

This form is for properties that are unable to successfully complete the **Vehicle Wash Facility Efficiency Certification Program Equipment Evaluation** by the required due date, wish to postpone equipment repairs for future budget cycles, or wish not to operate sections of the vehicle wash system. A Compliance Plan serves as an alternate method of complying with City Code §6-4-10(A). This Compliance Plan can serve to notify Austin Water of a property's intent to turn off their non-compliant vehicle wash system, turn off certain portions of the non-compliant vehicle wash equipment, and/or specify a time line for system upgrades.

The actions detailed in this Compliance Form shall stay in effect until updated by a new Compliance Form or until a successful Vehicle Wash Equipment Evaluation of the entire vehicle wash system has been submitted to Austin Water.

Operation of **any** vehicle wash equipment station requires submittal of a Vehicle Wash Equipment Evaluation Form completed by a plumber licensed by the State of Texas.

In order to turn a piece of vehicle wash equipment back on, a new Vehicle Wash Equipment Evaluation must first be submitted to Austin Water. This evaluation must also include an updated Vehicle Wash Equipment Evaluation Form that has been completed by a plumber licensed by the State of Texas and certifies that the vehicle wash equipment is in compliance with City of Austin Code 6-4.

TX Plumbing #: _____

Email: _____ Phone: _____

Please indicate why the compliance plan is necessary.

Include details of the compliance plan (equipment not yet in compliance, equipment not normally utilized, equipment to be turned off, etc.) and a timeline for bringing equipment into compliance. Attach an additional sheet for explanation if necessary.

Attach the follow required documentation to the Compliance Plan application:

- **Site map**, including:
 - North arrow, street information, and building arrangement
 - Identification number of each piece of equipment, wash bay, and/or wash tunnel and their location on the property
 - A completed Compliance Plan Map Accompaniment form
- **Vehicle Wash Equipment Evaluation Form** completed by a plumber licensed by the State of Texas (*unless all vehicle wash equipment is turned off*)
