WALSH BOAT LANDING PUBLIC MEETING

Your input is needed!

The Austin Parks and Recreation Department recognizes the current commercial and recreational boat user access and site conflicts at Walsh Boat Landing. Capacity issues at this facility have created the need to look at how access at the dock can be safely and efficiently managed for all dock users. At this time, a conceptual site plan has been created as a solution to the issues identified at the docks and ramps. The purpose of this meeting is to present the conceptual site plan and the proposed use of the facility by recreational and commercial boat users.

Several focus group sessions were previously held with public and commercial stakeholders on the issue of space and access at Walsh Boat Landing. The goal of these meetings was to find a way to provide equal and efficient access at the dock for all of our users.

An initial public meeting was held in October 2015 to present key findings of the site analysis and potential improvement options. At this time a conceptual site plan has been created as a solution to capacity issues identified at the dock.
