comfort Supply facility (evaluated by soil borings/monitoring wells MW-1, MW-3, MW-5, and MW-8). Texas Urethanes was located at 9611 Ryan Drive (evaluated by MW-2 and MW-6), and Underground VW was located at 9615 Ryan Drive (evaluated by MW-7).*

*There is no evidence of on-site significant surface releases that may have penetrated the pervasive on-site surface pavement to affect underlying shallow soils. There is also no evidence that City of Austin stored PCB-containing equipment at the site.*

#### Off-site Source

*The ESA identified a major potential off-site source area associated with a former chemical manufacturing facility operated by Jefferson Chemical Company, Texaco Chemical Company, and Huntsman Chemical Corporation (hereinafter, Huntsman site). This off-site source area appears to be a source of chlorinated solvents and petroleum hydrocarbons in groundwater at the on-site property. The historic Huntsman facility was a large, triangular tract bounded to the east by North Lamer Boulevard, to the west by the railroad easement, and to the north by Morrow Street. It is located adjacent to the northeast of the on-site property, separated only by the railroad easement. Please note that the Huntsman Tract has been redeveloped with Crestview Station and associated commercial buildings and residential neighborhoods.*

*Given the nature of the facility and documented historic releases, an extensive amount of environmental investigation was conducted at the Huntsman facility including an investigation of both soil and groundwater through the installation of soil borings, groundwater monitoring wells, and trenching activities. The Huntsman site assessment indicated that groundwater at that site was affected with both petroleum hydrocarbons and chlorinated solvents, and also documented that groundwater plume(s) extended off-site to the west-southwest of Huntsman (i.e., in the general direction of the on-site property). The TCEQ VCP (VCP ID No. 1830) issued a Certificate of Completion for the Huntsman site in 2007. The COC indicated that groundwater at the Huntsman site was classified as a Class 3 resource, and a restrictive covenant was recorded due to groundwater concentrations exceeding the TCEQ Tier 1 PCLs for Class 3 groundwater.*

*The off-site source area was intended to be evaluated by MW-4 and MW-8, located along the northeastern property boundary near the Huntsman site. However, the site assessment results suggest that the off-site Huntsman source area has affected groundwater throughout the northern portion of the on-site property.*

*The detected COC concentrations in soil and groundwater at the site did not exceed the RALs (or [protective concentration levels (PCLs)]). Based on the lack of a [protective concentration level exceedance (PCLE)] Zone, a response action is not warranted at the site. Threatened or affected receptors associated with the detected COC concentrations were not identified.*

#### Recommendations

*The COC concentrations detected in soil and groundwater samples collected at the site did not exceed the RALs, and there are no PCLE Zones or warranted response actions for the site.”*

Based on this information, the site has been impacted by releases from prior on- and off-site operations, and hence, an REC in connection with the site. However, no further environmental investigation appears warranted at this time, based on the extensive subsurface investigations on the site.

Texaco Chemical Company, Huntsman Petrochemical Corporation, Austin Laboratories, Crestview Station

A former chemical manufacturing facility operated by Jefferson Chemical Company, Texaco Chemical Company, and Huntsman Chemical Corporation (hereinafter, Huntsman) was identified as a CERCLIS, CERCLIS-NFRAP, SEMS ARCHIVE, RCRA TSD, RCRA NON GEN, HIST RCRA GEN, RCRA CORRACTS, CLI, IHW, IHW CORR ACTION, UST, USTAUSTIN, and VCP facility and was located to the adjoining northeast of the site (across the railroad tracks and addressed as 7114 North Lamar Boulevard) and topographically up to cross gradient relative to the site. According to historical resources and information obtained from various websites, this facility operated at this location from 1949 until the mid-2000s. The Austin location was reportedly a research and development laboratory which developed products used in “a variety of common consumer products, including soaps, detergents, carpeting, foam cushions, automobile parts and in technologies such as newspaper recycling.”

Given the nature of the facility and documented historic releases, an extensive amount of environmental investigation was conducted at the facility including an investigation of both soil and groundwater through the installation of soil borings, groundwater monitoring wells, and trenching activities. This investigation work was conducted by Weston Solutions, Inc. (hereinafter, Weston). Based on a review of regulatory records, the Huntsman property was divided into two separate partial response action areas. The majority of the facility was included in Partial Response Action Area 1 (PRAA-1), and an approximate 3-acre tract in the vicinity of an identified groundwater benzene plume was designated as Partial Response Action Area 2 (PRAA-2). Based on available maps, PRAA-1 was located adjoining the site (across the railroad tracks) and PRAA-2 was located approximately 375 feet north of the site.

Based on Terracon’s review of the Affected Property Assessment Report (APAR, dated December 2006) and Response Action Completion Report (RACR, dated February 2007), it appears that the overall assessment and remediation plan initiated by Weston was effective in achieving the removal of buried waste materials from the Huntsman facility.

Two areas of the former Huntsman facility were identified with groundwater impact including an area in the vicinity of Banyon Street (located at least 1,625 feet northeast of the site) within PRAA-1 where elevated concentrations of perchloroethylene (PCE) were documented, and in the west-central portion of the facility within PRAA-2 where elevated concentrations of benzene were documented. Further investigation identified a groundwater benzene plume extending from the Huntsman facility in a west/southwesterly direction, across the adjoining railroad tract, and beneath a residential development (located to the northwest of the site). According to a map of the identified groundwater benzene plume, this plume is located approximately 375 feet north of the site.

Both PRAA-1 and PRAA-2 have received regulatory closure through the TCEQ Voluntary Cleanup Program. A Certificate of Completion was issued by the TCEQ dated July 16, 2007 for

PRAA-1 stating that the reports demonstrated "...attainment of Texas Risk Reduction Program Remedy Standard A for residential land use...". A Certificate of Completion was issued by the TCEQ dated September 27, 2007 for PRAA-2 stating that the reports demonstrated "...attainment of Texas Risk Reduction Program Remedy Standard A for residential land use..."; however, since the area of PRAA-2 "overlies groundwater which contains concentrations of chemicals exceeding the TCEQ Tier 1 protective concentrations for Class 3 groundwater", a restrictive covenant was placed on this area. The restrictions read as follows: "Use of and exposure to the groundwater at the partial response action area for any purpose is prohibited until such a time when all of the chemicals of concern in the groundwater within the area specified in Exhibit "A" no longer exceed levels which exceed TCEQ Tier 1 protective concentration levels for Class 3 groundwater." This restrictive covenant was subsequently deed recorded.

Based on this information, the site has been impacted by releases from prior off-site operations, and hence, an REC in connection with the site. However, no further environmental investigation appears warranted at this time, based on the extensive subsurface investigations on the site. Although not part of the ESA scope of services, it should be noted however, that based on the continued presence of benzene within the shallow groundwater in the vicinity of the site, a risk exists for vapor encroachment (VE) into future buildings built. The State of Texas does not currently regulate VE evaluations; therefore, potential risks associated with future VE from the existing contamination would not be covered under the current VCP closure. Due to the potential risks of VE from the existing benzene plume, it is recommended that further evaluation of the shallow soil gas be conducted in the vicinity of the groundwater plume to assess the potential risk.

#### Texas Company

Texas Company is identified as an AUSTINHISTUST facility and was located to the adjoining east of the site and topographically cross gradient relative to the site. Based on the review of the Sanborn maps, a filling station was identified to the east of the site (across the railroad tracts) on the 1959, 1962, and 1971 maps. In addition, a service station was identified from the early 1950s through the late 1960s at 7006 North Lamar Boulevard during the city directory review. This facility was identified during the review of the City of Austin Historical Underground Storage Tank records. According to these records, on May 17, 1951 the city council approved the application of The Texas Company, lessee, to operate a "drive-in gasoline filling station, ..., upon the property located on Lamar Boulevard, west side, north of the T. & N. O. Railroad (Llano Branch), which property fronts 180 feet on Lamar Boulevard, and being known as a portion of the George W. Spear League in the city of Austin, Travis County, Texas, and the property upon which this filling station is to be located is owned by the Jefferson Chemical Company, Inc." Based on the topographic gradient, this facility does not appear to constitute a REC in connection with the site.

#### Capital Prefabricators

Capital Prefabricators (currently known as the Walker Tire Company) is identified as an AUSTINHISTUST facility and was located to the adjoining southeast of the site and topographically down gradient relative to the site. This facility was identified during the review of the City of Austin Historical Underground Storage Tank records. According to these records, on

April 10, 1947 the city council approved the application of Capital Prefabricators, Inc. to operate a “private gasoline plant consisting of a 550-gallon underground tank and electric pump for the sole purpose of servicing their own motor equipment and from which no gasoline is to be sold, upon property abutting on the west side of Georgetown Road (n.k.a. North Lamar Boulevard) for approximately 500 feet and adjoining the Southern Pacific Railroad tracks, ..., and locally known as 6926 Georgetown Road.” Based on the topographic gradient, this facility does not appear to constitute a REC in connection with the site.

James Eichelberger Jr.

James Eichelberger Jr. is identified as an AUSTINHISTUST facility and was located approximately 300 feet southeast of the site and topographically down gradient relative to the site. Based on the review of the Sanborn maps, a filling station was identified approximately 300 feet southeast of the site on the 1959, 1962, and 1971 maps. Based on the distance and topographic gradient, this facility does not appear to constitute a REC in connection with the site.

The remaining listed facilities do not appear to constitute RECs in connection with the site at this time based upon their distance of more than 300 feet from the site, their regulatory status, and/or their topographic gradient relationships relative to the site.

Unplottable facilities are those that do not contain sufficient address or location information to evaluate the facility listing locations relative to the site. The ERIS database report listed one facility in the unplottable section. Determining the location of this facility is beyond the scope of this assessment; however, the unplottable facility was not identified on the site or on properties adjoining the site. The unplottable facility is listed in the database report in Appendix D.

**4.2 Local Agency Inquiries**

Agency Contacted/ Contact Method	Response
Texas Department of State Health Services (DSHS)/Email	The DSHS response identified several asbestos abatement notifications associated with the site. No other records of potential environmental concern were noted for the site.
City of Austin/Online Open Records Request	According to information provided by the City of Austin, except for previous asbestos and lead-based paint surveys, no potential environmental concerns requiring further inquiry were noted.

**4.3 Local Area Knowledge**

**4.3.1 Austin Fire Department**

The Austin Fire Department (AFD) Hazardous Materials Alarm and Storage Location Databases were reviewed for records of hazardous substances or spills incidents on the site or on adjacent properties. A review of the databases did not identify incidents of potential environmental concern at the site.

