AustinWater.org

June 1, 2021

Dear Customer:

Austin Water is planning improvements to water and wastewater lines in your area. The project, known as the Truman Heights Water and Wastewater Renewal Project, is nearing the end of the design phase and construction is expected to begin around spring 2022 and take about 18 months to complete.

Renewing Austin is an Austin Water program to replace and upgrade aging water lines. Austin Water is protecting our city's water infrastructure by investing in upgrades and repairs of the existing water lines. Water line breaks are well documented in this area and the project is necessary to avoid further expenditures to maintain water lines that have broken frequently.

A public meeting for the project will be scheduled before construction starts to provide more details and answer questions about what to expect during construction. The attached map and fact sheet provide more information about the project. You can sign-up to receive email updates about the project at **[austintexas.gov/trumanheights](https://austintexas.gov/trumanheights)**.

If you have any questions in the meantime, please feel free to reach out to us.

Sincerely,

Scott Cameron
