Zilker Botanical Garden
Activity Guide – DIY Salad Dressings

Ages: All ages

Approximate Length: 15 minutes

Objective: Make your own salad dressings at home while engaging your senses and learning more about the herbs and plants growing nearby.

Materials:
1. Sealable glass jar
2. ¼ yellow onion
3. 1 garlic clove
4. 3 tablespoons apple cider vinegar
5. 2 tablespoons lemon or lime juice
6. Large handful of fresh herbs like:
   a. Parsley
   b. Basil
   c. Thyme
   d. Mint
   e. Oregano
   f. Rosemary
7. ¼ cup olive oil
8. ½ teaspoon salt
9. ¼ teaspoon pepper
10. Blender or food processor

Concept Terms:
1. **Herbs** – Any plant or part of a plant used as an ingredient for flavor, fragrance or healing. Herbs and spices are used for the same purposes, but herbs have generally evolved in more temperate climates and tend to be harvested for their leaves, while spices tend to be of a tropical origin and have various useful components, such as roots (ginger), seeds (pepper) or bark (cinnamon).
2. **Vegetables** – Plants or parts of plants consumed by humans for food and have been cultivated by humans through agriculture sometime between 9,000-12,000 years ago. A fruit is a seed-bearing structure that develops from the ovary of a flowering plant, whereas vegetables are all other plant parts, like roots (carrots), stems (asparagus) and leaves (spinach).

Background:
1. Herbs have played crucial roles in the lives of humans throughout history, helping flavor food, disguising bad odors and even treating illnesses and injuries!
2. Salad comes from the Latin phrase “herba salta” or “salted herbs,” so called because greens were usually seasoned with dressings containing lots of salt.
3. According to a 2014 Wall Street Journal article, Americans consume salad dressing 38 times a year, with Ranch dressing being the most popular (15 times per year).

Instructions:
1. Decide in advance what kind of herbs you want to include in your dressing by smelling their fragrance.
2. In a blender or food processor, mix all ingredients and blend until smooth.
3. Can be consumed immediately, but you should keep refrigerated for 2-4 weeks max.
4. See if you can identify all the herbs on the next sheet!