### **4.3.2 Historic Landfills**

A summary of area landfills prepared in 1984 by Underground Resource Management (URM) for the City of Austin Historical Commission and a 2004 Supplemental Assessment of Landfills in the Vicinity of Austin, Texas prepared by Geomatrix Consultants Inc. were reviewed for this report. Additionally, the Closed Landfill Inventory (CLI) for Travis County, available on the Capital Area Council of Government website ([www.capcog.org](http://www.capcog.org)), was reviewed to identify unauthorized/unpermitted landfills within the general site vicinity. One historical landfill (Texaco Chemical Company) was identified within one-half mile of the site. Based on the review of an available map, this landfill was located approximately 1,200 feet north of the site and, therefore, does not appear to constitute a REC in connection with the site at this time.

### **4.3.3 City of Austin Watershed Protection Department**

The COA-WPD keeps records pertaining to USTs and reported spills and releases within the city of Austin, Texas. A review of the COA-WPD UST list identified no additional UST facilities on or adjoining the site.

### **4.3.4 Historic Underground Storage Tanks**

In early 2008, a review of City Council minutes was undertaken by the City of Austin for records of old underground storage tanks following the removal of a long-forgotten underground storage tank containing oil that was discovered in the downtown area. On March 28, 2008, the Austin American Statesman published an article titled “Under City, 1,000 Old Tanks Hiding?” Based on a review of this article, approximately 1,000 storage tanks were reportedly approved by the City Council for installation between 1909 and 1965. The current status of these tanks is generally unknown as some tanks may have been approved and not installed, some may have been removed, while others may remain in place (empty or not). The results of the City Council minutes search were compiled and are now available online ([http://www.ci.austin.tx.us/watershed/ust\\_web.htm](http://www.ci.austin.tx.us/watershed/ust_web.htm)). A review of this website revealed several reports of tank installation approval for the site and adjacent properties. Please see Section 4.1 for further discussion of these facilities.

### **4.3.5 Zoning/Land Use Records**

According to the City of Austin website, Transit Oriented Development – Neighborhood Plan (TOD-NP).

### **4.3.6 Water Development Board**

Terracon reviewed the on-line Texas Water Development Board interactive water data map to identify registered wells on or adjacent to the site. Based on a review of the on-line records, several monitoring wells and environmental soil borings were identified on the site and are associated with the previous on-site investigation, which is further discussed in Section 4.1.

## 5.0 SITE RECONNAISSANCE

### 5.1 General Site Information

Information contained in this section is based on a visual reconnaissance conducted while walking through the site and the accessible interior areas of structures, if any, located on the site. The site and adjoining properties are depicted on the Site Diagram, which is included in Exhibit 2 of Appendix A. Photo documentation of the site at the time of the visual reconnaissance is provided in Appendix B. Credentials of the individuals planning and conducting the site visit are included in Appendix E.

## Site Operations, Processes, and Equipment

### Air compressors

Two air compressors were observed on concrete along the southeastern side of the reclamation/substation building (920 Justin Lane) at the time of the site reconnaissance. Staining was observed beneath one of the air compressors and from a disconnected pipe at the time of the site reconnaissance. Based on the minimal nature of the releases, the staining appears to be a *de minimis* condition that does not constitute a REC in connection with the site at this time.

#### Other processes or equipment

At the time of the site reconnaissance, one storage container was observed north of the on-site 920 Justin Lane building and appeared to be mostly empty. Only a minor amount of supplies were observed. When no further use is intended, the storage container and supplies should be removed and disposed of in accordance with applicable regulations.

At the time of the site reconnaissance, the reclamation division was equipped with two sand blasting machines, which were connected to an air collection system. According to previous on-site interviews, reusable parts were placed within sand blasting machines and cleaned using small glass beads. The air system then collected any large paint particles in a 55-gallon drum. Previous on-site interviews indicated that since the paint cleaned was non-lead containing, it was disposed of into the on-site dumpster. Previous on-site interviews further indicated that any parts which were painted with lead-based paint were collected and disposed of off-site by a contracted company.

At the time of the site reconnaissance, minor amounts of supplies and equipment associated with the previous on-site different City of Austin divisions were observed throughout the site. No spills or releases associated with the stored supplies and equipment was observed during the site reconnaissance.

### **Underground Chemical or Waste Storage, Drainage or Collection Systems**

#### Sumps, cisterns, catch basins and/or dry wells

At the time of the site reconnaissance, a sump was observed in the southeastern corner of the former reclamation/substation building (920 Justin Lane) and was likely associated with the sewage sump pump noted during the HBC 1996 ESA report (further discussed in Section 3.7). The sump appeared to pump and discharge collected runoff to the exterior of this building. No spills or releases were observed in the vicinity of the sump or its discharge location at the time of the site reconnaissance.

### **Releases or Potential Releases**

#### Trash, debris and/or other waste materials

One roll-off dumpster, serviced by a contracted company, was observed on the northern portion during the site reconnaissance. Evidence of staining, noxious odors or hazardous waste disposal was not observed in the vicinity of the on-site dumpster at the time of the site reconnaissance.

At the time of the site reconnaissance, trash/debris was observed scattered throughout the site. No spills, releases, or distressed vegetation was noted associated with the scattered trash/debris

at the time of the site reconnaissance; however, it should be removed and disposed of in accordance with applicable regulations.

## Other Notable Site Features

### Wells

At the time of the site reconnaissance, seven monitoring wells were observed throughout the site and are associated with previous on-site investigations, which are further discussed in Section 4.1.

## 6.0 ADJOINING PROPERTY RECONNAISSANCE

Visual observations of adjoining properties (from site boundaries) are summarized below.

### Adjoining Properties

Direction	Description
Northwest	Formerly National Wholesale Supply Inc.
Northeast	Railroad tracks, followed by Midtown Commons at Crestview Station (formerly <b>Jefferson Chemical Company</b> )
Southwest	Ryan Drive, followed by residences
Southeast	Structures, KibRob Construction, formerly Nugent Grocery, former automotive shop, Dia's Market, and Justin Lane, followed by Argosy Apartments at Crestview

RECs were not observed with the adjoining properties.

## 7.0 ADDITIONAL SERVICES

Per the agreed scope of services specified in the proposal, additional services (e.g. asbestos sampling, lead-based paint sampling, wetlands evaluation, lead in drinking water testing, radon testing, vapor encroachment screening, etc.) were not conducted.

## **8.0 DECLARATION**

I, Melissa S. Stevens, declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in Section 312.10 of 40 CFR 312; and I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the site. I have developed and performed the All Appropriate Inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

### ASTM User Questionnaire

In order to qualify for one of the Landowner Liability Protections (LLPs) offered by the Small Business Relief and Brownfields Revitalization Act of 2001 (the "Brownfields Amendments"), the user must respond to the following questions. Failure to provide this information to the environmental professional may result in significant data gaps, which may limit our ability to identify recognized environmental conditions resulting in a determination that "all appropriate inquiry" is not complete. This form represents a type of interview and as such, the user has an obligation to answer all questions in good faith, to the extent of their actual knowledge.

- 1) Did a search of recorded land title records (or judicial records where appropriate) identify any environmental liens filed or recorded against the property under federal, tribal, state, or local law (40 CFR 312.25)?  
 No  Yes (If yes, explain below and send Terracon a copy of the title records or judicial records reviewed.)
- 2) Did a search of recorded land title records (or judicial records where appropriate) identify any activity and use limitations (AULs), such as engineering controls, land use restrictions, or institutional controls that are in place at the property and/or have been filed or recorded against the property under federal, tribal, state, or local law (40 CFR 312.26)?  
 No  Yes (If yes, explain below and send Terracon a copy of the title records or judicial records reviewed.)
- 3) Do you have any specialized knowledge or experience related to the site or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the site or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business (40 CFR 312-28)?  
 No  Yes (If yes, explain below)
- 4) Do you have actual knowledge of a lower purchase price because contamination is known or believed to be present at the site (40 CFR 312.29)?  
 No  Yes  Not applicable (If yes or Not applicable, explain below)
- 5) Are you aware of commonly known or reasonably ascertainable information about the site that would help the environmental professional to identify conditions indicative of releases or threatened releases (40 CFR 312.30)?  
 No  Yes (If yes, explain below)
- 6) Based on your knowledge and experience related to the site, are there any obvious indicators that point to the presence or likely presence of contamination at the site (40 CFR 312.31)?  
 No  Yes (If yes, explain below)

**Comments or explanations:** I have visited the site several times since the early 2000s as part of our environmental compliance programs. The site has primarily been used by AE as a storage area for electrical equipment, relay gear, and other electronics waiting for reclamation or recycling. There was minimal use of chemicals or oil at this facility (oil-filled equipment was not sent to this facility).

<b>Waste Code Description:</b>			CARBAMIC ACID, [1,2-PHENYLENEBIS (IMINOCARBONOTHIOYL)]BIS-, DIMETHYL ESTER (OR) THIOPHANATE-METHYL			
<b>Hazardous Waste Code:</b>			U410			
<b>Waste Code Description:</b>			ETHANIMIDOTHIOIC ACID, N,N'-[THIOBIS((METHYLIMINO)CARBONYLOXY)]BIS-, DIMETHYL ESTER (OR) THIODICARB			
<b>Hazardous Waste Code:</b>			U411			
<b>Waste Code Description:</b>			PHENOL, 2-(1-METHYLETHOXY)-, METHYLCARBAMATE (OR) PROPOXUR			

**Hazardous Waste Handler Details**

**Sequence No:** 9  
**Receive Date:** 20050712  
**Handler Name:** HUNTSMAN PETROCHEMICAL CORPORATION  
**Source Type:** Notification  
**Federal Waste Generator Code:** 1  
**Generator Code Description:** Large Quantity Generator

# Appendix: Database Descriptions

*Environmental Risk Information Services (ERIS) can search the following databases. The extent of historical information varies with each database and current information is determined by what is publicly available to ERIS at the time of update. ERIS updates databases as set out in ASTM Standard E1527-13 and E1527-21, Section 8.1.8 Sources of Standard Source Information:*

*"Government information from nongovernmental sources may be considered current if the source updates the information at least every 90 days, or, for information that is updated less frequently than quarterly by the government agency, within 90 days of the date the government agency makes the information available to the public."*

#### Formerly Utilized Sites Remedial Action Program:

DOE FUSRAP

The U.S. Department of Energy (DOE) established the Formerly Utilized Sites Remedial Action Program (FUSRAP) in 1974 to remediate sites where radioactive contamination remained from the Manhattan Project and early U.S. Atomic Energy Commission (AEC) operations. The DOE Office of Legacy Management (LM) established long-term surveillance and maintenance (LTS&M) requirements for remediated FUSRAP sites. DOE evaluates the final site conditions of a remediated site on the basis of risk for different future uses. DOE then confirms that LTS&M requirements will maintain protectiveness.

