

## Mt. Bonnell at Covert Park

A stakeholder meeting was held at the Mayfield-Gutsch House and Gardens by the City of Austin Parks and Recreation Department (PAR) on February 20, 2013 to present the proposed landscape improvements initiated by the West Point Society of Central Texas (WPSCT). The presentation informed the stakeholders of the landscape and hardscape improvements that the WPSCT in partnership with PAR would like to install. The improvements include the reduction of existing wall heights to allow for better access to the monument, handrails, and an increase of a stone paved area around the monument. In addition to those improvements, the community was also informed of the desire of the WPSCT to replace the existing limestone marker with a granite marker.
