Mar 5

Tuesday 1230pm to 2pm at University of Texas

Norman Hackerman Building (NHB). 100 E 24th St, Austin TX, 78712 Room 1.720

- **Center for Environmental Research Lunchtime Lecture by Kevin M. Anderson**
- 2019 Lunchtime Lectures – The Geography of Flowing Water: Rivers, Streams, Nature, and Culture
- **March CER Lunchtime Lecture - Riparia: Life at the Edge**
- Riparian areas are waterway margins, the transition zone along the banks between the flowing water of the main channel and the bottomland and upland areas of a watershed. Riparian vegetation forms rich habitat for biodiversity, and riparian zones are critical sites for hydrology and biogeochemistry influencing water quality and quantity. During drought, they are a thin ribbon of green life along our rivers and streams, and, during flood, they are the armor that hold the banks together. This is where one hears wind in the willows (or bald cypress) and the bank folk like bank swallows, kingfishers, beavers, and otters make their homes. Join us for a talk about life at the edge.
- Now online as podcasts! Check them out here - <http://austineconetwork.com/nature-in-the-city/>

Mar 9

Saturday 7am-11am meet at the CER

- **Hornsby Bend Bird Observatory Program Monthly Bird Survey**
- The HBBO Bird Survey is open to all levels of birder interested in intensive monitoring, although this is not a field trip. In the morning, we have teams covering different areas of the Hornsby Bend facility, and they count numbers of all birds seen. It is 4 hours of hiking and counting, but lots of fun along the way. We meet again around 11am to tally up the species. More information about the CER HBBO program at www.hornsbybend.org