**Government Publication Date: Mar 4, 2017**

#### National Priority List:

NPL

National Priorities List (Superfund)-NPL: EPA's (United States Environmental Protection Agency) list of the most serious uncontrolled or abandoned hazardous waste sites identified for possible long-term remedial action under the Superfund program. The NPL, which EPA is required to update at least once a year, is based primarily on the score a site receives from EPA's Hazard Ranking System. A site must be on the NPL to receive money from the Superfund Trust Fund for remedial action.

**Government Publication Date: Dec 30, 2021**

#### National Priority List - Proposed:

PROPOSED NPL

Includes sites proposed (by the EPA, the state, or concerned citizens) for addition to the NPL due to contamination by hazardous waste and identified by the Environmental Protection Agency (EPA) as a candidate for cleanup because it poses a risk to human health and/or the environment.

**Government Publication Date: Dec 30, 2021**

#### Deleted NPL:

DELETED NPL

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

**Government Publication Date: Dec 30, 2021**

#### SEMS List 8R Active Site Inventory:

SEMS

The Superfund Program has deployed the Superfund Enterprise Management System (SEMS), which integrates multiple legacy systems into a comprehensive tracking and reporting tool. This inventory contains active sites evaluated by the Superfund program that are either proposed to be or are on the National Priorities List (NPL) as well as sites that are in the screening and assessment phase for possible inclusion on the NPL. The Active Site Inventory Report displays site and location information at active SEMS sites. An active site is one at which site assessment, removal, remedial, enforcement, cost recovery, or oversight activities are being planned or conducted.

**Government Publication Date: Dec 30, 2021**

#### Inventory of Open Dumps, June 1985:

ODI

The Resource Conservation and Recovery Act (RCRA) provides for publication of an inventory of open dumps. The Act defines "open dumps" as facilities which do not comply with EPA's "Criteria for Classification of Solid Waste Disposal Facilities and Practices" (40 CFR 257).

**Government Publication Date: Jun 1985**

**SEMS List 8R Archive Sites:**

[SEMS ARCHIVE](#)

The Superfund Enterprise Management System (SEMS) Archived Site Inventory displays site and location information at sites archived from SEMS. An archived site is one at which EPA has determined that assessment has been completed and no further remedial action is planned under the Superfund program at this time.

**Government Publication Date: Dec 30, 2021**

**EPA Report on the Status of Open Dumps on Indian Lands:**

[IODI](#)

Public Law 103-399, The Indian Lands Open Dump Cleanup Act of 1994, enacted October 22, 1994, identified congressional concerns that solid waste open dump sites located on American Indian or Alaska Native (AI/AN) lands threaten the health and safety of residents of those lands and contiguous areas. The purpose of the Act is to identify the location of open dumps on Indian lands, assess the relative health and environment hazards posed by those sites, and provide financial and technical assistance to Indian tribal governments to close such dumps in compliance with Federal standards and regulations or standards promulgated by Indian Tribal governments or Alaska Native entities.

**Government Publication Date: Dec 31, 1998**

**Comprehensive Environmental Response, Compensation and Liability Information System -**

[CERCLIS](#)

**CERCLIS:**

Superfund is a program administered by the United States Environmental Protection Agency (EPA) to locate, investigate, and clean up the worst hazardous waste sites throughout the United States. CERCLIS is a database of potential and confirmed hazardous waste sites at which the EPA Superfund program has some involvement. It contains sites that are either proposed to be or are on the National Priorities List (NPL) as well as sites that are in the screening and assessment phase for possible inclusion on the NPL. The EPA administers the Superfund program in cooperation with individual states and tribal governments; this database is made available by the EPA.

**Government Publication Date: Oct 25, 2013**

**CERCLIS - No Further Remedial Action Planned:**

[CERCLIS NFRAP](#)

An archived site is one at which EPA has determined that assessment has been completed and no further remedial action is planned under the Superfund program at this time. The Archive designation means that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL). This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

**Government Publication Date: Oct 25, 2013**

**CERCLIS Liens:**

[CERCLIS LIENS](#)

A Federal Superfund lien exists at any property where EPA has incurred Superfund costs to address contamination ("Superfund site") and has provided notice of liability to the property owner. A Federal CERCLA ("Superfund") lien can exist by operation of law at any site or property at which EPA has spent Superfund monies. This database is made available by the United States Environmental Protection Agency (EPA).

**Government Publication Date: Jan 30, 2014**

**RCRA CORRACTS-Corrective Action:**

[RCRA CORRACTS](#)

RCRA Info is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. At these sites, the Corrective Action Program ensures that cleanups occur. EPA and state regulators work with facilities and communities to design remedies based on the contamination, geology, and anticipated use unique to each site.

**Government Publication Date: Jan 31, 2022**

**RCRA non-CORRACTS TSD Facilities:**

[RCRA TSD](#)

RCRA Info is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. This database includes Non-Corrective Action sites listed as treatment, storage and/or disposal facilities of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA).

**Government Publication Date: Jan 31, 2022**

**RCRA Generator List:**

[RCRA LQG](#)

RCRA Info is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Large Quantity Generators (LQGs) generate 1,000 kilograms per month or more of hazardous waste or more than one kilogram per month of acutely hazardous waste.

**Government Publication Date: Jan 31, 2022**

**RCRA Small Quantity Generators List:**

[RCRA SQG](#)

RCRA Info is the EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Small Quantity Generators (SQGs) generate more than 100 kilograms, but less than 1,000 kilograms, of hazardous waste per month.

**Government Publication Date: Jan 31, 2022**

**RCRA Very Small Quantity Generators List:**

[RCRA VSQG](#)

RCRA Info is the EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Very Small Quantity Generators (VSQG) generate 100 kilograms or less per month of hazardous waste, or one kilogram or less per month of acutely hazardous waste. Additionally, VSQG may not accumulate more than 1,000 kilograms of hazardous waste at any time.

**Government Publication Date: Jan 31, 2022**

**RCRA Non-Generators:**

[RCRA NON GEN](#)

RCRA Info is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Non-Generators do not presently generate hazardous waste.

**Government Publication Date: Jan 31, 2022**

**RCRA Sites with Controls:**

[RCRA CONTROLS](#)

List of Resource Conservation and Recovery Act (RCRA) facilities with institutional controls in place. RCRA gives the U.S. Environmental Protection Agency (EPA) the authority to control hazardous waste from the "cradle-to-grave." This includes the generation, transportation, treatment, storage, and disposal of hazardous waste. RCRA also set forth a framework for the management of non-hazardous solid wastes. The 1986 amendments to RCRA enabled EPA to address environmental problems that could result from underground tanks storing petroleum and other hazardous substances.

**Government Publication Date: Jan 31, 2022**

**Federal Engineering Controls-ECs:**

[FED ENG](#)

Engineering controls (ECs) encompass a variety of engineered and constructed physical barriers (e.g., soil capping, sub-surface venting systems, mitigation barriers, fences) to contain and/or prevent exposure to contamination on a property. This database is made available by the United States Environmental Protection Agency (EPA).

**Government Publication Date: Dec 30, 2021**

**Federal Institutional Controls- ICs:**

[FED INST](#)

Institutional controls are non-engineered instruments, such as administrative and legal controls, that help minimize the potential for human exposure to contamination and/or protect the integrity of the remedy. Although it is EPA's (United States Environmental Protection Agency) expectation that treatment or engineering controls will be used to address principal threat wastes and that groundwater will be returned to its beneficial use whenever practicable, ICs play an important role in site remedies because they reduce exposure to contamination by limiting land or resource use and guide human behavior at a site.

**Government Publication Date: Dec 30, 2021**

**Land Use Control Information System:**

[LUCIS](#)

The LUCIS database is maintained by the U.S. Department of the Navy and contains information for former Base Realignment and Closure (BRAC) properties across the United States.

**Government Publication Date: Sep 1, 2006**

**Emergency Response Notification System:**

[ERNS 1982 TO 1986](#)

Database of oil and hazardous substances spill reports controlled by the National Response Center. The primary function of the National Response Center is to serve as the sole national point of contact for reporting oil, chemical, radiological, biological, and etiological discharges into the environment anywhere in the United States and its territories.

**Government Publication Date: 1982-1986**

**Emergency Response Notification System:**

[ERNS 1987 TO 1989](#)

Database of oil and hazardous substances spill reports controlled by the National Response Center. The primary function of the National Response Center is to serve as the sole national point of contact for reporting oil, chemical, radiological, biological, and etiological discharges into the environment anywhere in the United States and its territories.

**Government Publication Date: 1987-1989**

**Emergency Response Notification System:**

[ERNS](#)

Database of oil and hazardous substances spill reports made available by the United States Coast Guard National Response Center (NRC). The NRC fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. These data contain initial incident data that has not been validated or investigated by a federal/state response agency.

**Government Publication Date: Dec 31, 2021**

**The Assessment, Cleanup and Redevelopment Exchange System (ACRES) Brownfield Database:**

[FED BROWNFIELDS](#)

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties protects the environment, reduces blight, and takes development pressures off greenspaces and working lands. This database is made available by the United States Environmental Protection Agency (EPA).

**Government Publication Date: Aug 20, 2021**

**FEMA Underground Storage Tank Listing:**

[FEMA UST](#)

The Federal Emergency Management Agency (FEMA) of the Department of Homeland Security maintains a list of FEMA owned underground storage tanks.

**Government Publication Date: Dec 31, 2017**

**Facility Response Plan:**

[FRP](#)

List of facilities that have submitted Facility Response Plans (FRP) to EPA. Facilities that could reasonably be expected to cause "substantial harm" to the environment by discharging oil into or on navigable waters are required to prepare and submit Facility Response Plans (FRPs). Harm is determined based on total oil storage capacity, secondary containment and age of tanks, oil transfer activities, history of discharges, proximity to a public drinking water intake or sensitive environments.

**Government Publication Date: Dec 2, 2020**

**Historical Gas Stations:**

[HIST GAS STATIONS](#)

This historic directory of service stations is provided by the Cities Service Company. The directory includes Cities Service filling stations that were located throughout the United States in 1930.

