### SUMMARY OF TOPICS

#### EXTERIOR

 1 Answers · 0 Replies

What do you like or dislike about the suggested materials and look of the proposed restroom?&nbsp; What would you change?

I think the materials and look are fine. It'd be nice if it could have solar panels or something for electricity to show the city invests in renewable energy.

#### ACCESS

 4 Answers · 0 Replies

What do you like or dislike about the access to the proposed restroom?&nbsp; What would you change?

A larger site map would be helpful for orientation - showing position relative to barton creek trailhead and BS pool. The parking spaces adjacent to this don't seem to align with the current parking lot and description of where this is planned.

Also: there does not appear to be a family restroom or gender-neutral restroom stall. In today's changing society it seems like it might be nicer to have all individual stalls available for use.

Will there be a similar structure placed on the East Portion of the trail in Fiesta Garden/Beach? There are already some award-winning restrooms on the west side of the trail.

This looks similar to the new restroom constructed by the Town Lake trail by Austin High. It's look is quite nice, but I was disappointed that they weren't designed as composting toilets, or at the very least, toilets that don't use so much water per flush. Understandably, this is a park toilet, and you don't want them all to get clogged, so perhaps you can equip the toilets with the full/half water usage option buttons? Additionally, it'd be nice to see the waterless urinals equipped in each stall.
