	Responses	
	I like the additional shaded areas and there appears to be something for everyone. Young all the way to the seasoned adults.	
	I like each zone is clearly segmented. There is a deepwater diving area, lap lanes for serious swimmers, and the shallow / kids area is	
	separated. The covered play area for children is good and supervision by parents seems easier. The runway would be used as a jump off for kids	
	learning to swim. I like the shade over the pool and entry through the historic building.	
	I like the large zero entry and its shade and I like the preservation of the Givens Pool's "deep end" and diving board.	
	The quantity of shade, the location and orientation of the multipurpose room, keeping the entry in the same place.	
	Love the amount and variety of shade over the pool and along the side. With the "runway" portion of the plan, it creates more edges in the	
	pool for people to lean up next to and hang out. Shade area is great. Lots of changing space which helps to keep kids and families separate from the adults and the "swimmers".	
	Rain Garden, perimeter shade, diving board centered	
	Runway, diving well, lane position, shade, space for zero depth	
	There's more space for residents to swim. I don't like the 6 lap lanes. Would prefer no more than 4.	
	The shade and runway	
What do you like about		
Concept B?	Activity type	Open ended

	Responses	
	Really like the larger Open Swim Area. Great relationship to "yellow" seat wall. Also like play features near the zero entry Orientation of lap lanes, amount of open swim space, lack of formal divider between areas.	
	Concept B has a strong layout and should be great for families. The larger open area should be good for group play. Site lines are good.	
	Lots of open swim space, and the large water bench.	
	I like the large open swim area because in the current design people always moved into the laps. The lap lane orientation is best this way as well.	
	Really just the orientation of the lap lanes.	
What do you like about	Activity type	Open ended
Concept C?		· ·
	Total responses Responses	8
	like the shape and design of the shade structures. I like that it extends from the open air pavillion.	
	Best Layout! This such a great way to separate younger kids and adults. I love the benches and zero-depth in the smaller pool. This will be	
	a great activity pool. The larger pool gives SOO many options for swimmers, programming lessons, events, and families to have open	
	space. Lap pool can be great to keep open all year. Like the multi-purpose building and historic building on both ends of the pool. The slide orientation in this concept has the most circulation	
	Like the multi-pulpose building and instanc building on both ends of the pool. The side orientation in this concept has the most circulation around the bottom of the slide.	
	Like use of historic bathhouse, interesting runway design.	
	I like that the lap Lanes are separate from the open swim.	
	The separation is good. The lap pool could be heated separately for all year around swim	
	multip purpose room location, perimeter shade, water benches, large rain garden, preservation of diving area I like the preservation of the diving area. Swimming under the runway is cool. Shaded entry is a plus. All concepts should have maximum	
	shade.	
Is there anything else		
Is there anything else you'd like to add to the	shade.	Open ended