**Government Publication Date: Jul 1, 1930**

**Petroleum Refineries:**

[REFN](#)

List of petroleum refineries from the U.S. Energy Information Administration (EIA) Refinery Capacity Report. Includes operating and idle petroleum refineries (including new refineries under construction) and refineries shut down during the previous year located in the 50 States, the District of Columbia, Puerto Rico, the Virgin Islands, Guam, and other U.S. possessions. Survey locations adjusted using public data.

**Government Publication Date: Jul 10, 2020**

**Petroleum Product and Crude Oil Rail Terminals:**

[BULK TERMINAL](#)

List of petroleum product and crude oil rail terminals made available by the U.S. Energy Information Administration (EIA). Includes operable bulk petroleum product terminals located in the 50 States and the District of Columbia with a total bulk shell storage capacity of 50,000 barrels or more, and/or the ability to receive volumes from tanker, barge, or pipeline; also rail terminals handling the loading and unloading of crude oil that were active between 2017 and 2018. Petroleum product terminals comes from the EIA-815 Bulk Terminal and Blender Report, which includes working, shell in operation, and shell idle for several major product groupings. Survey locations adjusted using public data.

**Government Publication Date: Apr 28, 2020**

**LIEN on Property:**

[SEMS LIEN](#)

The EPA Superfund Enterprise Management System (SEMS) provides LIEN information on properties under the EPA Superfund Program.

**Government Publication Date: Dec 30, 2021**

**Superfund Decision Documents:**

[SUPERFUND ROD](#)

This database contains a listing of decision documents for Superfund sites. Decision documents serve to provide the reasoning for the choice of (or) changes to a Superfund Site cleanup plan. The decision documents include Records of Decision (ROD), ROD Amendments, Explanations of Significant Differences (ESD), along with other associated memos and files. This information is maintained and made available by the US EPA (Environmental Protection Agency).

**Government Publication Date: Nov 16, 2021**

**State**

**Superfund Sites Boundaries:**

[SUPERFUND](#)

List of sites that may constitute an imminent and substantial endangerment to public health and safety or to the environment due to a release or threatened release of hazardous substances into the environment provided by the Texas Commission on Environmental Quality (TCEQ).

**Government Publication Date: Aug 10, 2021**

**State Superfund Registry:**

[SHWS](#)

List of sites identified or evaluated by the Texas Commission on Environmental Quality (TCEQ) which may constitute an imminent and substantial endangerment to public health and safety or to the environment due to a release or threatened release of hazardous substances into the environment. The TCEQ updates the state Superfund sites list in accordance with the Texas Health and Safety Code (THSC). This database is state equivalent NPL.

**Government Publication Date: Jan 13, 2022**

**Delisted State Superfund Registry List:**

[DELISTED SHWS](#)

This database contains a list of closed hazardous substance release sites that were removed from the Texas Commission on Environmental Quality (TCEQ).

**Government Publication Date: Jan 24, 2022**

**Permitted Solid Waste Facilities:**

[SWF/LF](#)

List of active, inactive, and post-closure Municipal Solid Waste landfills and processing facilities with issued permits and authorizations, as well as pending, withdrawn, or denied applications registered with the Texas Commission on Environmental Quality (TCEQ) under the Texas Administrative Code (TAC) Title 30 Chapter 330.

**Government Publication Date: Nov 2, 2021**

**Closed Landfill Inventory:**

[CLI](#)

Inventory of permitted and unauthorized closed or abandoned municipal solid waste landfills throughout Texas compiled by the Texas Commission on Environmental Quality (TCEQ), in collaboration with regional Councils of Government (COG).

**Government Publication Date: Sep 20, 2012**

**Houston-Galveston Closed Landfill Inventory:**

[HGAC CLI](#)

List of closed and abandoned landfill sites which fall under the Houston Galveston Area Council of Government. Texas Councils of Governments (COGs) are required to maintain an inventory of closed municipal solid waste landfills for their regional solid waste management plans.

**Government Publication Date: Oct 7, 2019**

**AACOG Closed Landfill Inventory:**

[AACOG CLI](#)

A list of permitted and unpermitted closed landfill sites made available by the Alamo Area Council of Governments (AACOG). Alamo Area Council of Governments (AACOG) is requested to maintain an inventory of closed municipal solid waste landfills for their regional solid waste management plans.

**Government Publication Date: Feb 6, 2020**

**Commercial Management Facilities for Hazardous Waste and Industrial Solid Wastes:**

[IHW](#)

This publication lists facilities that have permits or authorizations from the Texas Commission on Environmental Quality (TCEQ) to receive, on a commercial basis, and manage hazardous waste, industrial nonhazardous waste, or both.

**Government Publication Date: Dec 1, 2020**

**Industrial and Hazardous Waste - Receivers:**

[IHW RECEIVER](#)

List of active, inactive, and post-closure Industrial and Hazardous Waste Receiver Facilities permitted by or registered with the Texas Commission on Environmental Quality (TCEQ) under the Texas Administrative Code (TAC) Title 30 Chapter 335.

**Government Publication Date: Feb 22, 2022**

**Radioactive Waste Sites:**

RWS

This Texas Commission on Environmental Quality (TCEQ) database contains all sites in the State of Texas designated as Radioactive Waste sites as of 2006. The TCEQ no longer maintains this site listing.

**Government Publication Date: Jul 11, 2006**

**Leaking Petroleum Storage Tank Database:**

LPST

List of cleanup sites where contamination was caused by spills, leaks, or other releases of petroleum or hazardous substances from underground and/or aboveground storage tanks regulated by the Texas Commission on Environmental Quality (TCEQ).

**Government Publication Date: Feb 16, 2022**

**Delisted Leaking Storage Tanks:**

DELISTED LST

This database contains a list of leaking storage tank sites that were removed from the Texas Commission on Environmental Quality (TCEQ).

**Government Publication Date: Feb 16, 2022**

**Underground Petroleum Storage Tanks:**

UST

List of facilities that have one or more Underground Storage Tank (UST)s registered and regulated by the Texas Commission on Environmental Quality (TCEQ).

**Government Publication Date: Mar 4, 2022**

**Aboveground Storage Tanks:**

AST

List of facilities that have one or more Aboveground Storage Tank (AST)s registered and regulated by the Texas Commission on Environmental Quality (TCEQ).

**Government Publication Date: Mar 4, 2022**

**Petroleum Storage Tanks Database:**

PST

List of facilities included on the list of tank facilities made available by the Texas Commission on Environmental Quality (TCEQ) that have no association as either underground or aboveground tanks.

**Government Publication Date: Mar 4, 2022**

**Historical Tank Construction Notification:**

HIST TANK

A list of facilities with historic petroleum storage tank construction notification activity made available by the Texas Commission on Environmental Quality (TCEQ). Any person who intends either to install a new or replacement underground storage tank (UST), to remove a UST from the ground, to conduct a permanent abandonment in-place of a UST, or make any repairs or improvements of a UST must submit a Construction Notification Form.

**Government Publication Date: Mar 4, 2022**

**Austin Underground Storage Tanks:**

UST AUSTIN

A list of underground gas storage tanks both current and historical from the City of Austin Open Data Portal. Data provided by Planning and Zoning, City of Austin.

**Government Publication Date: Nov 4, 2021**

**Salt Caverns for Petroleum Storage:**

PETROL CAVERN

Listing of salt caverns for petroleum storage, made available by the Railroad Commission of Texas. Salt caverns, constructed in naturally occurring salt domes or salt beds, are used as storage for hydrocarbons including crude oil and natural gases.

**Government Publication Date: Sep 1, 2006**

**Delisted Storage Tanks:**

DTNK

This database contains a list of storage tank sites that were removed from the Texas Commission on Environmental Quality (TCEQ).

**Government Publication Date: Mar 4, 2022**

**Sites with Controls:**

AUL

Sites under several Texas Commission on Environmental Quality (TCEQ) remediation programs which have institutional or engineering controls.

**Government Publication Date: Dec 7, 2021**

**Voluntary Cleanup Program:**

VCP

List of sites which have participated or are currently participating in the Voluntary Cleanup Program (VCP) administered by the Texas Commission on Environmental Quality (TCEQ). The VCP provides administrative, technical, and legal incentives to encourage the cleanup of contaminated sites in Texas.

**Texas Railroad Commission Voluntary Cleanup Program:**

VCP RRC

List of facilities which have participated in or are currently participating in the Voluntary Cleanup Program (VCP) operated by the Railroad Commission of Texas (RRC). The RRC VCP provides an incentive to remediate Oil & Gas related pollution.

Government Publication Date: Mar 2, 2022

**Operator Cleanup Program:**

OP CLEANUP

A list of sites in the Texas Railroad Commission (RRC)'s Operator Cleanup Program (OCP). The OCP, under the Site Remediation Section, is tasked with oversight of complex pollution cleanups performed by the oil and gas industry. Complex sites include those that occur in sensitive environmental areas as defined by 16 TAC3.91 (SWR 91) and may require site specific cleanup levels based on risk. When cleanup activities are successfully completed by the operator, Commission staff may issue a "No Further Action" letter acknowledging completion.

Government Publication Date: Jan 24, 2022

**Innocent Owner/Operator Program:**

IOP

A list of sites in the Innocent Owner/Operator Program (IOP) made available by Texas Commission of Environmental Quality (TCEQ). IOP provides certificates to innocent owners or operators whom their properties are contaminated as a result of a release or migration of contaminants from a source or sources not located on the property, and they did not cause or contribute to the source or sources of contamination.

Government Publication Date: Dec 6, 2021

**Brownfields Site Assessments Database:**

BROWNFIELDS

Former industrial properties which lie dormant or underutilized due to liability associated with real or perceived contamination are broadly referred to as brownfields. The Texas Commission on Environmental Quality (TCEQ), in close partnership with other federal, state, and local stakeholders, facilitates the cleanup, transferability, and revitalization of brownfields.

Government Publication Date: Sep 9, 2021

**Texas Railroad Commission Brownfields:**

BROWN RRC

List of sites which have participated or are currently participating in the Railroad Commission of Texas (RRC) Brownfields Response Program (BRP). The RRC BRP provides technical and financial support for redevelopment of abandoned oil and gas sites.

Government Publication Date: Mar 1, 2022

**Municipal Setting Designation:**

MSD

Municipal Setting Designations (MSD) list is maintained by Texas Commission on Environmental Quality (TCEQ). An MSD is an official state designation given to property within a municipality or its extraterritorial jurisdiction that certifies that designated groundwater at the property is not used as potable water, and is prohibited from future use as potable water because that groundwater is contaminated in excess of the applicable potable-water protective concentration level.

