RIGHT OF WAY (ROW): Conflict Considerations

Below is a list of conflict resolution options found in your [Conflict Resolution Template](#). Conflict resolutions must be attached to the permit application. Once all resolutions have been secured, email your Permit Analyst. **Email rightofway@austintexas.gov for help**

Option A - My work has cleared the ROW and/or ROW travel lanes

When work is completed and all temporary traffic controls have been removed (ex. closures and devices)

- If this option is selected, their cleared permit is considered complete and your proposed work can proceed
- Once someone has indicated their work has cleared the ROW, their work is considered complete and future work cannot occur under that permit unless they request an extension and clear all conflicts again

Option B - Our schedules do NOT overlap

When work will not occur at the same time or on the same date

- Both work schedules must be included in your conflict resolution attachment

Option C1 - All work will take place behind one single traffic control plan (TCP) - (No modifications)

When the proposed work will occur entirely within one single TCP and will require no modifications

- You may use either your TCP or the other party's TCP
- The permit # that the TCP is affiliated with must be included in your conflict resolution attachment

Option C2 - All work will take place behind one single traffic control plan (TCP) - (Slight modifications)

When the proposed work will occur entirely within one single TCP and will require slight modifications (ex. extending a taper, removing duplicate signage)

- You may use either your TCP or the other party's TCP
- Submit a "Shared TCP" request to [TCP Conflict and Shared TCP Request](#)
 - If approved, TCP Reviewers will email their approval. This approval must be included in your conflict resolution attachment.

Option D - Our TCPs can be combined

When your TCP can be set at the same time as their TCP and it will require overlapping traffic control devices

- This will be treated as a new TCP and will require a standard review
- Email both TCPs, providing the sheet numbers that will be used, to TCPReview@austintexas.gov for approval. The email subject line should be "JOINT TCP REVIEW".
 - If approved, attach the new TCP with the TCP Reviewer stamp

Option E - Both TCPs can be set at the same time

When your TCP can be set at the same time as their TCP without alterations to either plan because temporary traffic control devices and work zones don't overlap

- Submit a "TCP Conflict Review" request to [TCP Conflict and Shared TCP Request](#)
 - If approved, TCP Reviewers will email their approval. This approval must be included in your conflict resolution attachment.
