---

June 30, 2022

Dear ROW Stakeholder,

This letter is in regards to the recently adopted revisions of the Transportation Criteria Manual (TCM) dated June 20, 2022.

The City of Austin's Transportation Department, Right-of-Way (ROW) Management Division, will be immediately implementing and enforcing the new requirements outlined in the new TCM under Section 8 ("Traffic Control") with the exception of the following subsections which will be implemented by October 1, 2022:

- **Section 8.2.2 – Time and Work Restrictions**
  - *Use of the arterial/collector/residential roadway classifications and associated allowable barricading hours*
- **Section 8.2.5 – Construction Entrances**
  - *Use of "Construction Entrance Ahead" sign will be determined by the sealing engineer and ROW Management during the traffic control review process. The "Construction Entrance Ahead" sign will no longer require a permit when using an existing driveway.*
- **Section 8.3.3 - Bicyclist Consideration**
  - *ROW will extend the use of 804S-1 Sheets 10-13 until the new standard details have been adopted.*
- **Section 8.4.1 – Work Zones (Bullet Point B)**
  - *Use of the Portable Changeable Message Signs (PCMS) will be determined by the sealing engineer and ROW Management during the traffic control review process.*

Should there be any questions, please contact us at 512-974-7828. Additionally, in the coming months we plan on updating our Mobility Guidelines to reflect the TCM changes.

Thank you,

Ryan Mooney  
Division Manager - Right of Way Management