**Leaking Underground Storage Tanks (LUSTs) on Tribal/Indian Lands:**

INDIAN LUST

Leaking Underground Storage Tanks (LUSTs) on Tribal/Indian Lands in EPA Region 6, which include Texas. There are no LUST records in Texas at this time.

Government Publication Date: Oct 6, 2017

**Underground Storage Tanks (USTs) on Indian Lands:**

INDIAN UST

Listing of underground storage tanks (USTs) on Tribal/Indian Lands in EPA Region 6, which includes Texas.

Government Publication Date: Oct 13, 2021

**Delisted Tribal Leaking Storage Tanks:**

DELISTED ILST

Leaking Underground Storage Tank facilities which have been removed from the Regional Tribal LUST lists made available by the EPA.

Government Publication Date: Oct 12, 2021

**Delisted Tribal Underground Storage Tanks:**

DELISTED IUST

Underground Storage Tank facilities which have been removed from the Regional Tribal UST lists made available by the EPA.

#### **Facility Registry Service/Facility Index:**

[FINDS/FRS](#)

The Facility Registry Service (FRS) is a centrally managed database that identifies facilities, sites, or places subject to environmental regulations or of environmental interest. FRS creates high-quality, accurate, and authoritative facility identification records through rigorous verification and management procedures that incorporate information from program national systems, state master facility records, and data collected from EPA's Central Data Exchange registrations and data management personnel. This list is made available by the Environmental Protection Agency (US EPA).

#### **Toxics Release Inventory (TRI) Program:**

[TRIS](#)

The EPA's Toxics Release Inventory (TRI) is a database containing data on disposal or other releases of over 650 toxic chemicals from thousands of U.S. facilities and information about how facilities manage those chemicals through recycling, energy recovery, and treatment. One of TRI's primary purposes is to inform communities about toxic chemical releases to the environment.

**Government Publication Date: Aug 24, 2021**

#### **Perfluorinated Alkyl Substances (PFAS) Releases:**

[PFAS TRI](#)

List of Toxics Release Inventory (TRI) facilities at which the reported chemical is a Per- or polyfluorinated alkyl substance (PFAS) included in the Environmental Protection Agency (EPA)'s consolidated PFAS Master List of PFAS Substances. The EPA's Toxics Release Inventory (TRI) is a database containing data on disposal or other releases of over 650 toxic chemicals from thousands of U.S. facilities and information about how facilities manage those chemicals through recycling, energy recovery, and treatment.

#### **PFOA/PFOS Contaminated Sites:**

[PFAS NPL](#)

List of sites where PFOA or PFOS contaminants have been found in drinking water or soil. Made available by the Federal Environmental Protection Agency (EPA).

**Government Publication Date: Jan 11, 2022**

#### **SSEHRI PFAS Contamination Sites:**

[PFAS SSEHRI](#)

This PFAS Contamination Site Tracker database is compiled by the Social Science Environmental Health Research Institute (SSEHRI) at Northeastern University. According to the SSEHRI, the database records qualitative and quantitative data from each known site of PFAS contamination, including timeline of discovery, sources, levels, health impacts, community response, and government response. The goal of this database is to compile information and support public understanding of the rapidly unfolding issue of PFAS contamination. All data presented was extracted from government websites, news articles, or publicly available documents, and this is cited in the tracker. Disclaimer: The source conveys this database undergoes regular updates as new information becomes available, some sites may be missing and/or contain information that is incorrect or outdated, as well as their information represents all contamination sites SSEHRI is aware of, not all possible contamination sites. This data is not intended to be used for legal purposes. Limited location details are available with this data. US DOT - Department of Transportation Pipeline and Hazardous Materials Safety Administration (PHMSA) Incidents Reports Database taken from Hazmat Intelligence Portal, U.S. Department of Transportation.

**Government Publication Date: Sep 1, 2020**

**National Clandestine Drug Labs:**

NCDL

The U.S. Department of Justice ("the Department") provides this data as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy.

**Government Publication Date: Nov 22, 2021**

**Toxic Substances Control Act:**

TSCA

The Environmental Protection Agency (EPA) is amending the Toxic Substances Control Act (TSCA) section 8(a) Inventory Update Reporting (IUR) rule and changing its name to the Chemical Data Reporting (CDR) rule.

The CDR enables EPA to collect and publish information on the manufacturing, processing, and use of commercial chemical substances and mixtures (referred to hereafter as chemical substances) on the TSCA Chemical Substance Inventory (TSCA Inventory). This includes current information on chemical substance production volumes, manufacturing sites, and how the chemical substances are used. This information helps the Agency determine whether people or the environment are potentially exposed to reported chemical substances. EPA publishes submitted CDR data that is not Confidential Business Information (CBI).

**Government Publication Date: Apr 11, 2019**

**Hist TSCA:**

HIST TSCA

The Environmental Protection Agency (EPA) is amending the Toxic Substances Control Act (TSCA) section 8(a) Inventory Update Reporting (IUR) rule and changing its name to the Chemical Data Reporting (CDR) rule.

The 2006 IUR data summary report includes information about chemicals manufactured or imported in quantities of 25,000 pounds or more at a single site during calendar year 2005. In addition to the basic manufacturing information collected in previous reporting cycles, the 2006 cycle is the first time EPA collected information to characterize exposure during manufacturing, processing and use of organic chemicals. The 2006 cycle also is the first time manufacturers of inorganic chemicals were required to report basic manufacturing information.

**Government Publication Date: Dec 31, 2006**

**FTTS Administrative Case Listing:**

FTTS ADMIN

An administrative case listing from the Federal Insecticide, Fungicide, & Rodenticide Act (FIFRA) and Toxic Substances Control Act (TSCA), together known as FTTS. This database was obtained from the Environmental Protection Agency's (EPA) National Compliance Database (NCDB). The FTTS and NCDB was shut down in 2006.

**Government Publication Date: Jan 19, 2007**

**FTTS Inspection Case Listing:**

FTTS INSP

An inspection case listing from the Federal Insecticide, Fungicide, & Rodenticide Act (FIFRA) and Toxic Substances Control Act (TSCA), together known as FTTS. This database was obtained from the Environmental Protection Agency's (EPA) National Compliance Database (NCDB). The FTTS and NCDB was shut down in 2006.

**Government Publication Date: Jan 19, 2007**

**Potentially Responsible Parties List:**

PRP

Early in the cleanup process, the Environmental Protection Agency (EPA) conducts a search to find the potentially responsible parties (PRPs). EPA looks for evidence to determine liability by matching wastes found at the site with parties that may have contributed wastes to the site.

**Government Publication Date: Oct 20, 2021**

**State Coalition for Remediation of Drycleaners Listing:**

SCRD DRYCLEANER

The State Coalition for Remediation of Drycleaners (SCRD) was established in 1998, with support from the U.S. Environmental Protection Agency (EPA) Office of Superfund Remediation and Technology Innovation. Coalition members are states with mandated programs and funding for drycleaner site remediation. Current members are Alabama, Connecticut, Florida, Illinois, Kansas, Minnesota, Missouri, North Carolina, Oregon, South Carolina, Tennessee, Texas, and Wisconsin.

**Government Publication Date: Nov 08, 2017**

**Integrated Compliance Information System (ICIS):**

ICIS

The Integrated Compliance Information System (ICIS) is a system that provides information for the Federal Enforcement and Compliance (FE&C) and the National Pollutant Discharge Elimination System (NPDES) programs. The FE&C component supports the Environmental Protection Agency's (EPA) Civil Enforcement and Compliance program activities. These activities include Compliance Assistance, Compliance Monitoring and Enforcement. The NPDES program supports tracking of NPDES permits, limits, discharge monitoring data and other program reports.

**Government Publication Date: Oct 14, 2021**

**Drycleaner Facilities:**

FED DRYCLEANERS

A list of drycleaner facilities from Enforcement and Compliance History Online (ECHO) online search. The Environmental Protection Agency (EPA) tracks facilities that possess NAIC and SIC codes that classify businesses as drycleaner establishments.

**Government Publication Date: May 5, 2021**

**Delisted Drycleaner Facilities:**

**DELISTED FED DRY**

List of sites removed from the list of Drycleaner Facilities (sites in the EPA's Integrated Compliance Information System (ICIS) with NAIC or SIC codes identifying the business as a drycleaner establishment).

**Government Publication Date: May 5, 2021**

**Formerly Used Defense Sites:**

**FUDS**

Formerly Used Defense Sites (FUDS) are properties that were formerly owned by, leased to, or otherwise possessed by and under the jurisdiction of the Secretary of Defense prior to October 1986, where the Department of Defense (DoD) is responsible for an environmental restoration. This list is published by the U.S. Army Corps of Engineers.

**Government Publication Date: May 26, 2021**

**Former Military Nike Missile Sites:**

**FORMER NIKE**

This information was taken from report DRXTH-AS-IA-83A016 (Historical Overview of the Nike Missile System, 12/1984) which was performed by Environmental Science and Engineering, Inc. for the U.S. Army Toxic and Hazardous Materials Agency Assessment Division. The Nike system was deployed between 1954 and the mid-1970's. Among the substances used or stored on Nike sites were liquid missile fuel (JP-4); starter fluids (UDKH, aniline, and furfuryl alcohol); oxidizer (IRFNA); hydrocarbons (motor oil, hydraulic fluid, diesel fuel, gasoline, heating oil); solvents (carbon tetrachloride, trichloroethylene, trichloroethane, stoddard solvent); and battery electrolyte. The quantities of material a disposed of and procedures for disposal are not documented in published reports. Virtually all information concerning the potential for contamination at Nike sites is confined to personnel who were assigned to Nike sites. During deactivation most hardware was shipped to depot-level supply points. There were reportedly instances where excess materials were disposed of on or near the site itself at closure. There was reportedly no routine site decontamination.

**Government Publication Date: Dec 2, 1984**

**PHMSA Pipeline Safety Flagged Incidents:**

**PIPELINE INCIDENT**

A list of flagged pipeline incidents made available by the U.S. Department of Transportation (US DOT) Pipeline and Hazardous Materials Safety Administration (PHMSA). PHMSA regulations require incident and accident reports for five different pipeline system types.

**Government Publication Date: Jul 7, 2020**

**Material Licensing Tracking System (MLTS):**

**MLTS**

A list of sites that store radioactive material subject to the Nuclear Regulatory Commission (NRC) licensing requirements. This list is maintained by the NRC. As of September 2016, the NRC no longer releases location information for sites. Site locations were last received in July 2016.

