

## OVERVIEW

Austin Transportation is planning improvements to the intersection of Stassney Lane and Congress Avenue. This project is designed to reduce crashes for all transportation modes, increase safety, and improve mobility and accessibility for those walking, riding bicycles or taking transit.

## PLANNED IMPROVEMENTS

- Adding a second left turning lane for vehicles travelling on southbound Congress Avenue to eastbound Stassney Lane.
- New raised concrete medians on Congress Avenue for improved access management.
- A new left turn lane on northbound Congress Avenue to Ainsworth Street.
- Modified existing triangular median islands at the northeast and southeast corners to slow right turn speed.
- New high-quality separated bicycle and pedestrian paths for improved connectivity and safety.
- Six new Capital Metro bus stops for safer and improved access to transit.
- Upgraded pedestrian infrastructure, including restriped high-visibility crosswalks and new Americans with Disabilities Act (ADA) compliant curb ramps.
- Driveway modifications to improve safety for all roadway users as drivers turn in and out of driveways.
- Signal infrastructure upgrades and signal timing upgrades to improve operations.
- New pavement surface treatment and new permanent markings and signage.

## TIMELINE

Construction is expected to begin in April 2023, barring no weather delays or other unforeseen circumstances.

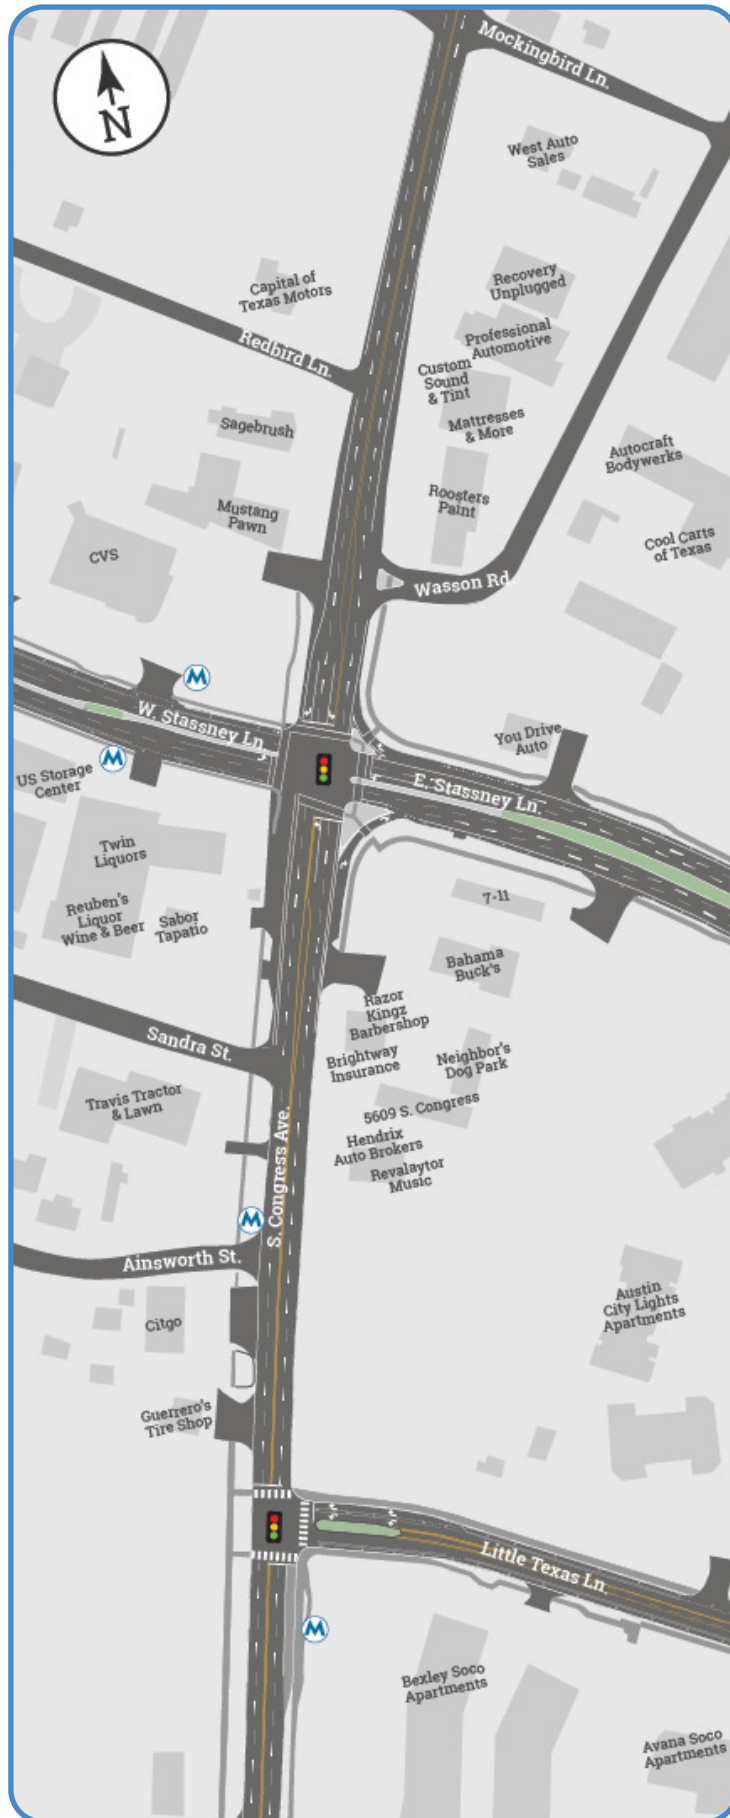

## FUNDING

The Stassney and Congress project is funded by the City of Austin Mobility Bond funds and Capital Metro.
