

2021 Water Quality Report Released

State and federal regulations require Austin Water to provide a water quality report annually to customers. This report provides data about drinking water quality including sources and treatment processes, as well as information about innovations and quality controls that have been added to strengthen Austin Water's water treatment processes. For example, Austin Water has increased the frequency of water testing above what is required by regulatory agencies to ensure water quality. In addition to daily and hourly testing at each water treatment plant, a minimum of 300 tests are taken throughout the distribution system every month to check for bacteriological contaminants, chlorination levels, and other important parameters. Treatment goals are also set at levels that exceed state and federal requirements of 0.3 NTU or less in water clarity (turbidity). Austin Water's goal is 0.1 NTU or lower – and we consistently achieve this standard on average month after month, year after year.

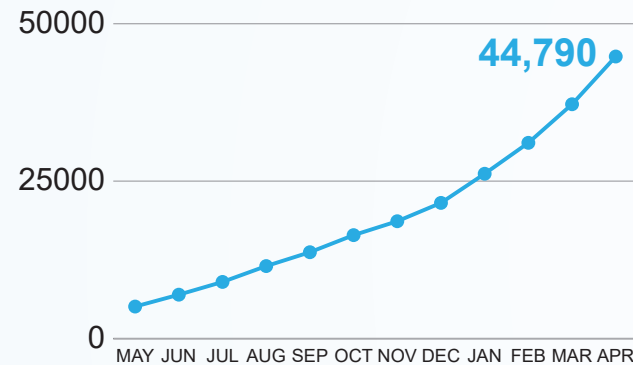

MONTHLY PERFORMANCE DASHBOARD

A report highlighting key performance indicators

April 2022

Business Excellence & Innovation

My ATX Water, Austin's Smart Water Meter System is in full swing, working to install 250,000 new digital water meters city-wide between now and 2025. As of April more than 40,000 meters have been installed. Aclara, Austin Water's certified contractor, will hire additional technicians to increase the number of meter installs each month. Customers have also been signing up for the [My ATX Water portal](#), where they can see their water use data in near-real-time, receive water alerts, and find ways to save water and money. The portal is currently around a 50% adoption rate after customers receive their new meter.

Affordability

Austin Water continued a 10 percent reduction in water and wastewater rates for our most vulnerable low-income customers enrolled in the City of Austin's Customer Assistance Program (CAP) for the entirety of fiscal year 2022.

Affordability efforts continue as Austin Water implemented a multifamily CAP program in 2021 and continued debt management strategies for debt service savings.

Annual Residential Bill is to stay at or below 1.5 percent of Austin Median Household Income (MHI)

Customer Satisfaction

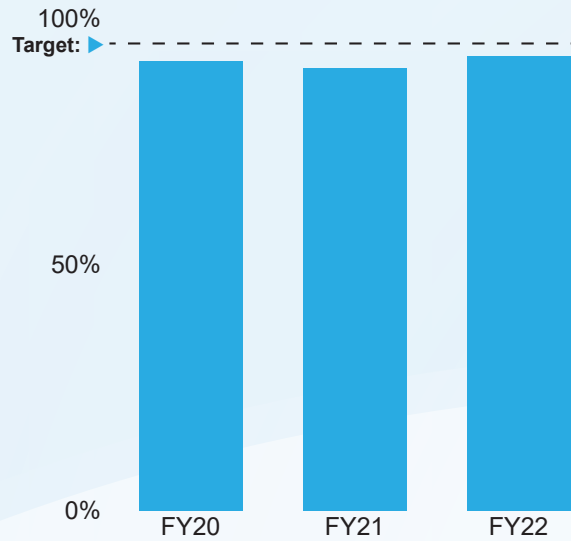

Customer Collaboration

Sanitary Sewage Overflows

Investigated within **one hour** of customer calls

Quarterly
Target: > 95%

Priority 1 Leaks responded to within three hours

Monthly
Target: > 90%

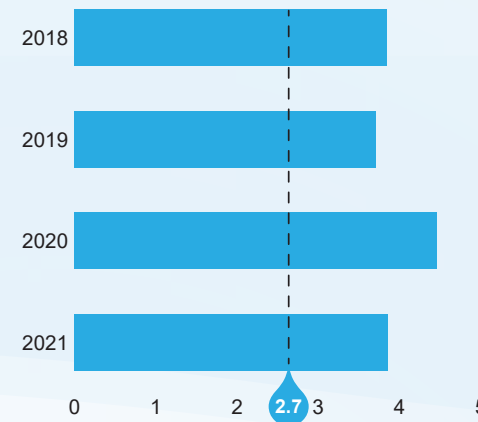

Infrastructure Stability

Water Leak Management Index (Infrastructure Leak Index)

The current annual real losses divided by the unavoidable annual real losses. The data that this calculation is based on is derived from the annual water loss audit.

Annual Target: < 2.7

Reduce operational risks by successfully completing at least **80% of the Austin Water Capital Improvements Program** on identified priority infrastructure needs annually.

Percentage of actual CIP spending to budgeted CIP spending

Annual Target: > 80%

Facility Assets in Fair or Better Condition

The state of the assets that comprise the treatment, pumping, and storage facilities.

Annual Target: > 80%

Water Supply Sustainability

Austin's water use Gallons Per Capita per Day (gpcd)

Reclaimed Water Customers:

Customers using reclaimed wastewater for beneficial purposes.

- Provided reclaimed water for irrigation in 1974, making our system one of the oldest in the Texas
- Approximately **1.4 billion gallons** of water used in 2018, about 3% of the City's total water demand
- Consists of **63.4 miles** of reclaimed water transmission mains
- Future plans for the system consist of over **130 miles** of mains and over **8 billion gallons** used annually

Product Quality

Drinking Water Quality Calendar

Year 2022: Cloudiness of water (turbidity)

Measured turbidity "cloudiness of water" is the indicator of the effectiveness of our filtration systems.

Our target is to keep treated drinking water turbidity level at 0.10 Nephelometric Turbidity Unit (NTU) or less.

Wastewater Quality Calendar

Year 2022: Keeps the Carbonaceous Biological Oxygen Demand (CBOD) concentration from our wastewater treatment plants discharging at 3.0 mg/L or less.