**Government Publication Date: May 11, 2021**

**Historic Material Licensing Tracking System (MLTS) sites:**

**HIST MLTS**

A historic list of sites that have inactive licenses and/or removed from the Material Licensing Tracking System (MLTS). In some cases, a site is removed from the MLTS when the state becomes an "Agreement State". An Agreement State is a State that has signed an agreement with the Nuclear Regulatory Commission (NRC) authorizing the State to regulate certain uses of radioactive materials within the State.

**Government Publication Date: Jan 31, 2010**

**Mines Master Index File:**

**MINES**

The Master Index File (MIF) contains mine identification numbers issued by the Department of Labor Mine Safety and Health Administration (MSHA) for mines active or opened since 1971. Note that addresses may or may not correspond with the physical location of the mine itself.

**Government Publication Date: Nov 2, 2021**

**Surface Mining Control and Reclamation Act Sites:**

**SMCRA**

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by the Office of Surface Mining Reclamation and Enforcement (OSMRE) to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of Abandoned Mine Land (AML) impacts, as well as information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

**Mineral Resource Data System:**

**MRDS**

The Mineral Resource Data System (MRDS) is a collection of reports describing metallic and nonmetallic mineral resources throughout the world. Included are deposit name, location, commodity, deposit description, geologic characteristics, production, reserves, resources, and references. This database contains the records previously provided in the Mineral Resource Data System (MRDS) of USGS and the Mineral Availability System/Mineral Industry Locator System (MAS/MILS) originated in the U.S. Bureau of Mines, which is now part of USGS. The USGS has ceased systematic updates of the MRDS database with their focus more recently on deposits of critical minerals while providing a well-documented baseline of historical mine locations from USGS topographic maps.

**Uranium Mill Tailings Radiation Control Act Sites:**

**URANIUM**

The Legacy Management Office of the Department of Energy (DOE) manages radioactive and chemical waste, environmental contamination, and hazardous material at over 100 sites across the U.S. The L.M. Office manages this database of sites registered under the Uranium Mill Tailings Control Act (UMTRCA).

**Government Publication Date: Mar 4, 2017**

**Alternative Fueling Stations:**

**ALT FUELS**

List of alternative fueling stations made available by the US Department of Energy's Office of Energy Efficiency & Renewable Energy. Includes Biodiesel stations, Ethanol (E85) stations, Liquefied Petroleum Gas (Propane) stations, Ethanol (E85) stations, Natural Gas stations, Hydrogen stations, and Electric Vehicle Supply Equipment (EVSE). The National Renewable Energy Laboratory (NREL) obtains information about new stations from trade media, Clean Cities coordinators, a Submit New Station form on the Station Locator website, and through collaborating with infrastructure equipment and fuel providers, original equipment manufacturers (OEMs), and industry groups.

**Government Publication Date: Dec 21, 2021**

**Registered Pesticide Establishments:**

**SSTS**

List of active EPA-registered foreign and domestic pesticide-producing and device-producing establishments based on data from the Section Seven Tracking System (SSTS). The Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) Section 7 requires that facilities producing pesticides, active ingredients, or devices be registered. The list of establishments is made available by the EPA.

**Government Publication Date: Apr 13, 2021**

**Polychlorinated Biphenyl (PCB) Notifiers:**

**PCB**

Facilities included in the national list of facilities that have notified the United States Environmental Protection Agency (EPA) of Polychlorinated Biphenyl (PCB) activities. Any company or person storing, transporting or disposing of PCBs or conducting PCB research and development must notify the EPA and receive an identification number.

**Dry Cleaner Remediation Program Prioritization List:**

**PRIORITY CLEAN**

The Texas Commission on Environmental Quality (TCEQ) implements environmental standards for dry cleaners. The Dry Cleaner Remediation Program (DCRP) establishes a prioritization list of dry cleaner sites and administers the Dry Cleaning Remediation fund to assist with remediation of contamination caused by dry cleaning solvents. Includes prioritized sites identified under the DCRP, as well as sites closed under the DCRP.

**Government Publication Date: Sep 1, 2021**

**Registered Dry Cleaning Facilities:**

**DRYCLEANERS**

The Texas Commission of Environment Quality (TCEQ) maintains a statewide registration list of current dry cleaners.

**Government Publication Date: Mar 4, 2022**

**Delisted Drycleaning Facility List:**

**DELISTED DRYCLEANERS**

A list of sites which were have been removed from the list of dry cleaning facilities registered with the Texas Commission of Environment Quality (TCEQ). Sites are removed when they are no longer used as dry cleaning facilities.

**Government Publication Date: Mar 4, 2022**

**Groundwater Contamination Cases:**

**GWCC**

List of sites present in the TCEQ Groundwater Contamination Viewer, which represent groundwater contamination cases in Texas as per TCEQ publication SFR-056 (current and some previous years). The Joint Groundwater Monitoring and Contamination Report (SFR-056) was designed and produced by the Texas Groundwater Protection Committee in fulfillment of requirements given in Section 26.406 of the Texas Water Code. The information does not represent an on-the-ground survey and represents only the approximate relative location of property boundaries.

**Government Publication Date: Mar 17, 2021**

**Historical Groundwater Contamination Cases:**

GWCC HIST

List of sites from a Joint Groundwater Monitoring and Contamination Report provided by the Texas Commission on Environmental Quality (TCEQ) with the Railroad Commission of Texas (RRC). The annual report describes the status of groundwater monitoring activities conducted or required by each agency at regulated facilities or associated with regulated activities. The report provides a general overview of groundwater monitoring by participating members on a program by program basis. Groundwater contamination is broadly defined in the report as any detrimental alteration of the naturally occurring quality of groundwater.

**Government Publication Date:** Dec 31, 2018

**Affected Property Assessment Reports:**

APAR

List of sites for which an Affected Property Assessment Report has been submitted to the Texas Commission on Environmental Quality (TCEQ). An APAR is required when a person is addressing a release of COCs under 30 TAC Chapter 350, the Texas Risk Reduction Program (TRRP). The purpose of the APAR is to document all relevant affected property information to identify all release sources and chemicals of concern (COCs), determine the extent of all COCs, identify all transport/exposure pathways, and to determine if any response actions are necessary.

**Government Publication Date:** May 14, 2021

**Spills Database:**

SPILLS

List of Spills reported to Emergency Response Division of the Texas Commission on Environmental Quality (TCEQ).

**Government Publication Date:** Jun 29, 2021

**Industrial and Hazardous Waste Sites with Corrective Actions:**

IHW CORR ACTION

List of Industrial and Hazardous Waste sites with Corrective Actions made available by the Texas Commission of Environmental Quality (TCEQ). The mission of the industrial and hazardous waste (IHW) corrective action program is to oversee the cleanup of sites contaminated from industrial and municipal hazardous and industrial nonhazardous wastes.

**Government Publication Date:** Mar 7, 2022

**Per- and Polyfluoroalkyl Substances (PFAS):**

PFAS

A list of sites from the Central Registry and ARTS databases where Per- and Polyfluoroalkyl substances (PFAS) containing materials may be of concern. This list is made available by the Remediation Division of the Texas Commission on Environmental Quality (TCEQ).

**Government Publication Date:** Feb 23, 2022

**Environmental Liens Listing:**

LIENS

List of sites/facilities against which the Texas Commission on Environmental Quality (TCEQ) has placed liens to recover cleanup costs associated with Federal or State Superfund cleanup activities.

**Government Publication Date:** Dec 7, 2021

**Inactive Regulated RCRA Generator Facilities:**

HIST RCRA GEN

A list of facilities which were once registered as generators of hazardous waste, but are no longer active or no longer require registration. The U.S. Environmental Protection Agency (EPA) requires the Texas Commission on Environmental Quality (TCEQ) to investigate hazardous waste generators. If an unregistered/inactive industrial site generates less than 220 pounds of hazardous or Class 1 industrial waste, it does not have to notify or report to the TCEQ.

**Government Publication Date:** Mar 22, 2021

**Recycle Texas Online Program:**

RTOL

A list of recycling facilities under the Recycle Texas Online service/program made available by the Texas Commission of Environmental Quality (TCEQ). This program allowed facilities to self-report and post their own company/facility information. This program is no longer maintained and these data will not be updated.

**Government Publication Date:** Oct 10, 2011

**Underground Injection Control:**

UIC

List of underground injection control (UIC) permits in the Texas Commission on Environmental Quality (TCEQ) Central Registry database. Includes Class I, Class III, Class IV, Class 5, and non permitted UICs; does not include injection wells regulated by the Railroad Commission of Texas.

**Government Publication Date:** Dec 9, 2020

**Industrial and Hazardous Waste - Generators:**

IHW GENERATOR

List of active, inactive, and post-closure Industrial and Hazardous Waste Generator Facilities permitted by or registered with the Texas Commission on Environmental Quality (TCEQ) under the Texas Administrative Code (TAC) Title 30 Chapter 335.

**Government Publication Date:** Feb 22, 2022

**Industrial and Hazardous Waste - Transporters:**

IHW TRANSPORT

List of active, inactive, and post-closure Industrial and Hazardous Waste Transporter Facilities permitted by or registered with the Texas Commission on Environmental Quality (TCEQ) under the Texas Administrative Code (TAC) Title 30 Chapter 335.

**Government Publication Date: Feb 22, 2022**

**New Source Review (NSR) Permits:**

AIR PERMITS

A list of facilities that have applied for New Source Review air permits made available by the Texas Commission on Environmental Quality (TCEQ).

**Government Publication Date: Sep 9, 2020**

**Tier 2 Report:**

TIER 2

A list of facilities in Texas that store hazardous chemicals and are required to report them under the Emergency Planning and Community Right-to-Know Act (EPCRA) of 1986. This list is made available by the Department of State Health Services (DSHS).

**Government Publication Date: Dec 31, 2012**

**Edwards Aquifer Permits:**

EDWARDS AQUIFER

Listing of Edwards Aquifer permits made available by the Texas Commission on Environmental Quality (TCEQ). The Edwards Aquifer is home to diverse fauna and is a drinking water source for the city of San Antonio and surrounding central Texas communities. Before building on the recharge, transition, or contributing zones of the Edwards Aquifer, a plan must first be reviewed and approved by the TCEQ Edwards Aquifer Protection Program.

**Government Publication Date: Jul 21, 2006**

**Tribal**

**No Tribal additional environmental record sources available for this State.**

**County**

**No County additional environmental record sources available for this State.**

# Definitions

**Database Descriptions:** This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

**Detail Report:** This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

**Distance:** The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries. All values are an approximation.

**Direction:** The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

**Elevation:** The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

**Executive Summary:** This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

**Map Key:** The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

**Unplottables:** These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and are included as reference.

**APPENDIX E  
CREDENTIALS**

# MELISSA STEVENS

## ENVIRONMENTAL PROJECT MANAGER

### PROFESSIONAL EXPERIENCE

Ms. Stevens has conducted Phase I Environmental Site Assessments for vacant tracts, retail centers, office buildings, downtown properties, and industrial facilities throughout Texas. She writes Phase I Environmental Site Assessments and Transaction Screens, researches city directories, historical fire insurance maps, and regulatory agency files, and reviews aerial photographs and topographic maps. Ms. Stevens also attends monitoring well sampling events and subsurface investigations, and performs soil resistivity surveys.

Ms. Stevens also performs numerous NEPA Land Use Screenings. Screenings include the evaluation of numerous potential land use criteria such as wilderness areas, wildlife preserves, listed threatened or endangered species or designated critical habitat, National Historic Register sites, Indian religious sites, floodplains, and surface features (wetlands, deforestation, water diversion).

### PROJECT EXPERIENCE

#### Concordia University – Austin, Texas

Project Manager for Environmental Site Assessment on the Concordia University campus consisting of nineteen buildings (which included instructional buildings, administrative offices, dormitories, a chapel, maintenance facilities, and athletic facilities) and parking and landscaping areas.

# HILARY D. JOHNS, P.G.

## MANAGER OF ENVIRONMENTAL SERVICES / PRINCIPAL

### PROFESSIONAL EXPERIENCE

Mr. Johns is the manager of environmental services in Terracon's Austin office. He has more than 23 years of experience in the development and management of environmental services. He ensures quality standards are met and communicated to our clients. Mr. Johns is experienced in the performance of ESAs under the All Appropriate Inquiry rule (ASTM 1527-13), and meets the requirements of an Environmental Professional as defined by this rule.

In addition to supervising the preparation of 20 to 30 environmental site assessment reports per month, Mr. Johns directs an indoor air quality group including licensed asbestos and lead-based paint inspectors and consultants and certified mold inspection professionals. This includes the collection and analysis of bulk material samples, preparation of operation and maintenance (O&M) programs for managing potentially hazardous building materials in place, preparation of materials removal specifications and abatement contractor supervision and on-site air monitoring.

Mr. Johns supervises other environmental consulting services including subsurface investigations, underground fuel storage tank removal and remediation, hazardous waste remediation (including dry cleaners and shooting ranges), landfill investigations and preparation of reports and applications for Texas' Voluntary Cleanup Program and Innocent Owner/Operator Program that are administered by the Texas Commission on Environmental Quality (TCEQ).

Other environmental services conducted in the Austin office under Mr. Johns' supervision include the preparation of geologic site assessments required by the TCEQ when development is being conducted over the environmentally sensitive Edwards Aquifer Recharge Zone and environmental assessments required by the City of Austin and other nearby cities when development is being conducted in areas of potential "critical environmental features", including wetland areas. Environmental professionals in Mr. Johns' group also prepare USACE wetland determinations, delineations, wetland mitigation plans and Section 404 Permit applications.

Mr. Johns has extensive work experience reviewing proposals for hazardous and solid waste management projects for the TCEQ. His experience includes preparation of RCRA facility assessments and technical reviews of Part B permit applications. He has prepared hazardous and non-hazardous waste permits for land disposal, storage/processing facilities and post-closure care. Mr. Johns also has experience providing services for the gas and oil exploration industries.

### **Rocky Creek Ranch– Travis County, Texas**

Project Manager for a Phase I Environmental Site Assessment for a 470-acre ranch which is in the process of being re-developed into several residential subdivisions. The site was previously developed with a ranch house, water well, cattle management structures, and re-development activities include new road network, numerous stormwater management structures and a wastewater treatment plant with spray irrigation system. The project was conducted for a developer who was buying the site from a bankruptcy court. An updated report was prepared approximately six months after the original report to support re-financing of the wastewater treatment plant.

### **South Shore District – Austin, Texas**

Project Manager for a Phase I Environmental Site Assessment for a 25 acre tract just south of downtown Austin, currently developed with two apartment complexes, a retail center and several other small retail buildings. The entire site is to be demolished and re-developed with a significant urban infill community. Terracon previously conducted asbestos surveys on the apartment complexes, investigated a former onsite gas station and former onsite drycleaner. The dry cleaner had experienced releases to the soil and groundwater on the site, and Terracon assisted the site owner to achieve site closure through the State's Voluntary Cleanup Program. The client continues to acquire adjacent properties to add to the total acreage holding, and Terracon is working with the client's due diligence team in these acquisitions.

**Professional Services Completed:** 2007-2012

**Project Completed:** Ongoing

**Terracon Fee:** over \$100,000

### **Block 18 Hotel – Austin, Texas**

Project Manager for a Phase I Environmental Site Assessment of a downtown city block which formerly was developed with numerous auto repair facilities. Terracon previously conducted asbestos surveys and assisted the owner in the removal of asbestos prior to building demolition. Terracon's subsurface investigations also determined that the site groundwater has been impacted by an historic, offsite coal gasification facility, and the groundwater is to be encountered during construction of the below-grade parking garage. Terracon is preparing documentation for the State's Innocent Owner Program for the impacts from the offsite source, and is assisting the client in the preparation of documents for permitting the collection, treatment and discharge of impacted groundwater in the lower levels of the parking structure.

### **The Domain Mixed-Use Development; Austin, Texas**

Project Manager for numerous environmental projects conducted at a 200-acre, former IBM manufacturing facility, which is in the process of being converted to a high-profile, mixed use development (retail / residential / office) complex. The former IBM facility supported a fuel tank farm and power plant, wastewater treatment system (including ponds) and over a million square feet of office and electronic equipment manufacturing space, and portion of the site has been under remediation since 1985 for a release of chlorinated solvents which impacted several subsurface water-bearing zones.. Since 2005, Terracon has conducted Phase I ESAs for the site owner and for various parties who are acquiring specific portions of the site. Terracon has conducted asbestos surveys and abatement projects prior to old building demolition, has conducted subsurface investigations to demonstrate that specific portions of the site were not impacted from previous

manufacturing activities, and has conducted vapor encroachment investigations to demonstrate that new buildings to be developed on the site will not have a vapor issue.

**DESCRIPTION OF TERMS AND ACRONYMS**

## Description of Selected General Terms and Acronyms

Term/Acronym	Description
ACM	<p>Asbestos Containing Material. Asbestos is a naturally occurring mineral, three varieties of which (chrysotile, amosite, crocidolite) have been commonly used as fireproofing or binding agents in construction materials. Exposure to asbestos, as well as ACM, has been documented to cause lung diseases including asbestosis (scarring of the lung), lung cancer and mesothelioma (a cancer of the lung lining).</p> <p>Regulatory agencies have generally defined ACM as a material containing greater than one (1) percent asbestos, however some states (e.g. California) define ACM as materials having 0.1% asbestos. In order to define a homogenous material as non-ACM, a minimum number of samples must be collected from the material dependent upon its type and quantity. Homogenous materials defined as non-ACM must either have 1) no asbestos identified in all of its samples or 2) an identified asbestos concentration below the appropriate regulatory threshold. Asbestos concentrations are generally determined using polarized light microscopy or transmission electron microscopy. Point counting is an analytical method to statistically quantify the percentage of asbestos in a sample. The asbestos component of ACM may either be friable or non-friable. Friable materials, when dry, can be crumbled, pulverized, or reduced to powder by hand pressure and have a higher potential for a fiber release than non-friable ACM. Non-friable ACM are materials that are firmly bound in a matrix by plastic, cement, etc. and, if handled carefully, will not become friable.</p> <p>Federal and state regulations require that either all suspect building materials be presumed ACM or that an asbestos survey be performed prior to renovation, dismantling, demolition, or other activities that may disturb potential ACM. Notifications are required prior to demolition and/or renovation activities that may impact the condition of ACM in a building. ACM removal may be required if the ACM is likely to be disturbed or damaged during the demolition or renovation. Abatement of friable or potentially friable ACM must be performed by a licensed abatement contractor in accordance with state rules and NESHAP. Additionally, OSHA regulations for work classification, worker training and worker protection will apply.</p>
AHERA	Asbestos Hazard Emergency Response Act
AST	Aboveground Storage Tanks. ASTs are generally described as storage tanks less than 10% of which are below ground (i.e., buried). Tanks located in a basement, but not buried, are also considered ASTs. Whether, and the extent to which, an AST is regulated, is determined on a case-by-case basis and depends upon tank size, its contents and the jurisdiction of its location.
BGS	Below Ground Surface
Brownfields	State and/or tribal listing of Brownfield properties addressed by Cooperative Agreement Recipients or Targeted Brownfields Assessments.
BTEX	Benzene, Toluene, Ethylbenzene, and Xylenes. BTEX are VOC components found in gasoline and commonly used as analytical indicators of a petroleum hydrocarbon release.
CERCLA	Comprehensive Environmental Response, Compensation and Liability Act (a.k.a. Superfund). CERCLA is the federal act that regulates abandoned or uncontrolled hazardous waste sites. Under this Act, joint and several liability may be imposed on potentially responsible parties for cleanup-related costs.
CERCLIS	Comprehensive Environmental Response, Compensation and Liability Information System. An EPA compilation of sites having suspected or actual releases of hazardous substances to the environment. CERCLIS also contains information on site inspections, preliminary assessments and remediation of hazardous waste sites. These sites are typically reported to EPA by states and municipalities or by third parties pursuant to CERCLA Section 103.
CESQG	Conditionally Exempt Small Quantity Generators
CFR	Code of Federal Regulations

## Description of Selected General Terms and Acronyms

Term/Acronym	Description
CREC	Controlled Recognized Environmental Condition is defined in ASTM E1527-13 as “a recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority) , with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls). A condition considered by the environmental professional to be a controlled recognized environmental condition shall be listed in the findings section of the Phase I Environmental Site Assessment report, and as a recognized environmental condition in the conclusions section of the Phase I Environmental Site Assessment report.”
DOT	U.S. Department of Transportation
EPA	U.S. Environmental Protection Agency
ERNS	Emergency Response Notification System. An EPA-maintained federal database which stores information on notifications of oil discharges and hazardous substance releases in quantities greater than the applicable reportable quantity under CERCLA. ERNS is a cooperative data-sharing effort between EPA, DOT, and the National Response Center.
ESA	Environmental Site Assessment
FRP	Fiberglass Reinforced Plastic
Hazardous Substance	As defined under CERCLA, this is (A) any substance designated pursuant to section 1321(b)(2)(A) of Title 33, (B) any element, compound, mixture, solution, or substance designated pursuant to section 9602 of this title; (C) any hazardous waste having characteristics identified under or listed pursuant to section 3001 of the Solid Waste Disposal Act (with some exclusions); (D) any toxic pollutant listed under section 1317(a) of Title 33; (E) any hazardous air pollutant listed under section 112 of the Clean Air Act; and (F) any imminently hazardous chemical substance or mixture with respect to which the EPA Administrator has taken action under section 2606 of Title 15. This term does not include petroleum, including crude oil or any fraction thereof which is not otherwise listed as a hazardous substance under subparagraphs (A) through (F) above, and the term include natural gas, or synthetic gas usable for fuel (or mixtures of natural gas and such synthetic gas).
Hazardous Waste	This is defined as having characteristics identified or listed under section 3001 of the Solid Waste Disposal Act (with some exceptions). RCRA, as amended by the Solid Waste Disposal Act of 1980, defines this term as a “solid waste, or combination of solid wastes, which because of its quantity, concentration, or physical, chemical, or infectious characteristics may (A) cause, or significantly contribute to an increase in mortality or an increase in serious irreversible, or incapacitating reversible illness; or (B) pose a substantial present or potential hazard to human health or the environment when improperly treated, stored, transported, or disposed of, or otherwise managed.”
HREC	Historical Recognized Environmental Condition is defined in ASTM E1527-13 as “a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted residential use criteria established by a regulatory authority, without subjecting the property to any required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls). Before calling the past release a historical recognized environmental condition, the environmental professional must determine whether the past release is a recognized environmental condition at the time of the Phase I Environmental Site Assessment is conducted (for example, if there has been a change in the regulatory criteria). If the EP considers the past release to be a recognized environmental condition at the time the Phase I ESA is conducted, the condition shall be included in the conclusions section of the report as a recognized environmental condition.”

## Description of Selected General Terms and Acronyms

Term/Acronym	Description
IC/EC	A listing of sites with institutional and/or engineering controls in place. IC include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls. EC include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.
ILP	Innocent Landowner/Operator Program
LQG	Large Quantity Generators
LUST	Leaking Underground Storage Tank. This is a federal term set forth under RCRA for leaking USTs. Some states also utilize this term.
MCL	Maximum Contaminant Level. This Safe Drinking Water concept (and also used by many states as a ground water cleanup criteria) refers to the limit on drinking water contamination that determines whether a supplier can deliver water from a specific source without treatment.
MSDS	Material Safety Data Sheets. Written/printed forms prepared by chemical manufacturers, importers and employers which identify the physical and chemical traits of hazardous chemicals under OSHA's Hazard Communication Standard.
NESHAP	National Emissions Standard for Hazardous Air Pollutants (Federal Clean Air Act). This part of the Clean Air Act regulates emissions of hazardous air pollutants.
NFRAP	Facilities where there is "No Further Remedial Action Planned," as more particularly described under the Records Review section of this report.
NOV	Notice of Violation. A notice of violation or similar citation issued to an entity, company or individual by a state or federal regulatory body indicating a violation of applicable rule or regulations has been identified.
NPDES	National Pollutant Discharge Elimination System (Clean Water Act). The federal permit system for discharges of polluted water.
NPL	The NPL is the EPA's database of uncontrolled or abandoned hazardous waste facilities that have been listed for priority remedial actions under the Superfund Program.
OSHA	Occupational Safety and Health Administration or Occupational Safety and Health Act
PACM	Presumed Asbestos-Containing Material. A material that is suspected of containing or presumed to contain asbestos but which has not been analyzed to confirm the presence or absence of asbestos.
PCB	Polychlorinated Biphenyl. A halogenated organic compound commonly in the form of a viscous liquid or resin, a flowing yellow oil, or a waxy solid. This compound was historically used as dielectric fluid in electrical equipment (such as electrical transformers and capacitors, electrical ballasts, hydraulic and heat transfer fluids), and for numerous heat and fire sensitive applications. PCB was preferred due to its durability, stability (even at high temperatures), good chemical resistance, low volatility, flammability, and conductivity. PCBs, however, do not break down in the environment and are classified by the EPA as a suspected carcinogen. 1978 regulations, under the Toxic Substances Control Act, prohibit manufacturing of PCB-containing equipment; however, some of this equipment may still be in use today.
pCi/L	picoCuries per Liter of Air. Unit of measurement for Radon and similar radioactive materials.
PLM	Polarized Light Microscopy (see ACM section of the report, if included in the scope of services)
PST	Petroleum Storage Tank. An AST or UST that contains a petroleum product.

## Description of Selected General Terms and Acronyms

Term/Acronym	Description
Radon	A radioactive gas resulting from radioactive decay of naturally-occurring radioactive materials in rocks and soils containing uranium, granite, shale, phosphate, and pitchblende. Radon concentrations are measured in picoCuries per Liter of Air. Exposure to elevated levels of radon creates a risk of lung cancer; this risk generally increases as the level of radon and the duration of exposure increases. Outdoors, radon is diluted to such low concentrations that it usually does not present a health concern. However, radon can accumulate in building basements or similar enclosed spaces to levels that can pose a risk to human health. Indoor radon concentrations depend primarily upon the building's construction, design and the concentration of radon in the underlying soil and ground water. The EPA recommended annual average indoor "action level" concentration for residential structures is 4.0 pCi/l.
RCRA	Resource Conservation and Recovery Act. Federal act regulating solid and hazardous wastes from point of generation to time of disposal ("cradle to grave"). 42 U.S.C. 6901 et seq.
RCRA Generators	The RCRA Generators database, maintained by the EPA, lists facilities that generate hazardous waste as part of their normal business practices. Generators are listed as either large (LQG), small (SQG), or conditionally exempt (CESQG). LQG produce at least 1000 kg/month of non-acutely hazardous waste or 1 kg/month of acutely hazardous waste. SQG produce 100-1000 kg/month of non-acutely hazardous waste. CESQG are those that generate less than 100 kg/month of non-acutely hazardous waste.
RCRA CORRACTS/TSDs	The USEPA maintains a database of RCRA facilities associated with treatment, storage, and disposal (TSD) of hazardous materials which are undergoing "corrective action". A "corrective action" order is issued when there is a release of hazardous waste or constituents into the environment from a RCRA facility.
RCRA Non-CORRACTS/TSDs	The RCRA Non-CORRACTS/TSD Database is a compilation by the USEPA of facilities which report storage, transportation, treatment, or disposal of hazardous waste. Unlike the RCRA CORRACTS/TSD database, the RCRA Non-CORRACTS/TSD database does not include RCRA facilities where corrective action is required.
RCRA Violators List	RAATS. RCRA Administrative Actions Taken. RAATS information is now contained in the RCRIS database and includes records of administrative enforcement actions against facilities for noncompliance.
RCRIS	Resource Conservation and Recovery Information System, as defined in the Records Review section of this report.
REC	Recognized Environmental Conditions are defined by ASTM E1527-13 as "the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: 1) due to any release to the environment; 2) under conditions indicative of a release to the environment. De minimis conditions are not recognized environmental conditions."
SCL	State "CERCLIS" List (see SPL /State Priority List, below).
SPCC	Spill Prevention, Control and Countermeasures. SPCC plans are required under federal law (Clean Water Act and Oil Pollution Act) for any facility storing petroleum in tanks and/or containers of 55-gallons or more that when taken in aggregate exceed 1,320 gallons. SPCC plans are also required for facilities with underground petroleum storage tanks with capacities of over 42,000 gallons. Many states have similar spill prevention programs, which may have additional requirements.
SPL	State Priority List. State list of confirmed sites having contamination in which the state is actively involved in clean up activities or is actively pursuing potentially responsible parties for clean up. Sometimes referred to as a State "CERCLIS" List.
SQG	Small Quantity Generator
SWF/LF	State and/or Tribal database of Solid Waste/Landfill facilities. The database information may include the facility name, class, operation type, area, estimated operational life, and owner.
TPH	Total Petroleum Hydrocarbons
TRI	Toxic Release Inventory. Routine EPA report on releases of toxic chemicals to the environment based upon information submitted by entities subject to reporting under the Emergency Planning and Community Right to Know Act.

## Description of Selected General Terms and Acronyms

Term/Acronym	Description
TSCA	Toxic Substances Control Act. A federal law regulating manufacture, import, processing and distribution of chemical substances not specifically regulated by other federal laws (such as asbestos, PCBs, lead-based paint and radon). 15 U.S.C 2601 et seq.
USACE	United States Army Corps of Engineers
USC	United States Code
USGS	United States Geological Survey
USNRCS	United States Department of Agriculture-Natural Resource Conservation Service
UST	Underground Storage Tank. Most federal and state regulations, as well as ASTM E1527-13, define this as any tank, incl., underground piping connected to the tank, that is or has been used to contain hazardous substances or petroleum products and the volume of which is 10% or more beneath the surface of the ground (i.e., buried).
VCP	State and/or Tribal facilities included as Voluntary Cleanup Program sites.
VOC	Volatile Organic Compound
Wetlands	<p>Areas that are typically saturated with surface or ground water that creates an environment supportive of wetland vegetation (i.e., swamps, marshes, bogs). The <u>Corps of Engineers Wetlands Delineation Manual</u> (Technical Report Y-87-1) defines wetlands as areas inundated or saturated by surface or ground water at a frequency and duration sufficient to support, and that under normal circumstances do support, a prevalence of vegetation typically adapted for life in saturated soil conditions. For an area to be considered a jurisdictional wetland, it must meet the following criteria: more than 50 percent of the dominant plant species must be categorized as Obligate, Facultative Wetland, or Facultative on lists of plant species that occur in wetlands; the soil must be hydric; and, wetland hydrology must be present.</p> <p>The federal Clean Water Act which regulates “waters of the US,” also regulates wetlands, a program jointly administered by the USACE and the EPA. Waters of the U.S. are defined as: (1) waters used in interstate or foreign commerce, including all waters subject to the ebb and flow of tides; (2) all interstate waters including interstate wetlands; (3) all other waters such as intrastate lakes, rivers, streams (including intermittent streams), mudflats, sandflats, wetlands, sloughs, prairie potholes, wet meadows, playa lakes, or natural ponds, etc., which the use, degradation, or destruction could affect interstate/ foreign commerce; (4) all impoundments of waters otherwise defined as waters of the U. S., (5) tributaries of waters identified in 1 through 4 above; (6) the territorial seas; and (7) wetlands adjacent to waters identified in 1 through 6 above. Only the USACE has the authority to make a final wetlands jurisdictional determination.</p>
